 Machine Intelligence 13 K. Furukawa,D. Michie,S. Muggleton,1994-08-25 BL Leaders in the discipline discuss the latest developments in a fast moving field This book is the latest volume in a successful series the result of a fruitful collaboration between the Turing Institute and the Japan Society for Artificial Intelligence This volume stems from a workshop held in 1992 which not only witnessed the series enter its second quarter century but also a new phase in its development The pages of this book show that machine learning has emerged to declare itself as a seed bed of new theory as a practical took in engineering disciplines and as a material for new mental models in human sciences **Structure-Based Drug Design** P.W. Codding,2013-04-17 Structure Based Drug Design brings together scientists working on different aspects of the subject demonstrating the necessary collaboration and interdisciplinary approach to this complex area The focus is on X ray crystallographic and computational approaches The general aspects of these approaches are introduced in the first six articles The remaining articles provide examples of the application of X ray crystallography molecular modelling molecular dynamics QSAR database analysis and homology modelling The papers cover a wealth of interesting problems in the design of new and enhanced pharmaceuticals **Machine Intelligence 15** Koichi Furukawa,Kōichi Furukawa,Donald Michie,Stephen Muggleton,1999 Following on from previous volumes in the series Machine Intelligence 15 provides an overview of current areas of interest in artificial intelligence **Foundations of Rule Learning** Johannes Fürnkranz,Dragan Gamberger,Nada Lavrač,2012-11-06 Rules the clearest most explored and best understood form of knowledge representation are particularly important for data mining as they offer the best tradeoff between human and machine understandability This book presents the fundamentals of rule learning as investigated in classical machine learning and modern data mining It introduces a feature based view as a unifying framework for propositional and relational rule learning thus bridging the gap between attribute value learning and inductive logic programming and providing complete coverage of most important elements of rule learning The book can be used as a textbook for teaching machine learning as well as a comprehensive reference to research in the field of inductive rule learning As such it targets students researchers and developers of rule learning algorithms presenting the fundamental rule learning concepts in sufficient breadth and depth to enable the reader to understand develop and apply rule learning techniques to real world data **PRICAI 2000 Topics in Artificial Intelligence** Riichiro Mizoguchi,John Slaney,2007-12-07 PRICAI 2000 held in Melbourne Australia is the sixth Pacific Rim Interna tional Conference on Artificial Intelligence and is the successor to the five earlier PRICAIs held in Nagoya Japan Seoul Korea Beijing China Cairns Aus tralia and Singapore in the years 1990 1992 1994 1996 and 1998 respectively PRICAI is the leading conference in the Pacific Rim region for the presenta tion of research in Artificial Intelligence including its applications to problems of social and economic importance The objectives of PRICAI are To provide a forum for the introduction and discussion of new research results concepts and technologies To provide practising engineers with exposure

to and an evaluation of evolving research tools and practices To provide the research community with exposure to the problems of practical applications of AI and To encourage the exchange of AI technologies and experience within the Pacific Rim countries PRICAI 2000 is a memorial event in the sense that it is the last one in the 20 century It reflects what researchers in this region believe to be promising for their future AI research activities In fact some salient features can be seen in the papers accepted We have 12 papers on agents while PRICAI 96 and 98 had no more than two or three This suggests to us one of the directions in which AI research is going in the next century It is true that agent research provides us with a wide range of research subjects from basic ones to applications   Issues & Trends of Information Technology Management in Contemporary Organizations Information Resources Management Association. International Conference,2002-01-01 As the field of information technology continues to grow and expand it impacts more and more organizations worldwide The leaders within these organizations are challenged on a continuous basis to develop and implement programs that successfully apply information technology applications This is a collection of unique perspectives on the issues surrounding IT in organizations and the ways in which these issues are addressed This valuable book is a compilation of the latest research in the area of IT utilization and management   Symbolic and Quantitative Approaches to Reasoning and Uncertainty Anthony Hunter,Simon D. Parsons,2003-05-15 This book constitutes the refereed