**The Luftwaffe War Diaries** Cajus Bekker, 1994-08-22 The Luftwaffe War Diaries is the definitive history of the German air force in World War II from the blitzkrieg on Poland to the last desperate stand over Germany the only account ever to come from a German source Its masterfully organized chapters detail summarize and evaluate every important strategy and campaign Cajus Bekker has drawn on official German archives and collections the combat journals and personal papers of leading officers and the collated Luftwaffe war diaries none of which have been published outside Germany as well as interviews with hundreds of former German airmen The result is a critical examination of the Luftwaffe's development and command against the vivid background of World War II's greatest air battles While the author does full justice to the performance of German airmen he does not embellish it Thus his chronicle of the deadly struggle of these men is anything but a heroic saga the exploits of the other side are treated with equal justice Heroes and villains are not described or eulogized here only men fighting a war that most of them did not want With over 100 photographs numerous maps and a complete index of personalities The Luftwaffe War Diaries brings into stunning focus for now and all time the ironic triumph and inevitable tragedy of war

**The Mediterranean Air War** Robert S. Ehlers, Jr., 2015-03-27 Without what the Allies learned in the Mediterranean air war in 1942-1944 the Normandy landings and so perhaps the Second World War II would have ended differently This is one of many lessons of The Mediterranean Air War the first one volume history of the vital role of airpower during the three year struggle for control of the Mediterranean Basin in World War II and of its significance for the Allied successes in the war's last two years Airpower historian Robert S Ehlers opens his account with an assessment of the pre war Mediterranean theater highlighting the ways in which the players strategic choices strengths and shortcomings set the stage for and ultimately shaped the air campaigns over the Middle Sea Beginning with the Italian invasion of Abyssinia Ehlers reprises the developing international crisis initially between Britain and Italy and finally encompassing France Germany the US other members of the British Commonwealth and the Balkan countries He then explores the Mediterranean air war in detail with close attention to turning points joint and combined operations and the campaign's contribution to the larger Allied effort In particular his analysis shows how and why the success of Allied airpower in the Mediterranean laid the groundwork for combined arms victories in the Middle East the Indian Ocean area North Africa and the Atlantic northwest Europe Of grand strategic importance from the days of Ancient Rome to the Great Power rivalries of the eighteenth and nineteenth centuries the Middle Sea was no less crucial to the Allied forces and their foes Here in the successful offensives in North Africa in 1942 and 1943 the US and the British learned to conduct a coalition air and combined arms war Here in Sicily and Italy in 1943 and 1944 the Allies mastered the logistics of providing air support for huge naval landings and opened a vital second aerial front against the Third Reich bombing critical oil and transportation targets with

great effectiveness The first full examination of the Mediterranean theater in these critical roles as a strategic and tactical testing ground for the Allies and as a vital theater of operations in its own right The Mediterranean Air War fills in a long missing but vital dimension of the history of World War II     Targeting Civilians in War Alexander B. Downes, 2011-05-15

Accidental harm to civilians in warfare often becomes an occasion for public outrage from citizens of both the victimized and the victimizing nation In this vitally important book on a topic of acute concern for anyone interested in military strategy international security or human rights Alexander B Downes reminds readers that democratic and authoritarian governments alike will sometimes deliberately kill large numbers of civilians as a matter of military strategy What leads governments to make such a choice Downes examines several historical cases British counterinsurgency tactics during the Boer War the starvation blockade used by the Allies against Germany in World War I Axis and Allied bombing campaigns in World War II and ethnic cleansing in the Palestine War He concludes that governments decide to target civilian populations for two main reasons desperation to reduce their own military casualties or avert defeat or a desire to seize and annex enemy territory When a state's military fortunes take a turn for the worse he finds civilians are more likely to be declared legitimate targets to coerce the enemy state to give up When territorial conquest and annexation are the aims of warfare the population of the disputed land is viewed as a threat and the aggressor state may target those civilians to remove them Democracies historically have proven especially likely to target civilians in desperate circumstances In Targeting Civilians in War Downes explores several major recent conflicts including the 1991 Persian Gulf War and the American led invasion of Iraq in 2003 Civilian casualties occurred in each campaign but they were not the aim of military action In these cases Downes maintains the achievement of quick and decisive victories against overmatched foes allowed democracies to win without abandoning their normative beliefs by intentionally targeting civilians Whether such restraint can be guaranteed in future conflicts against more powerful adversaries is however uncertain During times of war democratic societies suffer tension between norms of humane conduct and pressures to win at the lowest possible costs The painful lesson of Targeting Civilians in War is that when these two concerns clash the latter usually prevails     Hamburg 1940-45 Richard Worrall, 2024-04-25 The first book to cover the full history of the RAF's air war against Hamburg one of the most important target cities in Germany The city of Hamburg became synonymous with the destructive power of RAF Bomber Command when during summer 1943 the city suffered horrific destruction in a series of four heavy firebombing attacks Operation Gomorrah However few know how varied or long the Hamburg campaign was In this book RAF air power expert Dr Richard Worrall presents the complete history of the RAF's air campaign against the city a campaign that stretched well beyond the devastating fire raids of 1943 Dr Worrall explains how Germany's second city was an industrial centre of immense proportions and proved a consistent target for Bomber Command throughout World War II It was home to oil refineries U boat pens and ship building and submarine building yards all sustained by a large industrial workforce Bomber Command evolved tactically and technically

