THE PAINTINGS OF  
SUSAN SEDDON BOULET

During the 1980s, Susan Seddon Boulet (American, b. Brazil, 1943-1997) pursued her growing interest in the shamanic world, creating evocative works that fused the spirits of people and animals. The shaman, the oracle, the wise person, the healer—"the one who knows"—is in mythical communication with these spirits, controlling and manipulating nature through supernatural powers.

Inspired by her readings about shamanism and her personal shamanic journeys, Boulet used her spiritual visions to present, in exquisite detail, the creatures that inhabit the inner dimensions of the mind. Her artistic expression and understanding of shamanic practice may lead us to explore our own unconscious world. The twelve paintings within this calendar speak to the soul and the imagination. Each is accompanied by an excerpt from a Native American song, chant, poem, or narrative.

occasionally by their clients Intrigued by discord between simbang and their clients over fee negotiations Yun set out to learn the deep rooted legacy of condemning or trivializing the practitioners self interests from a neo Confucian governor s purge of shrines during the Chos n dynasty to the recent transformation of a community ritual into a practice recognized through UNESCO World Heritage status Drawing on a wealth of firsthand observations she shows how simbang distinguish ritual exchanges from more mundane instances of bartering purchasing bribing and gift giving and explains why ritual affairs are nonetheless inevitably thorny This original study illuminates the intertwining of religion and economy in shamanic practice on Cheju Island

**What Matters?** Courtney Bender,Ann Taves,2012-05-08 Over the past decade religious secular and spiritual distinctions have broken down forcing scholars to rethink secularity and its relationship to society Since classifying a person activity or experience as religious or otherwise is an important act of valuation one that defines the characteristics of a group and its relation to others scholars are struggling to recast these

concepts in our increasingly ambiguous pluralistic world This collection considers religious and secular categories and what they mean to those who seek valuable ethical lives As they investigate how individuals and groups determine significance set goals and attribute meaning contributors illustrate the ways in which religious secular and spiritual designations serve as markers of value Reflecting on recent ethnographic and historical research chapters explore contemporary psychical research and liberal American homeschooling the work of nineteenth and early twentieth century American psychologists and French archaeologists the role of contemporary humanitarian and volunteer organizations based in Europe and India and the prevalence of highly mediated and spiritualized publics from international psy trance festivals to Ghanaian national political contexts Contributors particularly focus on the role of ambivalence attachment and disaffection in the formation of religious secular and spiritual identities resetting research on secular society and contemporary religious life while illuminating what matters in the lives of ordinary individuals

*Maya Calendar Origins* Prudence M. Rice, 2009-02-17 In *Maya Political Science Time Astronomy and the Cosmos* Prudence M Rice proposed a new model of Maya political organization in which geopolitical seats of power rotated according to a 256 year calendar cycle known as the May This fundamental connection between timekeeping and Maya political organization sparked Rice s interest in the origins of the two major calendars used by the ancient lowland Maya one 260 days long and the other having 365 days In *Maya Calendar Origins* she presents a provocative new thesis about the origins and development of the calendrical system Integrating data from anthropology archaeology art history astronomy ethnohistory myth and linguistics Rice argues that the Maya calendars developed about a millennium earlier than commonly thought around 1200 BC as an outgrowth of

observations of the natural phenomena that scheduled the movements of late Archaic hunter gatherer collectors throughout what became Mesoamerica. She asserts that an understanding of the cycles of weather and celestial movements became the basis of power for early rulers who could thereby claim control over supernatural cosmic forces. Rice shows how time became materialized transformed into status objects such as monuments that encoded calendrical or temporal concerns as well as politicized becoming the foundation for societal order political legitimization and wealth. Rice's research also sheds new light on the origins of the Popol Vuh which Rice believes encodes the history of the development of the Mesoamerican calendars. She also explores the connections between the Maya and early Olmec and Izapan cultures in the Isthmian region who shared with the Maya the cosmovision and ideology incorporated into the calendrical systems.

*Cosmology, Calendars, and Horizon-Based Astronomy in Ancient Mesoamerica* Anne S. Dowd, Susan Milbrath, 2015-05-01

*Cosmology Calendars and Horizon Based Astronomy in Ancient Mesoamerica* is an interdisciplinary tour de force that establishes the critical role astronomy played in the religious and civic lives of the ancient peoples of Mesoamerica. Providing extraordinary examples of how Precolumbian peoples merged ideas about the cosmos with those concerning calendar and astronomy the volume showcases the value of detailed examinations of astronomical data for understanding ancient cultures. The volume is divided into three sections: investigations into Mesoamerican horizon based astronomy the cosmological principles expressed in Mesoamerican religious imagery and rituals related to astronomy and the aspects of Mesoamerican calendars related to archaeoastronomy. It also provides cutting edge research on diverse topics such as records of calendar and horizon based astronomical observation like the Dresden and Borgia codices iconography of burial assemblages architectural alignment studies urban planning and counting or measuring devices. Contributors who are among the most respected in their fields explore new dimensions in Mesoamerican timekeeping and skywatching in the Olmec Maya Teotihuacano Zapotec and Aztec cultures. It will be of great interest to students and scholars of anthropology archaeology art history and astronomy.

Fourteen papers with a geographical coverage from Scandinavia to the Iberian Peninsula examine a wide range of topics reflecting the many forms and expressions of Bronze Age imagery encompassing important themes including religion materiality mobility interaction power and gender. Contributors explore specific elements of rock art in some detail such as the representation of the human form images of manslaughter and gender identities. The relationship between rock art imagery and its location on the one hand and metalwork and networks of trade and exchange of both materials and ideas on the other are considered.
