A History of the Guards Armoured Formations

1941-1945 Charles Richard Trumppess, 2025-03-30 Although the Guards armored Division and its sister formation the 6th Guards Tank Brigade shared a common origin they went on to forge quite different operational records One of the units would be tarnished by its failures while the other was applauded for its successes A month after VE Day the two Guards armored formations would be reunited one last time before being officially disbanded During the intervening years the Guards faced criticism public ridicule the threat of disbandment and many other challenges Nevertheless these armored Guardsmen would prevail on the battlefield In response to the threat of a German invasion of the British Isles the Guards armored Division formed in the spring of 1941 But why convert battalions of Foot Guards considered by many to be first class infantry into an armored formation Certainly many people were skeptical that spit and polish Guardsmen could ever adapt to a new armored role As the threat of invasion receded the Guards armored Division and 6th Guards Tank Brigade embarked on years of training while the war raged elsewhere This book examines the decision to form the Guards armored Division and then keep it at home for an extended period Once deployed to Normandy the fighting quickly revealed shortcomings in the Division's training equipment and operational procedures In contrast when the Churchill tanks of the 6th Guards Tank Brigade went into action south of Caumont it was to prove an affirmation of everything they had learnt in training Over the next ten months the Guards armored formations would celebrate victories and lament failures while fighting their way across northwest Europe This book examines how the decision to raise a Guards armored Division came about and why the idea met with such strong opposition It also takes an in depth look at the training equipment and culture of the Brigade of Guards and how that influenced the two formations preparedness for war Once deployed overseas the book explores how the Guards were able to adapt to changing conditions on the battlefield and adopt new operational and tactical procedures Finally the book reveals why the Guards armored formations were hurriedly disbanded in June 1945 Additionally using new archive material the book discloses why it took over a decade to publish the official history of the Guards armored Division

American Tanks & AFVs of World War II Michael Green, 2014-07-20 A comprehensive highly illustrated study of US tanks and other armoured vehicles used in World War II The entry of the US into World War II provided the Allies with the industrial might to finally take the war to German and Japanese forces across the world Central to this was the focus of the American military industrial complex on the manufacture of tanks and armoured fighting vehicles Between 1939 and 1945 88 140 tanks and 18 620 other armored vehicles were built almost twice the number that Germany and Great Britain combined were able to supply In this lavishly illustrated volume armour expert Michael Green examines the dizzying array of machinery fielded by the US Army from the famed M4 Sherman M3 Stuart and M3 Lee through to the half tracks armored cars self propelled artillery tank destroyers armored recovery vehicles and tracked landing vehicles that provided the

armoured fist that the Allies needed to break Axis resistance in Europe and the Pacific Publishing in paperback for the first time and packed with historical and contemporary colour photography this encyclopedic new study details the design development and construction of these vehicles their deployment in battle and the impact that they had on the outcome of the war

The Three Battles of El Alamein Jon Diamond, 2023-01-05 The 80th Anniversary of the historic final Battle of El Alamein is the ideal time to study the events leading up to General Bernard Montgomery's famous victory over Field Marshal Rommel's Panzerarmee Africa in Autumn 1942 Four months earlier after the loss of Tobruk Rommel's forces were in the ascendancy Prime Minister Winston Churchill removed General Auchinleck from Command of Eighth Army and appointed Bernard Montgomery in his place After the successful defense of Alam El Halfa Ridge in late August and early September ended Rommel's inexorable advance Montgomery set in train plans for the set piece offensive campaign at El Alamein which took place between 23 October and 4 November 1942 The stakes could not have been higher Had Rommel broken through the Allied defenses in Summer 1942 or Montgomery's forces not overwhelmed the German and Italian armies at El Alamein Egypt and the Suez Canal would have fallen to the Nazis Instead the victory at El Alamein proved to be the turning point of the War against Hitler and led to the victory in North Africa

