**One with Christ** Ben Pugh, 2023-05-23 Paul's most common phrase was in Christ It is a tiny phrase used almost as frequently as punctuation yet within it is abbreviated a whole universe of delight which many of us have barely tasted For Paul being in Christ is so normal he never even explains what he means by it or what he means by Christ dwelling in us for that matter He is not exactly forthcoming about what exactly is involved in us having been crucified with or having died with been buried with raised with or seated with Christ either He just expects us to keep up What he does give us are a few little hints at what this union with Christ does We get glimpses into the amazing things it does for us In forty days we visit just about every time Paul uses a phrase like in Christ in him with Christ and so on meditating on each of the little hints that Paul provides We do this in the hope of discovering just how deep this union goes

Haacke,2021-03-11 From the invention of skyscrapers and airplanes to the development of the nuclear bomb ideas about the  
modern increasingly revolved around vertiginous images of elevation and decline and new technologies of mobility and terror  
from above In *The Vertical Imagination and the Crisis of Transatlantic Modernism* Paul Haacke examines this turn by  
focusing on discourses of aspiration catastrophe and power in major works of European and American literature as well as  
film architecture and intellectual and cultural history This wide ranging and pointed study begins with canonical fiction by  
Franz Kafka Virginia Woolf James Joyce and John Dos Passos as well as poetry by Guillaume Apollinaire Hart Crane and Aim  
C saire before moving to critical reflections on the rise of New York City by architects and writers from Le Corbusier to  
Simone de Beauvoir the films of Alfred Hitchcock and theories of cinematic space and time and postwar novels by Kurt  
Vonnegut Thomas Pynchon and Leslie Marmon Silko among many other examples In tracing the rise and fall of modernist  
discourse over the course of the long twentieth century this book shows how visions of vertical ascension turned from  
established ideas about nature the body and religion to growing anxieties about aesthetic distinction technological  
advancement and American capitalism and empire It argues that spectacles of height and flight became symbols and icons of  
ambition as well as direct indexes of power and thus that the vertical transformation of modernity was both material and  
imagined taking place at the same time through the rapidly expanding built environment and shifting ideological  
constructions of high and low      **Catalog of Copyright Entries** Library of Congress. Copyright Office,1919
