Handbook of Technical Diagnostics Horst Czichos, 2013-01-11. This book presents concepts, methods, and techniques to examine symptoms of faults and failures of structures, systems, and components and to monitor functional performance and structural integrity. The book is organized in five parts. Part A introduces the scope and application of technical diagnostics and gives a comprehensive overview of the physics of failure. Part B presents all relevant methods and techniques for diagnostics and monitoring from stress-strain vibration analysis, nondestructive evaluation, thermography, and industrial radiology to computed tomography and subsurface microstructural analysis. Part C covers the principles and concepts of technical failure analysis, illustrates case studies, and outlines machinery diagnostics with an emphasis on tribological systems. Part D describes the application of structural health monitoring and performance control to plants and the technical infrastructure including buildings, bridges, pipelines, electric power stations, offshore wind structures, and railway systems. And finally, Part E is an excursion on diagnostics in arts and culture. The book integrates knowledge of basic sciences and engineering disciplines with contributions from research institutions, academe, and industry, written by internationally known experts from various parts of the world, including Europe, Canada, India, Japan, and USA.

Acoustic Emission Wojciech Sikorski, 2012-03-02. Acoustic emission (AE) is one of the most important non-destructive testing (NDT) methods for materials, constructions, and machines. Acoustic emission is defined as the transient elastic energy that is spontaneously released when materials undergo deformation, fracture, or both. This interdisciplinary book consists of 17 chapters which widely discuss the most important applications of the AE method as machinery and civil structures condition assessment, fatigue and fracture materials research, detection of material defects and deformations, diagnostics of cutting tools, and machine cutting process monitoring of stress and ageing in materials research, chemical reactions, and phase transitions research, and earthquake prediction.