Nottingham's Military Legacy Gerry van Tonder,2020-01-31 Two years after landing on English soil in 1066 William of Normandy erected a strategic castle at Nottingham thereby creating an enduring military nexus through to the modern era On 22 August 1642 in his endeavours to quash Parliamentary insurrection in the Midlands King Charles raised his standard over Nottingham Castle a rallying call to all Royalists to support their monarch Loyalty to the Crown was however divided and before long Parliamentary forces garrisoned the castle Late in the eighteenth century a town troop of Yeomanry was raised in Nottingham the foundation of the future South Notts Yeomanry The yeomanry assisted regular troops by helping restore peace during the so called Bread Riots of 1795 at a time when many of the towns men had been committed to military duty during the French Revolutionary Wars Five troops of the towns yeomanry were again called up for

service during the civil unrest of the Luddite Riots of 1811¹⁸ This pattern of service continued over several decades Evolving into a regiment the yeomanry were repeatedly deployed against civil dissenters the Nottingham Riot and the Reform Bill and Chartist Riots After seeing combat during the Peninsula Wars in 1815 in the latter half of the 1800s the 59th 2nd Nottinghamshire Regiment of Foot formed part of a British invasion force into Afghanistan from India to curb Russian interventionism in this remote and desolate region The outbreak of war in distant South Africa in 1899 placed enormous strain on Britains military capability From Nottingham and other county towns regiments of yeomanry Hussars and Sherwood Rangers were dispatched to the hostile environment of the African veld Nottinghams sons then answered a call to arms in their thousands only to also perish in their thousands on the Godforsaken soils of France and Flanders during the holocaust that was the Great War Through the Second World War to the present Nottinghams military units underwent successive phases of metamorphosis from infantry to antiaircraft and searchlight formations followed by the relatively recent absorption into a regional entity the Mercian Regiment Today Nottinghams castle and surrounds bear the symbols of a rich and diverse military legacy symbols of remembrance of tribute and of a tableau of military pride from ancient times

Tanks of World War II Up Close Martin J. Dougherty, 2015-12-15 During World War II tanks and armored fighting vehicles evolved as their production increased Designs varied as they were equipped with larger guns turrets radios and other features for specialized tasks Readers will get a detailed view of the Whippet Tiger Maus and many other tanks with a particular focus on the specifications and armament attachments Each tank s role in the war is described alongside photographs of it in battle providing a look into military technology that will entrance military history buffs and reluctant readers

Logistics in World War II John Norris, 2020-04-30 John Norris shows how logistics though less glamorous than details of the fighting itself played a decisive role in the outcome of every campaign and battle of World War Two The author marshals some astounding facts and figures to convey the sheer scale of the task all belligerents faced to equip vast forces and supply them in the field He also draws on first hand accounts to illustrate what this meant for the men and women in the logistics chain and those depending on it at the sharp end Many of the vehicles from supply trucks to pack mules and other relevant hardware are discussed and illustrated with numerous photographs This first volume of two looks at the early years of the war so we see for example how Hitlers panzer divisions were kept rolling in the Blitzkrieg a German division in 1940 still had around 5000 horses requiring hundreds of tonnes of fodder and the British armys disastrous loss of equipment at Dunkirk This is a fascinating and valuable study of a neglected aspect of World War Two

History of Acquisition in the Department of Defense, Volume 1 Elliott V. Converse,2012-06-12 This volume is a history of the acquisition of major weapon systems by the United States armed forces from 1945 to 1960 the decade and a half that spanned the Truman and Eisenhower administrations following World War II These instruments of warfare aircraft armored vehicles artillery guided missiles naval vessels and supporting electronic systems when combined with nuclear warheads gave the postwar American military unprecedented deterrent and striking power 1 They were also enormously expensive The volume is organized chronologically with individual chapters addressing the roles of OSD the Army Navy and Air Force in two distinct periods The first roughly coinciding with President Truman s tenure covers the years from the end of World War II through the end of the Korean War in 1953 The second spans the two terms of the Eisenhower presidency from 1953 through early 1961 The year 1953 marked a natural breakpoint between the two periods The Korean War had ended President Eisenhower and his defense team began implementing the New Look a policy and strategy based on nuclear weapons which they believed would provide security and make it possible to reduce military spending The New Look s stress on nuclear weapons along with the deployment of the first operational guided missiles and the rapid advances subsequently made in nuclear and missile technology profoundly influenced acquisition in the services throughout the 1950s and the remainder of the century As used in this study the term acquisition encompasses the activities by which the United States obtains weapons and other equipment In surveying the history of acquisition between 1945 and 1960 this study discusses or refers in passing to many of the hundreds of weapon system programs initiated by the services in that period but it is not a weapons encyclopedia Instead it investigates a few major programs in depth in the belief that such detailed examination best reveals the evolution of acquisition policies organizations and processes and the various forces influencing weapons programs

