## **Moving Millions:**

**Moving Millions** F. Moavenzadeh, M.J. Markow, 2010-03-25 This book has been several years in the making. It has grown out of basic areas of inquiry begun under the auspices of the Alliance for Global Sustainability in the late 1990s and has culminated with a series of on-site collaborative studies conducted through AGS in cooperation with officials in Guangzhou, People's Republic of China (PRC) during the early 2000s. Many individuals have made important contributions to the ideas, findings, and results that have been compiled in this volume. The authors wish to recognize these significant contributions below. The Alliance for Global Sustainability is an international partnership among four of the leading scientific and technological universities worldwide: The Massachusetts Institute of Technology (MIT), AGS, The University of Tokyo (UT), The Swiss Federal Institute of Technology (ETH), and The Chalmers University of Technology. Created in 1997, the AGS today brings together hundreds of university scientists, engineers, and social scientists to address complex issues that lie at the intersection of environmental, economic, and social policy goals. Since its inception, the AGS has promoted and supported multidisciplinary research teams drawn from its partner institutions. Working on critical issues in sustainability across several fields encompassing energy and climate, mobility, urban systems, water, and agriculture, cleaner technologies, public policy, and communications, these teams have developed a significant body of new knowledge. Furthermore, a sponsored team has worked with engaged, farsighted leaders of global businesses and industries, governments, and non-governmental organizations (NGOs) to provide innovative but practical solutions to urgent environmental problems worldwide.

**Moving Millions** Jeffrey Kaye, 2010-04-01 On the same day that reporter Jeffrey Kaye visited the Tondo hospital in northwest Manila, members of an employees' association wearing hospital uniforms rallied in the outside courtyard demanding pay raises. The nurses at the hospital took home about 261 a month while in the United States nurses earn on average more than fifteen times that rate of pay. No wonder so many of them leave the Philippines. Between 2000 and 2007, nearly 78,000 qualified nurses left the Philippines to work abroad, but there's more to it than the pull of better wages. Each year the Philippine president hands out Bagong Bayani (modern-day heroes) awards to the country's outstanding and exemplary migrant workers. Migrant labor accounts for the Philippines' second largest source of export revenue after electronics, and they ship out nurses like another country might export textiles. In 2008, the Philippines was one of the top-ranking destination countries for remittances alongside India (45 billion), China (34.5 billion), and Mexico (26.2 billion). Nurses in the Philippines, farmers in Senegal, Dominican factory workers in rural Pennsylvania, even Indian software engineers working in California, all are pieces of a larger system. Kaye calls it coyote capitalism. Coyote capitalism is the idea practiced by many businesses and governments that people like other natural resources are supplies to be shifted around to meet demand. Workers are pushed out, pulled in, and put on the line without consideration of the consequences for economies, communities, or individuals. With a fresh take on a controversial topic, *Moving Millions* knocks down myth after myth about why immigrants come to America and what role they

play in the economy Challenges the view that immigrants themselves motivate immigration rather than the policies of businesses and governments in both rich and poor nations Finds surprising connections between globalization economic growth and the convoluted immigration debates taking place in America and other industrialized countries Jeffrey Kaye is a freelance journalist and special correspondent for the PBS NewsHour for whom he has reported since 1984 covering immigration housing health care urban politics and other issues What does it all add up to America s approach to importing workers looks from the outside like a patchwork of unnecessary laws and regulations but the machinery of immigration is actually part of a larger global system that satisfies the needs of businesses and governments often at the expense of workers in every nation Drawing on Jeffrey Kaye s travels to places including Mexico the U K the United Arab Emirates the Philippines Poland and Senegal this book a healthy alternative to the obsession with migrants legal status exposes the dark side of globalization and the complicity of businesses and governments to benefit from the migration of millions of workers

set In Part 1 of the book What Happened the author looks at how companies fought to mend the global economic fabric even as the virus ripped more holes in it Part 2 Living with Uncertainty views the crisis through a supply chain risk management lens derived from Yossi Sheffi's previous books This perspective shows how companies create corporate immune systems to quickly recognize and manage large scale disruptions The ongoing pandemic is creating a new normal in life work and education covered in Part 3 Adjustment Required Consumer fears about the contagion as well as government mandates require businesses in industries such as retail hospitality entertainment sports and education to create safe zones for workers and customers Many elements of the book especially in Part 4 Supply Chains for the Future show how the virus accelerated preexisting trends in technology adoption China was the epicenter of the pandemic it also was the first nation to be disrupted and recover Part 5 of the book Of Politics and Pandemics explains why reports that companies are abandoning China in favor of other offshore manufacturing centers do not reflect reality Fundamentally The New Ab Normal is about businesses trying to create a better future in a time of extreme uncertainty a point emphasized in Part 6 The Next Opportunities The outlook is not necessarily gloomy The advance of technology is accelerating a trend that can level the playing field between small and large companies Nimble small businesses are using a growing array of off the shelf cloud computing and mobile apps to deploy sophisticated technologies in their supply chains and customer interfaces The New Ab Normal Another new normal is working from home Remote working enables individuals to live anywhere and companies to recruit talent from anywhere Education especially higher education faces a major disruption and major opportunity that is likely to shake the high cost model of in person education in favor of online or hybrid education Regrettably the book recognizes one trend accentuated by Covid 19 the growing inequality and anticipates that the new normal will be more stratified
