Nursing The Dying Patient:

The Dying Patient: a Nursing Perspective Mary H. Browning, Edith Patton Lewis, 1972 **Nursing Support for Families of Dying Patients** Rosemary McIntyre, 2001-11-28 When a patient has an advanced disease considerable demands are placed on the whole family Whilst coping with their own profound emotions close relatives commonly have to support their loved ones through a range of treatments as the disease progresses through stages of remission and recurrence until finally a shift to a palliative mode of treatment must be faced In such situations family roles and relationships are likely to be disrupted and family members coping resources can be stretched to the limit It is clear from this that by the time the terminal stage of the patient's illness is reached the family may have travelled a long and difficult road and close relatives are likely to be emotionally vulnerable and in need of support This study explores the needs of relatives of terminally ill patients and the concerns of nurses who provide care in the hospital The research data is used to design implement and evaluate clinical standards for improved family support Caring for the Dying Patient and the Family Janet Moscrop, Joy Robbins, 2013-11-11 This third edition of a popular textbook has been completely revised by the joint editors Janet Moscrop and Joy Robbins As in previous editions the focus is on the person dying at home in residential care or in hospital and the emphasis is on teamwork in caring for the individual and their relatives and friends Experts in all aspects of care have contributed to this complete revision of the previous text and each chapter is written by a different member of the multiprofessional team The chapter on the terminal care of people suffering from AIDS has been enlarged and consideration is also given to care of those in the terminal stages of other non malignant diseases Other new material includes chapters on complementary therapy the use of the day centre the value of volunteers diversional therapy and respite care The chapter on bereavement covers many aspects of grief and loss and there is a sensitive approach to the need for supporting staff in this specialized work Consideration is also given to the needs of dying and grieving people from differing ethnic backgrounds with varying cultural expectations in a pluralistic society The third edition offers a broad overview of the support given to the dying person and the carers by medical and nursing staff physiotherapists pharmacists social workers the chaplaincy and members of the pastoral care team Students of all these disciplines should find this book both readable and informative