Allied Tanks at El Alamein 1942 William E. Hiestand,2023-07-20 Examines Eighth Army s 1 000 strong tank force rebuilt reorganized and equipped with brand new Sherman and Churchill tanks that secured victory at the Second Battle of El Alamein When Eighth Army retired into the defensive line at El Alamein on 30 June 1942 it was tired dispirited and had lost almost all its tanks during a string of defeats at Gazala Tobruk and Mersa Matruh After savage defensive fighting at First Alamein the reinforced Desert Rats defeated Rommel s last offensive in a tank to tank clash at Alam Halfa in September The next month a completely rebuilt and reorganized Eighth Army equipped with over 1 000 tanks including the American M4 Sherman launched the offensive that would finally drive Rommel out of Africa Montgomery shaped the Eighth Army

according to his own military ideas and on 23 October was able to attack the Axis defenses with the largest force of armoured divisions in its history with the 1st 8th and 10th united in a new corps de chasse intended to defeat the Afrika Korps at its own game and the 7th and two infantry support tank brigades assigned to support the XXX and XIII Corps With the exception of the A9 10 and 13 cruisers of 1940 41 as the offensive began the Eighth Army contained every type of tank employed during the North Africa campaign Using detailed illustrations of the tanks involved with an analysis of the tactics employed for battle this is a focused examination of the tank forces that won the Second Battle of El Alamein the most famous British Army victory of World War II and one of the turning points of the war *Ages of American Capitalism* Jonathan

Levy, 2021-04-20 A leading economic historian traces the evolution of American capitalism from the colonial era to the present and argues that we've reached a turning point that will define the era ahead A monumental achievement sure to become a classic Zachary D Carter author of *The Price of Peace* In this ambitious single volume history of the United States economic historian Jonathan Levy reveals how capitalism in America has evolved through four distinct ages and how the country's economic evolution is inseparable from the nature of American life itself The Age of Commerce spans the colonial era through the outbreak of the Civil War and the Age of Capital traces the lasting impact of the industrial revolution The volatility of the Age of Capital ultimately led to the Great Depression which sparked the Age of Control during which the government took on a more active role in the economy and finally in the Age of Chaos deregulation and the growth of the finance industry created a booming economy for some but also striking inequalities and a lack of oversight that led directly to the crash of 2008 In *Ages of American Capitalism* Levy proves that capitalism in the United States has never been just one thing Instead it has morphed through the country's history and it's likely changing again right now A stunning accomplishment an indispensable guide to understanding American history and what's happening in today's economy Christian Science Monitor The best one volume history of American capitalism Sven Beckert author of *Empire of Cotton*

Destructive Creation Mark R. Wilson, 2016-07-06 During World War II the United States helped vanquish the Axis powers by converting its enormous economic capacities into military might Producing nearly two thirds of all the munitions used by Allied forces American industry became what President Franklin D Roosevelt called the arsenal of democracy Crucial in this effort were business leaders Some of these captains of industry went to Washington to coordinate the mobilization while others led their companies to churn out weapons In this way the private sector won the war or so the story goes Based on new research in business and military archives *Destructive Creation* shows that the enormous mobilization effort relied not only on the capacities of private companies but also on massive public investment and robust government regulation This public private partnership involved plenty of government business cooperation but it also generated antagonism in the American business community that had lasting repercussions for American politics Many business leaders still engaged in political battles against the New Deal regarded the wartime government as an overreaching regulator and a threatening rival

In response they mounted an aggressive campaign that touted the achievements of for profit firms while dismissing the value of public sector contributions This probusiness story about mobilization was a political success not just during the war but afterward as it shaped reconversion policy and the transformation of the American military industrial complex Offering a groundbreaking account of the inner workings of the arsenal of democracy Destructive Creation also suggests how the struggle to define its heroes and villains has continued to shape economic and political development to the present day
