An Accidental Journey Through Tibet Charles Poynton, 2008 **A Theory of Urbanity** Anton Zijderfeld, 2017-09-29 Cities provide for people not just functionally in terms of jobs obligations and practical pursuits but

also and above all emotionally We like some cities and detest others Despite shared rationalizations and common modes of administration and design each city has its own culture A culture is typically human in that it contains all dimensions of the human personal condition from the lowest to the most sublime Urban culture comprises both economic and civic culture and is the source of a city's vitality For today's urban sprawls which have a weak and failing economic and civic culture the task of the urban administration and various economic and civic organizations is to strengthen conditions that can prevent the emergence of urban anomie With suburbanization the edge city and the emergence of cyberspace some argue that cities as integrated places of working and living are things of the past Zijderfeld argues that people are and remain social animals who like and need one another's company particularly in their economic socio cultural and political activities Throughout the ages cities have provided the environment in which people fulfill these needs Anton Zijderfeld discusses urban preferences the organizations and ramifications of urbanity the modernization of urban culture the uneasy alliance between urbanity and the interventionist state and the cultural dimensions of urban renewal Zijderfeld sees the economic and civic culture of the city as the centerpiece of contemporary urban management and contemporary urban democracy In this sense the new technology is an ally of the new urban renewal Most postmodern treatises on the end of the city are impressionistic and unsystematic In contrast Zijderfeld puts the qualitative dimensions of city life into focus catching its pulse and cultural rhythms in a systematic context that prior studies have lacked As such it will be of great interest to urban administrators p

Brocklesby: A Connecticut Valley Architect in the Gilded Age* Bill Ranauro, 2023-07-07 The late nineteenth century known commonly as the Gilded Age produced some of the most beautiful yet controversial architecture in America's history The great influencers of the period including Richard Upjohn Henry Hobson Richardson and Charles McKim each spread the gospel of his own architectural style The result was an eclectic mix of styles that some detested but that others embraced Caught in the struggle to find an architecture America could claim as its own Hartford Connecticut architect William Brocklesby carved out his own stylistic path In an age when the taste for ostentation and pretension was adopted by many William Brocklesby produced some of the most dignified and beautiful architecture in the Connecticut Valley His churches libraries and theaters remain as artistic landmarks throughout western New England and his work at colleges from

Architecture Depends Jeremy Till, 2013-02-08 Polemics and reflections on how to bridge the gap between what architecture actually is and what architects want it to be Architecture depends on what On people time politics ethics mess the real world Architecture Jeremy Till argues with conviction in this engaging sometimes pugnacious book cannot help itself it is dependent for its very existence on things outside itself Despite the claims of autonomy purity and control that architects like to make about their practice architecture is buffeted by uncertainty and contingency Circumstances invariably intervene to upset the architect's best laid plans at every stage in the process from design through construction to occupancy Architects however tend to deny this fearing contingency and preferring to pursue perfection With *Architecture Depends* architect and critic Jeremy Till offers a proposal for rescuing architects from themselves a way to bridge the gap between what architecture actually is and what architects want it to be Mixing anecdote design social theory and personal experience Till's writing is always accessible moving freely between high and low registers much like his suggestions for architecture itself

Designing a Place Called Home James Wentling, 2012-12-06 are often lined with garages in front of houses that are clearly more internalized in design some even taking on a fortress like appearance Today's new homes are technically superior in construction i.e. they are more energy efficient weather resistant and maintenance free However they also seem to lack the warmth and charm of prewar homes for which more construction dollars were spent on quality veneers but in features and other human scale details The postwar need for massive amounts of affordable housing for returning GIs helped to encourage building practices that could reduce on site labor and material costs in houses The accommodation of the automobile cost cutting movements and a variety of other trends caused a gradual decline in the human social and emotional qualities of postwar residential architecture This book will attempt to look at the issues and choices facing today's residential designers and home builders and ask How can we make our new houses and neighborhoods more responsive to humanistic needs particularly in light of constant pressures to keep housing costs down This question will generally be addressed by comparing historical designs to those of today to see if we might be able to reconsider some old fashioned ideas in new housing designs

Need to Know John G. Stackhouse Jr., 2014-05-30 How should a Christian think If a serious Christian wants to think seriously about a serious subject from considering how to vote in the next election to choosing a career from deciding among scientific theories to selecting a mate from weighing competing marketing proposals to discerning the best fitness plan what does he or she do This basic question is at the heart of a complex discourse epistemology A bold new statement of Christian epistemology *Need to Know* presents a comprehensive coherent and clear model of responsible

Christian thinking Grounded in the best of the Christian theological tradition while being attentive to a surprising range of thinkers in the history of philosophy natural science social science and culture the book offers a scheme for drawing together experience tradition scholarship art and the Bible into a practical yet theoretically profound system of thinking about thinking John Stackhouse s fundamental idea is as simple as it is startling Since God calls human beings to do certain things in the world God can be relied upon to supply the knowledge necessary for human beings to do those things The classic Christian concept of vocation then supplies both the impetus and the assurance that faithful Christians can trust God to guide their thinking on a need to know basis
