A Hand-Book for Travellers in Switzerland, and the Alps of Savoy and Piedmont. [By John Murray III.] Third edition, corrected and augmented John Murray (Firm),1846 **Calvin's Geneva** E. William Monter,2012-06-20 For over four hundred years the city of Geneva has been important in Western history The character of this city steady serious erudite clannish and proud has remained virtually unchanged since Calvin s time the heroic age when she first became famous Professor Monter relates the success story of this fascinating city through a fresh synthesis of printed and archival sources In the sixteenth century Geneva succeeded in winning and maintaining her independence a feat unique in Reformation Europe Into this special environment came Calvin and his triumph was the result of a brilliant mind and an undeviating will being placed in the midst of the crude and confused surroundings of a revolutionary commune Professor Monter explores the components of Geneva s and Calvin s fame in a number of ways First he outlines the history of the city from the early sixteenth century to Calvin s death in 1564 showing the tumultuous environment of the city where Calvin worked and the means by which local opposition to Calvin dissolved He next describes the principal institutions and social groups of Calvin s Geneva the established church the civil government and the foreign refugee communities Finally he assesses Calvin s legacy to Geneva and discusses the workings of Calvinism after its founder s death As a whole Calvin s Geneva is a revealing portrait of a major city and an acute analysis of its effect on one of the most important men in the sixteenth century **1er Symposium International de Réseau Écologique Paneuropéen** Pan-European Ecological Network,Council of Europe,2000-01-01 This symposium was held to further the development of the Pan European Ecological Network This network aims to achieve trans frontier co operation on the conservation of ecosystems habitats and species by protecting migratory corridors and stopovers **Bradshaw's continental [afterw.] monthly continental railway, steam navigation & conveyance guide. June 1847 - July/Oct. 1939** George Bradshaw,1859 *The School of Montaigne in Early Modern Europe* Warren Boutcher,2017-03-09 This major two volume study offers an interdisciplinary analysis of Montaigne s *Essais* and their fortunes in early modern Europe and the modern western university Volume one focuses on contexts from within Montaigne s own milieu and on the ways in which his book made him a patron author or instant classic in the eyes of his editor Marie de Gournay and his promoter Justus Lipsius Volume two focuses on the reader writers across Europe who used the *Essais* to make their own works from corrected editions and translations in print to life writing and personal records in manuscript The two volumes work together to offer a new picture of the book s significance in literary and intellectual history Montaigne s is now usually understood to be the school of late humanism or of Pyrrhonian scepticism This study argues that the school of Montaigne potentially included everyone in early modern Europe with occasion and means to read and write for themselves and for their friends and family unconstrained by an official function or scholastic institution For the *Essais* were shaped by a battle that had intensified since the Reformation and that would continue through

to the pre Enlightenment period It was a battle to regulate the educated individual s judgement in reading and acting upon the two books bequeathed by God to man The book of scriptures and the book of nature were becoming more accessible through print and manuscript cultures But at the same time that access was being mediated more intensively by teachers such as clerics and humanists by censors and institutions by learned authors of past and present and by commentaries and glosses upon those authors Montaigne enfranchised the unofficial reader writer with liberties of judgement offered and taken in the specific historical conditions of his era The study draws on new ways of approaching literary history through the history of the book and of reading The *Essais* are treated as a mobile transnational work that travelled from Bordeaux to Paris and beyond to markets in other countries from England and Switzerland to Italy and the Low Countries Close analysis of editions paratexts translations and annotated copies is informed by a distinct concept of the social context of a text The concept is derived from anthropologist Alfred Gell s notion of the art nexus the specific types of actions and agency relations mediated by works of art understood as indexes that give rise to inferences of particular kinds Throughout the two volumes the focus is on the particular nexus in which a copy an edition an extract is embedded and on the way that nexus might be described by early modern people
