The Nature and Nurture of Love Marga Vicedo, 2013-05-16 The notion that maternal care and love will determine a child s emotional well being and future personality has become ubiquitous In countless stories and movies we find that the problems of the protagonists anything from the fear of romantic commitment to serial killing stem from their troubled relationships with their mothers during childhood How did we come to hold these views about the determinant power of mother love over an individual s emotional development And what does this vision of mother love entail for children and mothers In The Nature and Nurture of Love Marga Vicedo examines scientific views about children s emotional needs and mother love from World War II until the 1970s paying particular attention to John Bowlby s ethological theory of attachment behavior Vicedo tracks the development of Bowlby s work as well as the interdisciplinary research that he used to support his theory including Konrad Lorenz s studies of imprinting in geese Harry Harlow s experiments with monkeys and Mary Ainsworth s observations of children and mothers in Uganda and the United States Vicedo s historical analysis reveals that important psychoanalysts and animal researchers opposed the project of turning emotions into biological instincts Despite those substantial criticisms she argues that attachment theory was paramount in turning mother love into a biological need This shift introduced a new justification for the prescriptive role of biology in human affairs and had profound and negative consequences for mothers and for the valuation of mother love

How to Feel Sushma Subramanian, 2021-02-02 We are out of touch Many people fear that we are trapped inside our screens becoming less in tune with our bodies and losing our connection to the physical world But the sense of touch has been undervalued since long before the days of digital isolation Because of deeply rooted beliefs that favor the cerebral over the corporeal touch is maligned as dirty or sentimental in contrast with supposedly more elevated modes of perceiving the world *How to Feel* explores the scientific physical emotional and cultural aspects of touch reconnecting us to what is arguably our most important sense Sushma Subramanian introduces readers to the scientists whose groundbreaking research is underscoring the role of touch in our lives Through vivid individual stories a man who lost his sense of touch in his late teens a woman who experiences touch emotion synesthesia her own efforts to become less touch averse Subramanian explains the science of the somatosensory system and our philosophical beliefs about it She visits labs that are shaping the textures of objects we use every day from cereal to synthetic fabrics The book highlights the growing field of haptics which is trying to incorporate tactile interactions into devices such as phones that touch us back and prosthetic limbs that can feel *How to Feel* offers a new appreciation for a vital but misunderstood sense and how we can use it to live more fully

History and Its Limits Dominick LaCapra, 2011-02-23 Dominick LaCapra's *History and Its Limits* articulates the relations among intellectual history cultural history and critical theory examining the recent rise of Practice Theory and probing the limitations of prevalent forms of humanism LaCapra focuses on the problem of understanding extreme cases specifically events and experiences involving violence and victimization He asks how historians treat and are simultaneously

implicated in the traumatic processes they attempt to represent In addressing these questions he also investigates violence s impact on various types of writing and establishes a distinctive role for critical theory in the face of an insufficiently discriminating aesthetic of the sublime often unreflectively amalgamated with the uncanny In *History and Its Limits* LaCapra inquires into the related phenomenon of a turn to the postsecular even the messianic or the miraculous in recent theoretical discussions of extreme events by such prominent figures as Giorgio Agamben Eric L Santner and Slavoj Zizek In a related vein he discusses Martin Heidegger s evocative if not enchanting understanding of *The Origin of the Work of Art* LaCapra subjects to critical scrutiny the sometimes internally divided way in which violence has been valorized in sacrificial regenerative or redemptive terms by a series of important modern intellectuals on both the far right and the far left including Georges Sorel the early Walter Benjamin Georges Bataille Frantz Fanon and Ernst J nger Violence and victimization are prominent in the relation between the human and the animal LaCapra questions prevalent anthropocentrism evident even in theorists of the posthuman and the long standing quest for a decisive criterion separating or dividing the human from the animal LaCapra regards this attempt to fix the difference as misguided and potentially dangerous because it renders insufficiently problematic the manner in which humans treat other animals and interact with the environment In raising the issue of desirable transformations in modernity *History and Its Limits* examines the legitimacy of normative limits necessary for life in common and explores the disconcerting role of transgressive initiatives beyond limits including limits blocking the recognition that humans are themselves animals
