Subordination and Defeat Leon Sloman, Paul Gilbert, 2000-03-01 Most people now accept that human beings are the product of millions of years of mammalian evolution and more recently primate evolution This landmark book explores the implications of our evolutionary history for theories and therapies of depression In particular the focus is on how social conflict has shaped various behavioral and psychophysiological systems Special attention is given to the evolved mechanisms for dealing with social defeat and subordination in both animals and humans By linking human depression to the activation of ancient psychobiological programs for dealing with social conflict one is able to understand the function of depression within groups family systems and between individuals and begin to distinguish depressions that may have adaptive functions from those that are the result of maladaptive feedback systems Although many acknowledge the need for an integrated biopsychosocial theory of psychopathology there continue to be great divisions among social psychological and biological approaches Sloman and Gilbert have brought together leading scientists and clinicians representing different disciplines and schools to present a provocative new evolutionary model of depression This model illuminates old problems in new ways links a common disabling condition to evolved mental mechanisms and points to potential new approaches to prevention and intervention The book will be of compelling interest to all those who study or treat mood disorders *Compassion-Based Approaches in Loss and Grief* Darcy L. questions about the valence of particular emotions and focussing on the features that make these emotions ambivalent how despite their negativity such emotions may turn out to be positive This opens up a perspective in which each emotion can be understood as a complex interlacing of negative and positive properties The collection presents a thoughtful dialogue between philosophy and contemporary scientific research It offers the reader insight by illuminating the dark side of the emotions