throughout the war and the Luftwaffe's defensive capabilities would do likewise in response. Drawing on a wide range of primary and secondary sources available on this topic and packed with photos, artwork, maps and diagrams, this is an important new history of the air campaign against the industrial and naval heart of Nazi Germany.

**World War II** Spencer C. Tucker, 2016-09-06 With more than 1 700 cross-referenced entries covering every aspect of World War II, the events and developments of the era and myriad related subjects as well as a documents volume, this is the most comprehensive reference work available on the war. The five-volume set provides comprehensive information that gives readers insight into the reasons for the war's direction and outcome. The lengthy documents volume represents a valuable repository of additional information for student research.

To Defeat the Few Douglas C. Dildy, Paul F. Crickmore, 2020-07-09 This history based on an exhaustive study of German records explores The Battle of Britain through the eyes of the Luftwaffe. Over the past 80 years, histories of the Battle of Britain have consistently portrayed the feats of The Few as they were immortalized in Churchill's famous speech as being responsible for the RAF's victory in the epic battle. However, this is only part of the story. The results of an air campaign cannot be measured in terms of territory captured, cities occupied or armies defeated, routed or annihilated. Successful air campaigns are those that achieve their intended aims or stated objectives. Victory in the Battle of Britain was determined by whether the Luftwaffe achieved its objectives. The Luftwaffe, of course, did not, and this detailed and rigorous study explains why. Analysing the battle in its entirety in the context of what it was: history's first independent offensive counter-air campaign against the world's first integrated air defence system. Douglas C. Dildy and Paul F. Crickmore set out to re-examine this remarkable conflict. Presenting the events of the Battle of Britain in the context of the Luftwaffe's campaign and RAF Fighter Command's battles against it, this title is a new and innovative history of the battle that kept alive the Allies' chances of defeating Nazi Germany.

**The Me 262 Stormbird** Colin Heaton, Anne-Marie Lewis, 2012-05-15 The Me 262 was the first of its kind, the first jet-powered aircraft. Although conceived before the war, with the initial plans being drawn in April 1939, the Stormbird was beset

with technological particularly the revolutionary engines and political difficulties resulting in it not entering combat until August 1944 with claims of nineteen downed Allied aircraft The performance of the Me 262 so far exceeded that of Allied aircraft that on 1 September 1944 USAAF General Carl Spaatz remarked that if greater numbers of German jets appeared they could inflict losses heavy enough to force cancellation of the Allied daylight bombing offensive The story of how the Stormbird came to be is fascinating history and it comes to life in the hands of noted historian Colin Heaton Told largely in the words of the German aces who flew it The Me 262 Stormbird provides the complete history of this remarkable airplane from the drawing boards to combat in the skies over the Third Reich Features two forewords one by Jorg Czypionka Me 262 night fighter pilot and another by historian and author Barrett Tillman **Fall Gelb 1940 (1)** Douglas C. Dildy, 2014-04-20

