Claussen,Vicki Arroyo Cochran,Debra P. Davis,2001-01-01 It is the greatest environmental challenge of the 21st Century But
what do we truly know about global climate change And what can we do about it Most of the world s top scientists agree that
emissions of carbon dioxide and other greenhouse gases from human activities such as industrial processes fossil fuel
combustion and land use changes are causing the earth to get warmer Impacts of this warming may include damage to our
coastal areas accelerated rates of species loss altered agricultural patterns and increased incidences of infectious diseases
The effects of climate change and efforts to mitigate climate change could also have substantial economic ramifications The
book presents the latest research and analysis from prominent scientists economists academics and policy makers including
Tom Wigley and Joel Smith who along with other authors of the Science and Impacts chapter explain the basic science of
climate change the growing evidence that human activities are changing our climate and the impacts of these changes Eileen
Claussen John Gummer Henry Lee and other authors of the Global Strategies chapter who describe what nations are or are
not doing to address climate change and the state of international climate talks Robert Stavins John Weyant Ev Ehrlich and
other economists who explain why economic analyses of climate policy are conducted why the projected costs of addressing
climate change vary so widely among economic models and how changes driven by today s economy can influence climate
policy Gov Jean Shaheen and other authors of the Innovative Solutions chapter who describe what state and local
governments in theUnited States and multinational companies are doing to monitor and curb greenhouse gas emissions and
Forest Reinhardt who offers business leaders advice on steering their companies on a path that is healthy for business as
well as the global climate This publication has also been published in paperback please click here for details *The*