proceedings of the 1999 European Conference on Symbolic and Quantitative Approaches to Reasoning under Uncertainty ECSQARU 99 held in London UK in July 1999 The 35 revised full papers presented were carefully reviewed and selected for inclusion in the book by the program committee The volume covers theoretical as well as application oriented aspects of various formalisms for reasoning under uncertainty Among the issues addressed are default reasoning nonmonotonic reasoning fuzzy logic Bayesian theory probabilistic reasoning inductive learning rough knowledge discovery Dempster Shafer theory qualitative decision making belief functions and evidence theory   **Research and Development in Intelligent Systems XVI** Ann Macintosh,Frans Coenen,2012-12-06 This volume contains the refereed technical papers presented at ES99 the Nineteenth SGES International Conference on Knowledge Based Systems and Applied Artificial Intelligence held in Cambridge in December 1999 The papers in this volume present new and innovative developments in the field divided into sections on knowledge engineering knowledge discovery case based reasoning learning and knowledge representation and refinement This is the sixteenth volume in the Research and Development series The series is essential reading for those who wish to keep up to date with developments in this important field The Application Stream papers are published as a companion volume under the title Applications and Innovations in Intelligent Systems VII   *Transactions on Rough Sets II* James F. Peters,2004-12-03 The LNCS journal Transactions on Rough Sets is devoted to the entire spectrum of rough sets related issues starting from logical and mathematical foundations through all aspects of rough set theory and its applications such as data mining knowledge discovery and intelligent information processing to relations between rough sets and other

approaches to uncertainty vagueness and incompleteness such as fuzzy sets and theory of evidence This second volume of the Transactions on Rough Sets presents 17 thoroughly reviewed revised papers devoted to rough set theory fuzzy set theory these papers highlight important aspects of these theories their interrelation and application in various fields   Artificial Intelligence Research and Development M. Polit,T. Talbert,B. López,2006-10-11 Artificial Intelligence AI forms an essential branch of computer science The field covered by AI is multiform and gathers subjects as various as the engineering of knowledge the automatic treatment of the language the training to quote only some of them The history of AI knew various periods of evolution passing from periods of doubt at very fertile periods AI is now in its maturity and did not remain an isolated field of computer science but approached various fields like statistics data analysis linguistics and cognitive psychology or databases AI is focused on providing solutions to real life problems and is used now in routine in medicine economics military or strategy game This book focuses on subjects including Machine Learning Reasoning Neural Networks Computer Vision Planning and Robotics and Multiagent Systems All the papers collected in this volume would be of interest to any computer scientist or engineer interested in AI   **Artificial Intelligence Research and Development** Monique Polit,2006 The field covered by Artificial Intelligence AI is multiform and gathers subjects as various as the engineering of knowledge the automatic treatment of the language the training and the systems multiagents and more This book focuses on subjects including Machine Learning Reasoning Neural Networks Computer Vision and Multiagent Systems   *Brain, Vision, and Artificial Intelligence* Massimo De Gregorio,2005-10-11 This book constitutes the refereed proceedings of the First International Symposium on Brain Vision and Artificial Intelligence BVAI 2005 held in Naples Italy in October 2005 The 48 revised papers presented together with 6 invited lectures were carefully reviewed and selected from more than 80 submissions for inclusion in the book The papers are addressed to the following main topics and sub topics brain basics neuroanatomy and physiology development plasticity and learning synaptic neuronic and neural network modelling natural vision visual neurosciences mechanisms and model systems visual perception visual cognition artificial vision shape perception shape analysis and recognition shape understanding artificial inteligence hybrid intelligent systems agents and cognitive models   **Declarative Programming for Knowledge Management** Masanobu Umeda,Armin Wolf,Oskar Bartenstein,Ulrich Geske,Dietmar Seipel,Osamu Takata,2007-01-25 This book constitutes the thoroughly refereed post proceedings of the 16th International Conference on Applications of Declarative Programming and Knowledge Management INAP 2005 held in Fukuoka Japan in October 2005 The papers address all current aspects of declarative programming constraint processing and knowledge management as well as their use for distributed systems and the Web   Principles of Data Mining and Knowledge Discovery Tapio Elomaa,Heikki Mannila,Hannu Toivonen,2003-08-02 This book constitutes the refereed proceedings of the 6th European Conference on Principles of Data Mining and Knowledge Discovery PKDD 2002 held in Helsinki Finland in August 2002 The 39 revised full papers presented together with 4 invited contributions were