Never in the history of warfare has the clash between such great and apparently equal forces been decided so swiftly and conclusively as the German conquest of France and the Low Countries in May and June of 1940 Not deigning to spend itself against the extensive fortifications of France's Maginot Lines Hitler's Wehrmacht planned to advance its 136 of 157 divisions through Belgium and northern France in order to destroy the Allied forces there and gain territory from which to prosecute continued combat operations against France and England Beginning on 10 May 1940 this title follows the fortunes of Heeresgruppe A as its three Panzer Korps moved stealthily through the dark hilly and thickly forested Ardennes in southern Belgium before forcing a passage across the river Meuse and racing through France to the Channel in one of the most daring campaigns in history **Stalingrad Airlift 1942-43** William E. Hiestand, 2023-01-19 The story of what really led to Germany losing the battle of Stalingrad the inability of the Luftwaffe to keep Sixth Army supplied throughout the winter of 1942-43 and why this crucial airlift failed Luftwaffe chief Hermann Goering's failure to deliver his promise to keep Sixth Army supplied at Stalingrad was one of the most hard hitting strategic air failures of World War II 300 tons a day of supplies were required to sustain the Sixth Army flown in against a Soviet fighter force whose capabilities were rapidly being transformed The Luftwaffe's failure left Sixth Army trapped vulnerable and too weak to attempt a breakout The destruction of Sixth Army was one of the major turning points in World War II but the Luftwaffe's crucial role in this disaster has often been overlooked Some claim the attempt was doomed from the beginning but in this intriguing book author William E. Hiestand explains how the Germans had amassed sufficient aircraft to at least theoretically provide the supplies needed Demands of aircraft maintenance awful weather and in particular the Soviet air blockade crippled the airlift operation In addition the employment of increasing numbers of modern aircraft by the Soviet Air Force using more flexible tactics coupled with Chief Marshal Novikov's superior Air Army organisation proved decisive The Luftwaffe did eventually recover and mounted focused operations for control of limited areas of the Eastern Front but overall it had lost its dominance Packed with strategic diagrams and maps archive photos and artwork of aerial battles over Stalingrad and including bird's eye views of Operation Winter Storm and airlift operations and tactics this title clearly demonstrates how the Luftwaffe lost its strategic

initiative in the air      *World War II in Literature for Youth* Patricia Hachten Wee, Robert James Wee, 2004 This comprehensive volume provides a wealth of information with annotated listings of more than 3 500 titles a broad sampling of books on the war years 1939 1945 Includes both fiction and nonfiction works about all aspects of the war Professional resources for educators aligned to the educational standards for social studies technical references periodicals and electronic resources a directory of WWII museums memorials and other institutions and topics for exploration complement this excellent library and classroom resource      Warfare and Armed Conflicts Micheal Clodfelter, 2017-05-23 In its revised and updated fourth edition this exhaustive encyclopedia provides a record of casualties of war from the last five centuries through 2015 with new statistical and analytical information Figures include casualties from global terrorism the wars in Iraq and Afghanistan and the fight against the Islamic State New entries cover an additional 20 armed conflicts between 1492 and 2007 not included in previous editions Arranged roughly by century and subdivided by world region chronological entries include the name and dates of the conflict precursor events strategies and details the outcome and its aftermath      Air University Review , 1981-09      **Limiting Risk in America's Wars** Phillip S Meilinger, 2017-11-15 The United States has the most expensive and seemingly unstoppable military in the world Yet since World War II the nation's military success rate has been meager The Korean War was a draw while Vietnam Mogadishu Afghanistan and Iraq were clear losses Successes include Iraq in 1991 the Balkans Croatia and Kosovo Panama the initial takedowns of Afghanistan in 2001 and Iraq in 2003 and Libya What differentiates the failures from the successes Failures have been marked by the introduction of large numbers of conventional American ground troops while successes have been characterized by the use of airpower special operations forces robust intelligence and sensor platforms and the use of indigenous ground troops Phillip S Meilinger's new book advocates strategies that limit risks in war as well as achieve measurable goals Instead of large numbers of conventional ground troops the author argues in favor of a focus on asymmetric capabilities a combination of airpower special operation forces intelligence and indigenous ground troops to achieve the desired political outcomes      **Bf 109 Jabo Units in the West** Malcolm V. Lowe, 2023-05-25 Using specially commissioned artwork and detailing technical specifications this book explores the Bf 109's different roles occasioned by wartime necessity from its employment as a fighter to its evolution as a fighter bomber One of the principal types in the Luftwaffe's inventory at the beginning of World War II the piston engined Bf 109 was central to the many initial victories that the Germans achieved before coming up against the unbeatable RAF during the Battle of Britain Nevertheless by the second half of 1940 the Bf 109's operability was widened due to operational needs and it was flown as a fighter bomber for precision attacks in Southern England At first ad hoc conversions were made in the field to allow the aircraft to carry a bomb or extra fuel tank Such modifications were soon formalised by Messerschmitt which created the Jabo Bf 109s Drawing from pilots first hand accounts author Malcolm V Lowe explores the number of specialised units including Lehrgeschwader 2 and dedicated fighter bomber sections of standard

