Emotion of Love Sanford Bell,2015-11-09 The emotion of love between the sexes has as yet received Pg 325 no thorough scientific treatment No writer so far as I can find has treated it from a genetic standpoint The literature upon the subject is therefore meager In his recent treatise upon The Psychology of the Emotions Ribot 2 remarks The sex instinct the

last in chronological order with man and the higher animals gives rise to the emotion of love with its numerous individual varieties Most psychologists have been very sparing of details where it is concerned and one might mention certain voluminous treatises which contain no mention of it Is this through exaggerated delicacy Or is it because the authors think that their place has been usurped by the novelists who have so obstinately confined themselves to the study of this passion But the novelist s mode of analysis is different from the psychological mode and does not exclude it This author then devotes one chapter of eleven pages to the treatment of the sexual instinct which includes Pg 326 what he has to say upon sex love Brief as this treatment is it is valuable both for the facts it presents and for the problems it suggests Havelock Ellis who has perhaps done more than any other investigator in the field of the normal Psychology of Sex says in his most recent work 3 It is a very remarkable fact that although for many years past serious attempts have been made to elucidate the psychology of sexual perversions little or no endeavor has been made to study the psychologic development of the normal sexual emotions Nearly every writer seems either to take for granted that he and his readers are so familiar with all the facts of normal sex psychology that any detailed statement is altogether uncalled for or else he is content to write a few introductory phrases mostly made up from anatomic philosophic and historical work
