Nurse One Woman's Effort To Succeed:

From Spinster to Career Woman Arlene Young, 2019-05-30 The late Victorian period brought a radical change in cultural attitudes toward middle class women and work. Anxiety over the growing disproportion between women and men in the population combined with an awakening desire among young women for personal and financial freedom led progressive thinkers to advocate for increased employment opportunities. The major stumbling block was the persistent conviction that middle class women ladies could not work without relinquishing their social status. Through media reports, public lectures, and fictional portrayals of working women, *From Spinster to Career Woman* traces advocates' efforts to alter cultural perceptions of women, work, class, and the ideals of womanhood. Focusing on the archetypal figures of the hospital nurse and the typewriter, Arlene Young analyzes the strategies used to transform a job perceived as menial into a respected profession and to represent office work as progressive employment for educated women. This book goes beyond a standard examination of historical social and political realities, delving into the intense human elements of a cultural shift and the hopes and fears of young women seeking independence. Providing new insights into the Victorian period, *From Spinster to Career Woman* captures the voices of ordinary women caught up in the frustrations and excitements of a new era. *Disaffection And Diversity* Judith Calder, 2004-01-14 First Published in 1993. A quiet but profound revolution in the design and delivery of learning opportunities for adults and in the accreditation of learning outcomes is taking place. Higher education is expanding at a rate which exceeds even that of the Robbins era. Alternative routes for adults into further and higher education and into training are being introduced through the use of Access courses and through the recognition of competencies acquired in a whole variety of different ways. The structure of the courses and training which adults can now undertake, the methods of teaching those courses, and the types of qualifications which are beginning to be awarded reflect the accelerating social, technological, and economic changes in the UK. It is aimed at professionals who are engaged in the management, provision, or supervision of organized learning and training opportunities for adults. *An Officer and a Lady* Cynthia Toman, 2008 Examines nurses' experiences and their contribution toward winning the war during WWII through the salvage of sick and injured soldiers. From feminist and social history perspectives, this book explores how gender, war, and medical technology intersected to create legitimate feminine spaces within the masculine environment of the military. *Med-Surg Success* Kathryn Cadenhead Colgrove, 2016-08-15 Assure your mastery of medical surgical nursing knowledge while honing your critical thinking and test-taking skills. The 3rd Edition of this popular resource features over 2,300 questions, including 550 alternate format questions that reflect the latest advances in medical surgical nursing and the latest NCLEX-RN test plan. They organize the seemingly huge volume of information you must master into manageable sections divided by body systems and specific diseases. *Breast Cancer in Young Women* Nancy Klauber-DeMore, 2006 This publication gives a comprehensive overview of breast cancer in young women for all members of the healthcare team who treat women with

breast cancer Breast cancer requires multidisciplinary management and as such this book provides input from epidemiology basic science surgical oncology radiation oncology medical oncology plastic and reconstructive surgery genetics reproductive endocrinology psychology and nursing Because breast cancer in young women occurs during the reproductive years additional emphasis is placed on managing breast cancer in pregnant patients as well as reproductive options for breast cancer survivors The contributors to this volume comprise 30 experts from 6 academic institutions across 10 disciplines By presenting a clear and comprehensive review of all aspects of breast cancer treatment in young women the contributors hope to have provided a valuable resource to assist with patient care for all members of the multidisciplinary breast cancer team
