Shaping Of Urban Britain In The Nineteenth And Twentieth Centuries:

Cities and Plans Gordon Emanuel Cherry, 1988-01-01 An account of urban planning in Britain between 1830 and 1980 with emphasis on the increasing role of government The book describes the steps taken in public sector regulation of the urban environment from by laws to town planning and sets them in the context of societal change Urban Politics and Space in the Nineteenth and Twentieth Centuries Barry M. Doyle, 2009-10-02 This book addresses the increasing regionalisation of urban governance and politics in an era of industrialisation suburbanisation and welfare extension It provides an important reassessment of the role structure and activities of urban elites highlighting their vitality and their interdependence and demonstrating the increasing regionalisation of municipal politics as towns sought to promote themselves extend services and even expand physically onto a regional level Moreover it explores the discourses surrounding space in which gender class morality and community all feature prominently How urban space and its uses were defined and redefined became key political weapons across the regions of England in the nineteenth century and these chapters show how a range of sources maps poems songs paintings illustrated journalism social investigations historical texts were employed by contemporaries to shape the urban and its image often by placing it in a regional context or contributing to the creation of a regional image and identity This collection illustrates the continuing vitality of the study of urban politics and governance and presents a rare attempt to place English urban history in a regional context Barry Doyle has assembled an impressive team of experts on urban politics to examine not just party politics but the wider machinery of government the boards agencies and committees that shaped British towns and cities after 1830 Space and place were contested and negotiated and a distinctive sense of local identity emerged In so doing the collection challenges some of the generalisations about the governance of urban Britain and reminds us that despite a shrinking globe the local and regional are crucial to our everyday lives The book should be read by all interested in and especially those working for local government Professor Richard Rodger University of Edinburgh In *Urban Politics and Urban Space in the Nineteenth and Twentieth Centuries Regional Perspectives* Barry Doyle brings together nine original essays by both established and younger authors to explore three inter related themes in urban history politics space and region from the early to mid nineteenth century to the mid twentieth century The book is conveniently divided into three sections dealing with structures of politics politics institutions and urban management and governance discourses and space Each of the contributions to this volume promises to both enrich our knowledge of specific moments in British politico urban development through the study of discrete developments in time and space and to open up and extend the debate on the British variant of urban modernity Each examines the ways in which local power space and regional relations developed and changed between the early nineteenth and mid twentieth century Localities their politics and communal identities are never really far from a national context indeed they largely shaped it as these essays make clear Doyle is to be commended for his endeavour not just as the editor but in particular for

his introduction to the volume In a richly referenced essay that comes in at just over seven and half thousand words he casts a panoramic view over the field in the last few decades making connections where few contemporary urban historians care to tread Doyle gives us a forceful challenge to what he sees as a particularly English malaise in this period namely that of failing to recognise the potential of regional and local government to shape and manage the major reallocation of space and power a vital sphere of public life that is contemporary to our own times It is a masterly and well informed piece of writing that will set the standard for some years to come Professor Anthony McElligott University of Limerick Britain 1740 – 1950 Richard Lawton, Colin Pooley, 2021-12-02 Originally published in 1992 this book provides students with a well illustrated clearly written text which offers a coherent overview of Britain's development from a pre modern to a modern economy and society The key processes that have shaped the geography of modern Britain are rooted in the significant demographic economic technological and social transitions of the early eighteenth century the impact of which was not fully diffused through the nation until the mid 20th Century This country wide survey examines the nature of this transformation The material in the book is accessible because the book is clearly structured into 3 phases 1740 to the 1830s the 1830s to the 1890s and the 1890s to 1950 For each period the principal aspects of change in population industry the countryside and urban life are examined and regional examples given to support the analysis **The Cambridge Urban History of Britain** Peter

