Shape Of To Come:

The Time Domain in Surface and Structural Dynamics G.J Long, F. Grandjean, 2012-12-06 About two years ago while studying the dynamic properties of Fe CO IJ we realized that there was virtually no single source of information on the structural dynamics of materials The time domain of different dynamic structural processes covers many orders of magnitude and may be investigated by numerous vastly different experimental techniques Indeed the subject seemed appropriate for a NATO Advanced Study Institute at which we could bring together chemists physicists metallurgists and bioscientists using the various techniques for the study of sundry time sensitive materials The actual Advanced Study Institute which met in II Ciocco Italy from 14 to 26 June 1987 was in fact a dynamic experience for those of us involved Now we have come to the final phase the communication of the results of this Advanced Study Institute to the general scientific community In so doing we hope to provide in one place a convenient source of information on dynamics at the surface and within a solid state material The beautiful mountainous setting of Tuscany and especially the idyllic surroundings of II Ciocco provided an ideal venue for the Advanced Study Institute Our field trip to Pisa linked our topic to the history of time measurement through a visit to the Pisa cathedral where presumably Galileo first conceived the isochronism of the simple pendulum and its use in time measurement

make higher education of use to the economy has resulted in extensive government bureaucracy and oppressive managerialist bureaucracy which is inefficient and expensive Neoliberalism has always had authoritarian aspects and these are now coming to bear on universities The state does not want critical and informed graduate citizens but a hollowed out public sphere defined by consumption willing servitude to the market and deference to state power Attempts to reshape universities with bureaucracy are now accompanied by a culture war attacking the production of critical knowledge The authors in this book explore these issues and the possibilities for resistance and progressive change
