Lucidite Du Corps:

Body Image and Body Schema Helena de Preester, Veroniek Knockaert, 2005-01-01 Therefore this volume offers an interdisciplinary approach from the fields of neuroscience phenomenology and psychoanalysis **Handbook of Phenomenological Aesthetics** Hans Rainer Sepp, Lester Embree, 2010-03-11 Historically phenomenology began in Edmund Husserl's theory of mathematics and logic went on to focus for him on transcendental first philosophy and for others on metaphysics philosophical anthropology and theory of interpretation The continuing focus has thus been on knowledge and being But if one began without those interests and with an understanding of the phenomenological style of approach one might well see that art and aesthetics make up the most natural field to be approached phenomenologically Contributions to this field have continually been made in the phenomenological tradition from very early on but so to speak along the side The situation has been similar with phenomenological ethics A great deal of thought about art and aesthetics has nevertheless accumulated during a century and a handbook like the present one is long overdue The project of this handbook began in conversations over dinner in Sepp's apartment in Baden Baden at one evening of the hot European summer in the year 2003 As things worked out he knew more about whom to ask and how much space to allocate to each entry and Embree knew more about how to conduct the inviting preliminary editing and prodding of contributors who were late returning their criticized drafts and copyedited entries and was able to invest the time and other resources from his endowed chair That process took longer than anticipated and there were additional unfortunate delays due to factors beyond the editors' control

On Becoming Aware Natalie Depraz, Francisco J. Varela, Pierre Vermersch, 2003 This book searches for the sources and means for a disciplined practical approach to exploring human experience The spirit of this book is pragmatic and relies on a Husserlian phenomenology primarily understood as a method of exploring our experience The authors do not aim at a neo Kantian a priori new theory of experience but instead they describe a concrete activity how we examine what we live through how we become aware of our own mental life The range of experiences of which we can become aware is vast all the normal dimensions of human life perception motion memory imagination speech everyday social interactions cognitive events that can be precisely defined as tasks in laboratory experiments e.g. a protocol for visual attention but also manifestations of mental life more fraught with meaning dreaming intense emotions social tensions altered states of consciousness The central assertion in this work is that this immanent ability is habitually ignored or at best practiced unsystematically that is to say blindly Exploring human experience amounts to developing and cultivating this basic ability through specific training Only a hands on non dogmatic approach can lead to progress and that is what animates this book Series B **Between Faith and Belief** Joeri Schrijvers, 2016-05-01 What is to be done at the end of metaphysics Joeri Schrijvers's contemporary philosophy of religion takes up this question originally posed by Reiner Schürmann and central to continental philosophy The book navigates the work of thinkers who have addressed such metaphysical concerns including Martin Heidegger Emmanuel

Levinas Jean Luc Nancy Jean Luc Marion Peter Sloterdijk Ludwig Binswanger Jacques Derrida and more recently John D Caputo Mary Jane Rubenstein and Martin H gglund Notably Schrijvers engages both those who would deconstruct Christianity and those who remain within this tradition offering an option that is between between Christianity and atheism between progressive and conservative between faith and belief Ultimately Schrijvers confronts the end of metaphysics with a phenomenology of love and community arguing for the radical primacy of togetherness

Moving Imagination Helena De Preester, 2013-05-29 This volume brings together contributions by philosophers art historians and artists who discuss interpret and analyse the moving and gesturing body in the arts Broadly inspired by phenomenology and taking into account insights from cognitive science the contribution of the motor body in watching a film attending a dance or theatre performance looking at paintings or drawings and listening to music is explored from a diversity of perspectives This volume is intended for both the specialist and non specialist in the fields of art philosophy and cognitive science and testifies to the burgeoning interest for the moving and gesturing body not only in the creation but also in the perception of works of art Imagination is tied to our capacity to silently resonate with the way a work of art has been or is created

