**Effect of Operational**

**Variables on Nitrogen Transformations in Duckweed Stabilization Ponds** Julia Rosa Caicedo Bejarano, 2005-03-24

There is an urgent need to develop and improve low cost technologies for wastewater treatment. Simultaneously treating wastewater and producing duckweed in a pond system is therefore an attractive solution contributing to both environmental protection and food production. Duckweed has excellent qualities: a high protein content, a high growth rate, and is an easy crop to handle. The small plant turns nitrogen from wastewater into a food source. This thesis reports on the effect of different operational variables like anaerobic pre treatment, the combination of algae and duckweed ponds, and pond depth. Improved nitrogen removal was obtained through the combination of duckweed ponds with algae ponds. Duckweed pond systems could be designed with shallow depth without affecting nitrogen removal efficiency. This research is the result of the cooperative effort between the EIDENAR Univalle Cali Colombia and the UNESCO IHE Institute for Water Education in Delft the Netherlands.

**Uneasy Endings** Renée Rose Shield, 2018-08-06 If we continue we grow old and this is how it could be for us, writes Renée Rose Shield in her candid and sympathetic account of life in one American nursing home. Drawing on anthropological methods and theory to illuminate institutional life, she probes the sources of the profound sense of unease she found at the place she calls The Franklin Nursing Home. For fourteen months, Shield participated in life at a nursing home in the northeastern United States. She got to know many of the people associated with the home: doctors, nurses, custodians, kitchen workers, administrators, social workers, visiting relatives, and above all, the residents who emerge in this book as the individuals they are. Sections in which the residents speak poignantly in their own voices are woven throughout her richly detailed observations of everyday routines and events. We see them using guile and humor to get by, struggling to approach the end of their lives with a measure of autonomy and dignity, and we meet an often conscientious and caring staff constrained by conflicting professional perspectives and by the bureaucratic structure in which they work. There are no villains here. Rather, Shield explains how conditions in the nursing home create a difficult and uncomfortable liminality, the transition from an accustomed role to a new one for the residents. In characterizing nursing home existence, she goes beyond Erving Goffman's classic definition of the total institution to show how residents pass from adulthood to death without the comfort of ritual or community support common in rites of passage. In addition to the isolation created by this solitary passage, she finds restrictions on reciprocity: the old people are always recipients whose need and obligation to repay are seen as unnecessary and difficult to satisfy. The system encourages their passivity, which deepens their dependency and helps to explain why they are often perceived as children. Offering concrete suggestions for improving the quality of nursing home life, *Uneasy Endings* will find a broad audience among those who work with the aged.