Clark, David Michael Palliser, Martin J. Daunton, 2000 The process of urbanisation and suburbanisation in Britain from the Victorian period to the twentieth century **The Greening of London, 1920-2000** Matti O. Hannikainen, 2017-05-15 The long term development of public green spaces such as parks public gardens and recreation grounds in London during the twentieth century is a curiously neglected subject despite the fact that various kinds of green spaces cover huge areas in cities in the UK today This book explores how and why public green spaces have been created and used in London and what actors have been involved in their evolution during the course of the twentieth century Building on case studies of the contemporary boroughs of Camden and Southwark and making use of a wealth of archival material the author takes us through the planning and creation stages to the intended and actual uses and ongoing management of the spaces By highlighting the rise and fall of municipal authorities and the impact of neo liberalism after the 1970s the book also deepens our understanding of how London has been governed planned and ruled during the twentieth century It makes a crucial contribution to academic as well as political discourse on the history and present role of green space in sustainable cities

Planning and Urban Change Stephen Victor Ward, 2004-03-08 Fully revised and thoroughly updated the Second Edition of Planning and Urban Change provides an accessible yet richly detailed account of British urban planning Stephen Ward demonstrates how urban planning can be understood through three categories ideas urban planning history as the development of theoretical approaches from radical and utopian beginnings to the new right thinking of the 1980s and recent interest in green thought and sustainability policies urban planning history as an intensely political process the text explains

the complicated relation between planning theory and political practice and impacts urban planning history as the divergence of expectation and outcome each chapter shows how intended impacts have been modified by economic and social forces This Second Edition features an entirely new chapter on the key policy changes that have occurred under the Major and Blair governments together with a critical review of current policy trends Towns, Plans and Society in Modern Britain Helen Meller,1997-08-07 In this concise survey Helen Meller aims to explore the interaction of the social and physical environment of cities All modern societies have experienced mass urbanisation and have been subject to the economic social and technological forces which have produced this urbanisation Yet all towns and cities are not the same The author points out that historical and cultural factors have played and are still playing an important part in shaping responses to these forces This becomes even more clearly evident when the urban environment becomes subject to planning Urban regeneration has facilitated not just an improvement in the physical environment of cities but in their economic and social fortunes as well This study is an accessible analysis of the way in which social cultural and physical factors have created the quality of life in British cities over the past two centuries Urban Geography Michael Pacione,2001 This text is an introduction to the study of towns and cities The book synthesizes a wealth of material to provide a comprehensive introduction for students of urban geography drawing on a rich blend of theoretical and empirical information to advance their knowledge of the city For the first time in the history of humankind urban dwellers outnumber rural residents and this trend is destined to continue Urban places towns and cities are of fundamental importance for the distribution of population within countries in the organization of economic production distribution and exchange in the structuring of social reproduction and cultural life and in the allocation and exercise of power Even those living beyond the administrative or functional boundaries of a town or city will have their lifestyle influenced to some degree by a nearby or distant city **Law and Society in England 1750-1950** William Cornish,Stephen Banks,Charles Mitchell,Paul Mitchell,Rebecca Probert,2019-10-31 Law and Society in England 1750 1950 is an indispensable text for those wishing to study English legal history and to understand the foundations of the modern British state In this new updated edition the authors explore the complex relationship between legal and social change They consider the ways in which those in power themselves imagined and initiated reform and the ways in which they were obliged to respond to demands for change from outside the legal and political classes What emerges is a lively and critical account of the evolution of modern rights and expectations and an engaging study of the formation of contemporary social administrative and legal institutions and ideas and the road that was travelled to create them The book is divided into eight chapters Institutions and Ideas Land Commerce and Industry Labour Relations The Family Poverty and Education Accidents and Crime This extensively referenced analysis of modern social and legal history will be invaluable to students and teachers of English law political science and social history **Handbook of Urban Studies** Ronan Paddison,2001 The Handbook of Urban Studies provides the first comprehensive up to date account of the urban condition relevant to a wide

readership from academics to researchers and policymakers It provides a theoretically and empirically informed account embracing all the different disciplines contributing to urban studies Leading authors identify key issues and questions and future trends for further research and present their findings so that where appropriate they are relevant to the needs of policymakers Using the city as a unifying structure the Handbook provides an holistic appreciation of urban structure and change and of the theories by which we understand the structure development and changing character of cities

