

## Introduction:

Legal Education hasn't undergone any fundamental change during the last 150 years. Except for the duration of the courses, and addition of some fundamental subjects, there has been minimal innovation in legal education scenario during all these years. Legal Education in India has remained mostly concentrated on developing legal professionals in a national context. Legal Education has more or less remained a theoretical study, with only minimal content of practical exposure. Experiential learning was given a back bench in actual practice, and many practical courses remain in paper rather than in content. National law school experiment in India which has to an extent revived the interest in legal education has remained elitist and out of reach for children from middle and lower income group.

Since the past few years the roles of lawyers have drastically changed in the society. In the changed scenario, the additional roles envisaged are that of policy planner, business advisor, negotiator among interest groups, expert in articulation and communication of ideas, mediator, lobbyist, law reformer, etc. These roles demand specialised knowledge and skills not ordinarily available in the existing profession. These roles have moved away from being localised and started moving beyond national boundaries. As a result a new genre of globalised legal professionals has evolved who while having a firm understanding of local legal scenario, was able to extend its principles to a global context.

## Current State of Indian Legal Education:

While a lot is currently being discussed about the state of legal education in India, with reports from National Knowledge Commission, Law Commission of India, Legal Education Committee of the Bar Council of India, University Grants Committee Special Committee on Legal Education, Expert Committee Appointed by Supreme Court and some state governments [5] it is necessary to draw a sketch of the existing legal education frame work in India.

Currently, law is being looked upon as a national subject. The content of law courses prescribed by the regulators is focused on the national laws rather than on the essential principles. As a result the vision of law students get often confined to national boundaries. On the other hand, the globalisation has made the distinction between various systems of law meaningless, and new avenues in international law, like international criminal law and International Space Law, has cut across national borders.

## The Origin of the Task Force

In 1987, at a conference "celebrat[ing] twenty years of effort and achievement since the Ford Foundation . . . set in motion the clinical education movement,"<sup>6</sup> Justice Rosalie Wahl of the Minnesota Supreme Court, the Chair of the ABA Section of Legal Education and Admissions to the Bar, asked those in attendance to "recommit themselves 'to certain basic principles,' including that of teaching students how to learn systematically from experience and simultaneously to educate them in a broader range of legal analysis and skills than have traditionally been taught."<sup>7</sup> She asked, "[h]ave we really tried to determine . . . what skills, what attitudes, what character traits, what qualities of mind are required of lawyers?"<sup>8</sup> In early 1989, Justice Wahl created the Task Force to answer these questions.<sup>9</sup> After collecting data, holding public hearings, and conducting extensive deliberations over a period of almost three years, the Task Force issued the Report in July 1992.
