unprecedented depth      **100 Years of Radio in South Africa, Volume 1** Sisanda Nkoala, Gilbert Motsaathebe, 2023-12-27  
The book brings together media scholars and practitioners to deliberate on the role and influence of radio broadcasting in South Africa over the past 100 years. The publication will add to the existing body of knowledge on radio in this context by being among one of the few to consider radio broadcasting in South Africa. Essentially, the book will make a distinct contribution by providing the following: a historical account of the development of the sector; an in-depth look at some of the key people and institutions that have shaped the sector; and a critique of the medium's role in community building and culture making among others. While the book will provide relevant theoretical frameworks, it also aims to include the voices of media practitioners who can reflect on the importance of this medium from a more realistic perspective. Volume 1 focuses on South African radio stations and broadcasters in the past and present.      *South African Foreign Policy Review: Volume 1*, 2012      **Stakeholder Capitalism** Klaus Schwab, 2021-01-07  
Reimagining our global economy so it becomes more sustainable and prosperous for all. Our global economic system is broken. But we can replace the current picture of global upheaval, unsustainability, and uncertainty with one of an economy that works for all people and the planet. First, we must eliminate rising income inequality within societies where productivity and wage growth has slowed. Second, we must reduce the dampening effect of monopoly market power wielded by large corporations on innovation and productivity gains. And finally, the short-sighted exploitation of natural resources that is corroding the environment and affecting the lives of many for the worse must end. The debate over the causes of the broken economy: laissez-faire government, poorly managed globalization, the rise of technology in favor of the few, or yet another reason is wide open. Stakeholder Capitalism: A Global Economy that Works for Progress, People, and Planet argues convincingly that if we don't start with recognizing the true shape of our problems, our current system will continue to fail us. To help us see our challenges more clearly, Schwab, the Founder and Executive Chairman of the World Economic Forum, looks for the real causes of our system's shortcomings and for solutions in best practices from around the world in places as diverse as China, Denmark, Ethiopia, Germany, Indonesia, New Zealand, and Singapore. And in doing so, Schwab finds emerging examples of new ways of doing things that provide grounds for hope, including: Individual agency; how countries and policies can make a difference against large external forces; A clearly defined social contract; agreement on shared values and goals; allows government, business, and individuals to produce the most optimal outcomes; Planning for future generations; short-sighted presentism harms our shared future and that of those yet to be born. Better measures of economic success move beyond a myopic focus on GDP to more complete, human-scaled measures of societal flourishing. By accurately describing our real situation, Stakeholder Capitalism is able to pinpoint achievable ways to deal with our problems. Chapter by chapter, Professor Schwab shows us that there are ways for everyone at all levels of society to reshape the broken pieces of the global economy and country by country, company by company, and citizen by citizen, glue them back together in a way that benefits us all.      **The Foreign Commerce and**
