Shape Modeling International 2010 ,2010 SMI 2005: 2005 International Conference on Shape Modeling and Applications (15-17 June 2005/Cambridge, MA. IEEE Computer Society Staff, 2005 **Vision, Modeling, and Visualization 2008** Oliver Deussen, 2008 Three-Dimensional Model Analysis and Processing Faxin Yu, Zheming Lu, Hao Luo, Pinghui Wang, 2011-02-03 With the increasing popularization of the Internet together with the rapid development of 3D scanning technologies and modeling tools 3D model databases have become more and more common in fields such as biology chemistry archaeology and geography People can distribute their own 3D works over the Internet search and download 3D model data and also carry out electronic trade over the Internet However some serious issues are related to this as follows 1 How to efficiently transmit and store huge 3D model data with limited bandwidth and storage capacity 2 How to prevent 3D

works from being pirated and tampered with 3 How to search for the desired 3D models in huge multimedia databases This book is devoted to partially solving the above issues Compression is useful because it helps reduce the consumption of expensive resources such as hard disk space and transmission bandwidth On the downside compressed data must be decompressed to be used and this extra processing may be detrimental to some applications 3D polygonal mesh with geometry color normal vector and texture coordinate information as a common surface representation is now heavily used in various multimedia applications such as computer games animations and simulation applications To maintain a convincing level of realism many applications require highly detailed mesh models However such complex models demand broad network bandwidth and much storage capacity to transmit and store To address these problems 3D mesh compression is essential for reducing the size of 3D model representation

Large-Scale Knowledge Resources. Construction and Application Takenobu Tokunaga, Antonio Ortega, 2008-02-08 At the start of the 21st century

we are now well on the way towards a knowledge intensive society in which knowledge plays ever more important roles Thus research interest should inevitably shift from information to knowledge with the problems of building organizing maintaining and utilizing knowledge coming central issues in a wide variety of fields The 21st Century COE program Framework for Systematization and Application of Large scale Knowledge sources COE LKR conducted by the Tokyo Institute of Technology is one of several early attempts worldwide to address these important issues Inspired by this project LKR2008 aimed at bringing together diverse contributions in cognitive science computer science education and linguistics to explore design construction extension maintenance validation and application of knowledge Responding to our call for papers we received 38 submissions from a variety of research areas Each paper was reviewed by three Program Committee members Since we were aiming at an interdisciplinary conference covering a wide range of topics concerning large scale knowledge resources LKR each paper was assigned a reviewer from a topic area outside the main thrust of the paper This reviewer was asked to assess whether the authors described the motivation and importance of their work in a comprehensible manner even for readers in other research areas Following a rigorous reviewing process we accepted 14 regular papers and 12 poster papers
