Shaped Cedars and Cedar Shaping : a Guidebook to Identifying, Documenting, Appreciating and Learning from Culturally Modified Trees David Garrick, Western Canada Wilderness Committee, 1998 *Women of the Wall* Yuval Jobani, Nahshon Perez, 2017-06-01 In October of 2014 12 year old Sasha Lutt read from a tiny Torah scroll as a part of her bat mitzvah in the Women s section of the plaza at the Western Wall Judaism s holiest prayer site Surrounded by members of the multi denominational organization the Women of the Wall one of whom had smuggled the scroll into the plaza Sasha became the first woman to read from the Torah at the site For more than twenty five years the Women of the Wall have been waging a campaign to gain the Israeli government s permission to pray at the Western Wall Despite widespread media coverage this is the first comprehensive study of their struggle Yuval Jobani and Nahshon Perez offer an in depth analysis of the Women of the Wall s attempts to modify Jewish orthodox mainstream religious practice from within and invest it with a new egalitarian content They present a comprehensive survey of the numerous legal rulings about the case and consider the broader political and social significance of the Women of the Wall s activism In this way Jobani and Perez are able to address broader issues of religion state relations How should governments manage religious plurality within their borders How should governments respond to the requests of minorities that conflict with ostensibly mainstream interpretations of a given tradition How should governments manage disputed sacred sites and spaces located in the public sphere *Women of the Wall Navigating Religion in Sacred Sites* offers a critical new look at theories of religion state relations and a fresh examination of religious conflicts over sacred sites and public spaces **Earth Matters** Ciaran O Faircheallaigh, Saleem Ali, 2017-09-08 Indigenous peoples have historically gained little from large scale resource development on their traditional lands and have suffered from its negative impacts on their cultures economies and societies During recent decades indigenous groups and their allies have fought hard to change this situation in some cases by opposing development entirely in many others by seeking a fundamental change in the distribution of benefits and costs from resource exploitation In doing so they have utilised a range of approaches including efforts to win greater recognition of indigenous rights in international fora pressure for passage of national and state or provincial legislation recognising indigenous land rights and protecting indigenous culture litigation in national and international courts and direct political action aimed at governments and developers often in alliance with non governmental organisations NGOs At the same time and partly in response to these initiatives many of the corporations that undertake large scale resource exploitation have sought to address concerns regarding the impact of their activities on indigenous peoples by adopting what are generally referred to as corporate social responsibility CSR policies This book focuses on such corporate initiatives It does not treat them in isolation recognising that their adoption and impact is contextual and is related both to the wider social and political framework in which they occur and to the activities and initiatives of indigenous peoples It does not treat them uncritically recognising that they may in some cases consist of little more than exercises in public

relations However neither does it approach them cynically recognising the possibility that even if CSR policies and activities reflect hard headed business decisions and indeed perhaps particularly if they do so they can generate significant benefits for indigenous peoples if appropriate accountability mechanisms are in place In undertaking an in depth analysis of CSR and indigenous peoples in the extractive industries the book seeks to answer the following questions What is the nature and extent of CSR initiatives in the extractive industries and how should they be understood What motivates companies to pursue CSR policies and activities How do specific political social and legal contexts shape corporate behaviour What is the relationship between indigenous political action and CSR How and to what extent can corporations be held accountable for their policies and actions Can CSR help bring about a fundamental change in the distribution of benefits and costs from large scale resource exploitation and if so under what conditions can this occur Earth Matters gathers key experts from around the world who discuss corporate initiatives in Alaska Ecuador Australia Canada Peru Papua New Guinea Indonesia and Russia The book explores the great diversity that characterises initiatives and policies under the name of corporate social responsibility the highly contingent and contextual nature of corporate responses to indigenous demands and the complex and evolving nature of indigenous corporate relations It also reveals much about the conditions under which CSR can contribute to a redistribution of benefits and costs from large scale resource development Earth Matters will be essential reading for those working in and studying the extractive industry worldwide as well as those readers looking for a state of the art description of how CSR is functioning in perhaps its most difficult setting