fighter units such as 10 Staffel of Jagdgeschwader 26 which flew this highly specialised fighter bomber Including technical specifications rare photographs and outstanding artwork this book explores the Jabo versions of the Bf 109E F and G both on the production line and with the addition of R stz field conversion kits      **Desert Armour** Robert Forczyk,2023-10-12 Robert Forczyk covers the development of armoured warfare in North Africa from Rommel s Gazala offensive in 1942 through to the end of war in the desert in Tunisia in 1943 The war in the North African desert was pure mechanized warfare and in many respects the most technologically advanced theatre of World War II It was also the only theatre where for three years British and Commonwealth and later US troops were in constant contact with Axis forces World War II best selling author Robert Forczyk explores the second half of the history of the campaign from the Gazala offensive in May 1942 that drove the British forces all the way back to the Egyptian frontier and led to the fall of Tobruk through the pivotal battles of El Alamein and the final Allied victory in Tunisia He examines the armoured forces equipment doctrine training logistics and operations employed by both Allied and Axis forces throughout the period focusing especially on the brigade and regimental level of operations Fully illustrated throughout with photographs profile artwork and maps and featuring tactical level vignettes and appendices analysing tank data tank deliveries in theatre and orders of battle this book goes back to the sources to provide a new study of armoured warfare in the desert      *Soviet Air Power* Kenneth Whiting,2020-01-29 This comprehensive examination of Soviet air power analyzes the three branches of the USSR Military Air Forces Frontal Aviation Long Range Aviation and Military Air Transport and Naval Aviation and the National Air Defense emphasizing World War II and postwar developments      Bf 109D/E Malcolm V. Lowe,2022-07-21 Using first hand accounts and brand new artwork this book brings to life the realities of flying the Bf 109 in combat during the very first battles of World War II The Bf 109 was one of the principal fighter aircraft types in the Luftwaffe s inventory during the opening months of World War II and it was central to many of Germany s early victories before coming up against the unbeatable RAF during the Battle of Britain This book presents first hand experiences of the pilots who flew the Bf 109E the aircraft which first featured a Daimler Benz DB 601 powerplant and which was in the front line in the skies over Poland the Low Countries and France and the older Bf 109D still in use in the Polish campaign The early variants of the Messerschmitt fighter the Bf 109E 1 Bf 109E 2 and Bf 109E 3 swept all before them during the opening wartime campaigns their successes only fading at the Battle of France when the Bf 109 s seasoned pilots encountered modern and well flown RAF and Arm e de l Air fighters In a rigorous and engaging new analysis Luftwaffe aviation expert Malcolm V Lowe examines and assesses the Bf 109 as a fighting machine from the perspective of the Luftwaffe at the forefront of the German blitzkrieg Contemporary photographs and specially commissioned artwork including a dramatic battlescene armament views technical diagrams and ribbon diagrams illustrating step by step each battle tactic of the main dogfights explored in the book bring the experiences of the Bf 109 pilots vividly to life      *Six Air Forces Over the Atlantic* Col. Joseph T. Molyson, Jr. (RET),2024-04-16 The Battle of the Atlantic was the longest campaign

of World War II lasting the entirety of the war in Europe from September 1939 to May 1945. It was also one of the war's most complex campaigns involving strategy, operations, tactics, logistics, politics, diplomacy, and alliances. During the war's first two years, the United States was drawn deeper into partnership with Great Britain and closer toward conflict with Germany in the waters of the North Atlantic. Franklin Roosevelt realized this theater's importance. I believe the outcome of this struggle is going to be decided in the Atlantic. And so American, British, and Canadian forces battled Germans at sea and in the air to protect the flow of first materiel and then men from the United States to the United Kingdom. The sea part has been well covered: how German U-boats and other warships hunted Allied convoys and how the Allies ultimately turned the tide. Not so much the air war. In *Six Air Forces over the Atlantic*, Joseph Molyson tells the story of the Battle of the Atlantic from the perspective of the air forces and airmen who waged it from the skies above the icy waters of the North Atlantic. He blends big picture attention to strategy and tactics with dramatic episodes of air-to-air and air-to-sea combat, including the engagement in which a British light bomber captured a German U-boat near Iceland. He details the close eye Franklin Roosevelt kept on the campaign, the effect B-24 Liberator bombers had, and the rise of the Royal Air Force Coastal Command as a true U-boat busting force. The result was victory in the Atlantic as well as a significant contribution to victory in World War II.