The Hand, an Organ of the Mind Zdravko Radman, 2013-05-10 Theoretical and empirical accounts of the interconnectedness between the manual and the mental suggest that the hand can be understood as a cognitive instrument Cartesian inspired dualism enforces a theoretical distinction between the motor and the cognitive and locates the mental exclusively in the head This collection focusing on the hand challenges this dichotomy offering theoretical and empirical perspectives on the interconnectedness and interdependence of the manual and mental The contributors explore the possibility that the hand far from being the merely mechanical executor of preconceived mental plans possesses its own know how enabling enhanced beings to navigate the natural social and cultural world without engaging propositional thought consciousness and deliberation The contributors consider not only broad philosophical questions ranging from the nature of embodiment enaction and the extended mind to the phenomenology of agency but also such specific issues as touching grasping gesturing sociality and simulation They show that the capacities of the hand include perception on its own and in association with other modalities action extended cognition social interaction and communication Taken together their accounts offer a handbook of cutting edge research exploring the ways that the manual shapes and reshapes the mental and creates conditions for embodied agents to act in the world Contributors Matteo Baccarini Andrew J Bremner Massimiliano L Cappuccio Andy Clark Jonathan Cole Dorothy Cowie Natalie Depraz Rosalyn Driscoll Harry Farmer Shaun Gallagher Nicholas P Holmes Daniel D Hutto Angelo Maravita Filip Mattens Richard Menary Jesse J Prinz Zdravko Radman Matthew Ratcliffe Etienne B Roesch Stephen V Shepherd Susan A J Stuart Manos Tsakiris Michael Wheeler

Surprise: An Emotion? Natalie Depraz, Anthony J. Steinbock, 2019-01-09 This volume offers perspectives on the theme of surprise crossing philosophical phenomenological scientific psycho physiology psychiatric and linguistic boundaries The main question it examines is whether surprise is an

emotion It uses two main theoretical frameworks to do so psychology in which surprise is commonly considered a primary emotion and philosophy in which surprise is related to passions as opposed to reason The book explores whether these views on surprise are satisfying or sufficient It looks at the extent to which surprise is also a cognitive phenomenon and primitively embedded in language and the way in which surprise is connected to personhood the interpersonal and moral emotions Many philosophers of different traditions a number of experimental studies conducted over the last decades recent works in linguistics and ancestral wisdom testimonies refer to surprise as a crucial experience of both rupture and openness in bodily and inner life However surprise is a theme that has not been dealt with directly and systematically in philosophy in the sciences in linguistics or in spiritual traditions This volume accomplishes just that *Alterity and Facticity* N. Depraz,D. Zahavi,2012-12-06 Husserl's phenomenology has often been criticized for its Cartesian fundamentalistic idealistic and solipsistic nature Today this widespread interpretation must be regarded as being outdated since it gives but a very partial and limited picture of Husserl's thinking The continuing publication of Husserl's research manuscripts has disclosed analyses which have made it necessary to revise and modify a number of standard readings This anthology documents the recent development in Husserl research It contains contributions from a number of young phenomenologists who have all defended their dissertation on Husserl in the nineties and it presents a new type of interpretation which emphasizes the dimensions of facticity passivity alterity and ethics in Husserl's thinking *Machine Ethics and Robot Ethics* Wendell Wallach,Peter Asaro,2020-09-10 Once the stuff of science fiction recent progress in artificial intelligence robotics and machine learning means that these rapidly advancing technologies are finally coming into widespread use within everyday life Such rapid development in these areas also brings with it a host of social political and legal issues as well as a rise in public concern and academic interest in the ethical challenges these new technologies pose This volume is a collection of scholarly work from leading figures in the development of both robot ethics and machine ethics it includes essays of historical significance which have become foundational for research in these two new areas of study as well as important recent articles The research articles selected focus on the control and governance of computational systems the exploration of ethical and moral theories using software and robots as laboratories or simulations inquiry into the necessary requirements for moral agency and the basis and boundaries of rights and questions of how best to design systems that are both useful and morally sound Collectively the articles ask what the practical ethical and legal issues arising from the development of robots will be over the next twenty years and how best to address these future considerations