Information Extraction: A Multidisciplinary Approach to an Emerging Information Technology Maria T. Pazienza,2005-08-29 Information extraction IE is a new technology enabling relevant content to be extracted from textual information available electronically IE essentially builds on natural language processing and computational linguistics but it is also closely related to the well established area of information retrieval and involves learning In concert with other promising and emerging information engineering technologies like data mining intelligent data analysis and text summarization IE will play a crucial role for scientists and professionals as well as other end users who have to deal with vast amounts of information for example from the Internet As the first book solely devoted to IE it is of relevance to anybody interested in new and emerging trends in information processing technology **KI 2002: Advances in Artificial Intelligence** Matthias Jarke,Jana Koehler,Gerhard Lakemeyer,2003-08-02 This book constitutes the refereed proceedings of the 25th Annual German conference on Artificial Intelligence KI 2002 held in Aachen Germany in September 2002 The 20 revised full papers presented were carefully reviewed and selected from 58 submissions The book offers topical sections on natural language processing machine learning knowledge representation semantic web and AI neural networks logic programming theorem proving and model checking and vision and spatial reasoning Methodologies for Intelligent Systems Zbigniew Raâs,Maria Zemankova,1991-09-25 This volume contains the papers selected for presentation at the Sixth International Symposium on Methodol ogies for Intelligent Systems held in Charlotte North Carolina in October 1991 The symposium was hosted by UNC Charlotte and sponsored by IBM Charlotte ORNL CESAR and UNC Charlotte The papers discuss topics in the following major areas Approximate reasoning Expert systems Intelligent databases Knowledge representation Learning and adaptive systems Logic for artificial intelligence The goal of the symposium was to provide a platform for a useful exchange and cross fertilization of ideas between theoreticians and practitioners in these areas Proceedings of the 1993 Connectionist Models Summer School Michael C. Mozer,Paul Smolensky,David S.

Touretzky,Jeffrey L. Elman,Andreas S. Weigend,2014-03-05 The result of the 1993 Connectionist Models Summer School the papers in this volume exemplify the tremendous breadth and depth of research underway in the field of neural networks Although the slant of the summer school has always leaned toward cognitive science and artificial intelligence the diverse scientific backgrounds and research interests of accepted students and invited faculty reflect the broad spectrum of areas contributing to neural networks including artificial intelligence cognitive science computer science engineering mathematics neuroscience and physics Providing an accurate picture of the state of the art in this fast moving field the proceedings of this intense two week program of lectures workshops and informal discussions contains timely and high quality work by the best and the brightest in the neural networks field   Scientific Data Mining and Knowledge Discovery Mohamed Medhat Gaber,2009-09-19 Mohamed Medhat Gaber It is not my aim to surprise or shock you but the simplest way I can summarise is to say that there are now in the world machines that think that learn and that create Moreover their ability to do these things is going to increase rapidly until in a visible future the range of problems they can handle will be coextensive with the range to which the human mind has been applied by Herbert A Simon 1916 2001 1Overview This book suits both graduate students and researchers with a focus on discovering knowledge from scienti c data The use of computational power for data analysis and knowledge discovery in scienti c disciplines has found its roots with the re lution of high performance computing systems Computational science in physics chemistry and biology represents the rst step towards automation of data analysis tasks The rational behind the developmentof computationalscience in different eas was automating mathematical operations performed in those areas There was no attention paid to the scienti c discovery process Automated Scienti c Disc ery ASD 1 3 represents the second natural step ASD attempted to automate the process of theory discovery supported by studies in philosophy of science and cognitive sciences Although early research articles have shown great successes the area has not evolved due to many reasons The most important reason was the lack of interaction between scientists and the automating systems
