Children's Literature and Transnational Knowledge in Modern China Shih-Wen Sue Chen, 2019-04-29

This book examines the development of Chinese children's literature from the late Qing to early Republican era

It highlights the transnational flows of knowledge texts and cultures during a time when children's literature in China and the West was developing rapidly

Drawing from a rich archive of periodicals novels tracts primers and textbooks the author analyzes how Chinese children's literature published by Protestant missionaries and Chinese educators in the late nineteenth and early twentieth centuries presented varying notions of childhood

In this period of dramatic transition from the dynastic Qing empire to the new Republican China young readers were offered different models of childhood some of which challenged dominant Confucian ideas of what it meant to be a child

This volume sheds new light on a little explored aspect of Chinese literary history

Through its contributions to the fields of children's literature book history missionary history and translation studies it enhances our understanding of the negotiations between Chinese and Western cultures that shaped the publication and reception of Chinese texts for children

[Parents and Virtues](#) Sonya Charles, 2019-03-11

Although individual parents face different issues Sonya Charles believes most parents want their children to be good people who are happy in their adult lives

Parents and Virtues An Analysis of Moral Development and Parental Virtue starts from the question of how parents can raise their child to be a moral and flourishing person

At first glance readers might think this question is better left to psychologists rather than philosophers

The author proposes that Aristotle's ethical theory known as virtue theory has much to say on this issue

Aristotle asks how we become moral people and how that relates to leading a good life

In other words his motivating

questions are very similar to the goals parents have for their children. The first part of this book details what the basic components of Aristotle's theory can tell us about the project of parenting. In the second part, the focus shifts to consider some issues that present potential moral dilemmas for parents and discuss whether there are specific virtues we may want to use to guide parental actions. *Parents and Virtues* will be of particular value to scholars and students who work on the ethics of parenthood, virtue theory, and bioethics.
