and America Ann R. Hawkins, Erin N. Bistline, Catherine S. Blackwell, Maura Ives, 2021-11-01 A vital part of daily life in the nineteenth century games and play were so familiar and so ubiquitous that their presence over time became almost invisible Technological advances during the century allowed for easier manufacturing and distribution of board games and books about games and the changing economic conditions created a larger market for them as well as more time in which to play them These changing conditions not only made games more profitable but they also increased the influence of games on many facets of culture Playing Games in Nineteenth Century Britain and America focuses on the material and visual culture of both American and British games examining how cultures of play intersect with evolving gender norms economic structures scientific discourses social movements and nationalist sentiments

examines the classical concepts of governance and regulation in order to position them in an integrative model of the initiatives which contribute dynamically to territorial development According to this model the concepts of governance and regulation become two axes revealing four main reference situations which differentiate between the local initiatives ground up and public actions top down that coexist in a territory The model emphasizes the need to consider the place of territorial stakeholders in regulatory processes The book enriches this concept familiar in a legislative context and describes it as an area of influence of and negotiation with shareholders It contributes to a territorial governance system which encourages development offers It reveals the inseparable link between influence and development processes that lead to value creation The logic of governance specifies the various sources of value creation while the logic of regulation seeks to maximize the acceptability of such value creation by making it into an attractive proposition for stakeholders **The Burlington**
