Geological Exploration in Murzuq Basin D. Worsley,2000-12-19 The Murzuq Basin is a large intracratonic sag basin located in southwestern Libya Exploration efforts started in this vast and remote Saharan region already in 1957 and 60 exploratory wells have been drilled to date resulting in over 20 discoveries with around 4 000 million barrels of oil in place Most discoveries have been made in Ordovician sandstone reservoirs sourced by hot shales of the Lower Silurian Tanezzuft Formation Oil is already being produced and exported from the area but the basin s total hydrocarbon potential is still poorly understood Recent exploration especially the major discovery and initial development of the Giant Elephant Field has greatly increased interest for the area s potential Many petroleum geologists and companies now believe that the basin may well develop into a new major hydrocarbon province which will significantly contribute to Europe s energy needs in the next decades This book presents papers from a conference held at Sebha University on the eastern margins of the Murzuq Basin in September 1998 The book continues an ongoing series of presentations of the geology of Libya but the 25 contributions herein mostly centre on the Murzuq Basin itself and on nearby areas There are still many unresolved questions in terms of geological and hydrocarbon exploration in these difficult desert areas but the papers herein will hopefully present a first comprehensive overview of an exciting frontier exploration region About half of the papers are directly related to hydrocarbon exploration and to source rock and reservoir development but a wide variety of other features are also described ranging from palaeontology and biostratigraphy to ore geology and water resources covering the entire geological column from the Precambrian to the Holocene The book concludes with a bibliography covering all geological aspects of this

challenging but very promising frontier area **Glaciogenic Reservoirs and Hydrocarbon Systems** Mads Huuse, J. Redfern, D. P. Le Heron, R. J. Dixon (Geologist), A. Moscariello, Jonathan Craig, 2012 Glaciogenic reservoirs and hydrocarbon systems occur intermittently throughout the stratigraphic record with particular prominence in Neoproterozoic Late Ordovician Permo Carboniferous and Late Cenozoic strata Recent interest in glaciogenic successions has been fuelled by hydrocarbon discoveries in ancient glaciogenic reservoirs in North Africa the Middle East Australia and South America Glaciogenic deposits of Pleistocene age are noteworthy for their content of groundwater onshore and potentially prospective and or hazardous gas accumulations offshore The abundant imprints of Pleistocene glaciations in both hemispheres can be used to reconstruct complex histories of repeated ice cover and retreat and glacier bed interactions thus informing our view on the dynamics of older ice caps and predictions of future glaciations This volume aims to provide a better understanding of glaciogenic processes their stratigraphic record and reservoir characteristics of glaciogenic deposits The book comprises 3 overview papers and 16 original case studies of Neoproterozoic to Pleistocene successions on 6 continents and will be of interest to sedimentologists glaciologists geophysicists hydrologists and petroleum geologists alike P 4 of cover The West African Orogens and Circum-Atlantic Correlatives R.D. Dallmeyer, J.P. Lecorche, 2012-12-06 In December 1987 Project 233 of the International Geological Correlation Program hosted an international conference in Nouakchott Mauritania Discussions were focused on the Tectonothermal Evolution Of The West African Orogens And Circum Atlantic Terrane Linkages A wealth of new information was presented during the conference and it was apparent that the time was appropriate to prepare a systematic volume dealing with the geology of northwest Africa The present volume is an outgrowth of this conference but is not merely a compilation of the papers presented in Nouakchott Instead it represents a coordinated volume designed to present a balanced comprehensive view of our present understanding of West African geology and potential correlations in other Circum Atlantic Paleozoic orogens We sincerely appreciate the efforts of all the reviewers whose comments have greatly helped to improve the quality of this volume We also thank the various contributors for their diligence and perseverance in manuscript preparation The calibre of the present volume is a reflection of their labor Athens Marseille Autumn 1990 R D DALLMEYER J P LECORCHE Contents Chapter 1 Introduction 3 R D DALLMEYER and J P LECORCHE Chapter 2 Geophysics and the Crustal structure of West Africa 9 J ROUSSEL and A LESQUER Chapter 3 Crystalline Basement of the West African Craton 31 *Geology of Western Gondwana (2000 - 500 Ma)* Roland Trompette, 2020-08-26 In considering the geology of Western Gondwana this text covers the Pan African Brasiliano cratons the Pan African Brasiliano fold belts and mosaic of Pan African Brasiliano mini cratons and minor fold belts Northeast Brazil and the Central Western portion of Africa **Late Paleozoic Glacial Events and Postglacial Transgressions in Gondwana** Oscar R. López-Gamundí, Luis A. Buatois, 2010 **A Global Synthesis of the Ordovician System: Part 2** T. Servais, D.A.T. Harper, B. Lefebvre, I. G. Percival, 2023-06-08 The Ordovician was one of the longest of the geological periods characterized

by major magmatic and tectonic activity an immense biodiversification swings in climate and sea levels and the first Phanerozoic mass extinction A Global Synthesis of the Ordovician System is presented in two volumes in The Geological Society Special Publications Whereas the first volume SP532 concentrates on general aspects and a synthesis of the Ordovician geology of Europe this volume SP533 includes reviews of Ordovician successions of most other parts of the world The classic successions of the Ordovician basins of North America are presented as well as those of China where several of the Ordovician Global Boundary Stratotype Sections and Points are defined The volume also includes syntheses of the Ordovician geology of Africa South America most regions of Asia from the Near to the Far East along with Central Asia as well as Australia New Zealand and Antarctica