Introducing Urban Design Clara Greed, Marion Roberts, 2014-10-14 *Introducing Urban Design Interventions and Responses* is a new departure in the town planning series under the editorship of Clara Greed The dynamic new subject and profession of urban design straddles the fields of town planning architecture landscape architecture and transport planning This book recognises that a key feature of modern urban design practice is the ability to integrate a concern with the visual and aesthetic aspects of urban form with a strong social awareness of the need of user groups plus a sensitivity to wider environmental and sustainability issues In this it continues the themes already introduced in earlier volumes such as the changing nature of the profession social problems and the means of implementing policy Written by a team of eminent urban designers architects and planners under the joint editorship of Clara Greed and Marion Roberts the book introduces the reader to the subject through a discussion of current issues approaches and user responses *Introducing Urban Design Interventions and Responses* is an ideal resource for undergraduate courses in town planning architecture landscape architecture estate management and housing studies It is also suitable as an introductory text for first year diploma and masters programmes in urban design and suitable for RTPI RICS CIOH CIOB ASI ISVA and RIBA courses and will be of interest to professional practitioners in the urban design field

Dublin Slums, 1800-1925 Jacinta Prunty, 1998 Based on source materials ranging from public inquiries and property valuations to the records created by women charity workers such as Margaret Aylward the slum geography of the city is meticulously recreated in this thoroughly original book The overlapping areas of contagious disease slum housing and the support of the very poorest the beggars and costermongers who daily thronged the city streets form the three main areas of analysis These issues are explored on scales ranging from city wide to the local street or court while the final case study examines the dynamic nature of slum creation and efforts at relief and reform in the particular context of the north city parishes of St Mary's and St Michan's

Planning London for the Post-War Era 1945-1960 Emmanuel V. Marmaras, 2014-09-16 This book deals with the formation of the post Second World War reconstruction and planning machinery in Great Britain the re planning efforts undertaken in post war London and in particular the redevelopment programme regarding its central area in the form of the comprehensive development projects Originating from a PhD Thesis the book recreates the atmosphere following step by step arguments and events at various political socio economic and technical levels It also contributes to the understanding of succeeding developments in terms of planning theory and practice The book is structured into three parts The first one explores the administrative and statutory

developments in town planning matters during the period 1940-59. The second part deals with the plans proposed for London as a whole from independent and official organisations mainly during the 1940s. Finally the third part examines the proposed projects for the rebuilding of the City of London and for special areas of Central London that suffered from bombing on both sides of the Thames.

Town and Country Planning in the UK Barry Cullingworth, Vincent Nadin, 2006-10-16. This revised fourteenth edition reinforces this title's reputation as the bible of British planning. It provides a thorough explanation of planning processes including the institutions involved, tools, systems, policies and changes to land use.

Green Wedge Urbanism Fabiano Lemes de Oliveira, 2017-02-23. As towns and cities worldwide deal with fast increasing land pressures while also trying to promote more sustainable, connected communities, the creation of green spaces within urban areas is receiving greater attention than ever before. At the same time, the value of the green belt as the most prominent model of green space planning is being widely questioned and an array of alternative models are being proposed. This book explores one of those alternative models, the green wedge, showing how this offers a successful model for integrating urban development and nature in existing and new towns and cities around the world. Green wedges considered here as ducts of green space running from the countryside into the centre of a city or town are not only making a comeback in urban planning but they have a deeper history in the twentieth century than many expect, a history that provides valuable insight and lessons in the employment of networked green spaces in city design and regional planning today. Part history and part contemporary argument, this book first examines the emergence and global diffusion of the green wedge in town planning in the late 19th and early 20th centuries, placing it in the broader historic context of debates and ideas for urban planning with nature, before going on to explore its use in contemporary urban practice. Examining their relation to green infrastructures, landscape ecology and landscape urbanism and their potential for sustainable cities, it highlights the continued relevance of a historic idea in an era of rapid climate change.
