Mobilizing nature traces the environmental history of war and militarisation in France from the creation of Ch lons Camp in 1857 to military environmentalist policies in the twentieth century It offers a fresh perspective on the well known histories of the Franco Prussian War Western Front 1914 18 Second World War Cold War and the anti base campaign at Larzac whilst uncovering the largely hidden history of the numerous military bases and other installations that pepper the French countryside Mobilising nature argues that the history of war and militarisation can only be fully understood if human and environmental histories are considered in tandem Preparing for and conducting wars were only made possible through the active manipulation and mobilisation of topographies climatic conditions vegetation and animals But the military has not monopolised the mobilisation of nature Protesters against militarisation have consistently drawn on images of peaceful and productive civilian environments as the preferable alternative to destructive tanks and bombs Written in an accessible style *Mobilizing nature* will appeal to readers interested in modern France environmental history military geographies and histories anti military protests and environmentalism Traite de la Vigne Et de Ses Produits Comprenant Ludovic
