**Shaping Political Attitudes** Silvo Lenart, 1994-07-19 In recent years research in the area of public opinion has focused most of its attention on the effects of the media Television in particular has been the object of attention as a primary influencing agent Shaping Political Attitudes argues that media effects are only half the equation when it comes to forming public opinions In a model of total information flow author Silvo Lenart shows that mass media cannot be seen as the exclusive source of political information and that the media must share the political information environment with interpersonal communication This volume bridges the gap between media and interpersonal communication and examines their combined effect on political attitudes and cognition Students and professionals in political science communication media studies sociology and psychology will find this volume an invaluable resource

**The Oxford Handbook of Political Communication** Kate Kenski, Kathleen Hall Jamieson, 2017-06-23 Since its development shaped by the turmoil of the World Wars and suspicion of new technologies such as film and radio political communication has become a hybrid field largely devoted to connecting the dots among political rhetoric politicians and leaders voters opinions and media exposure to better understand how any one aspect can affect the others In The Oxford Handbook of Political Communication Kate Kenski and Kathleen Hall Jamieson bring together leading scholars including founders of the field of political communication Elihu Katz Jay Blumler Doris Graber Max McCombs and Thomas Paterson to review the major findings about subjects ranging from the effects of political advertising and debates and understandings and misunderstandings of agenda setting framing and cultivation to the changing contours of social media use in politics and the functions of the press in a democratic system The essays in this volume reveal that political communication is a hybrid field with complex ancestry permeable boundaries and interests that overlap with those of related fields such as political sociology public opinion rhetoric neuroscience and the new hybrid on the quad media psychology This comprehensive review of the political communication literature is an indispensable reference for scholars and students interested in the study of how why when and with what effect humans make sense of symbolic exchanges about sharing and shared power The sixty two chapters in The Oxford Handbook of Political Communication contain an overview of past scholarship while providing critical reflection of its relevance in a changing media landscape and offering agendas for future research and innovation

On the Interactions of News Media, Interpersonal Communication, Opinion Formation, and Participation Joohoan Kim, 1997-12 Deliberative democracy can be defined as a political system based on citizens voluntary and free discussions on public issues Most scholars have discussed deliberative democracy within normative boundaries However based primarily on Katz s interpretation of Tarde this study finds the concept of public sphere a useful framework for operationalizing the normative concept of deliberative democracy since the four components of the public sphere news media use interpersonal communication opinion formation and political participation provide us with empirically testable categories This study tests the validity of theories of deliberative

democracy through examining the inter relationships among the four components of the public sphere Methodologically it includes a set of 63 items to probe where people talk and what they talk about in their daily life An experimental treatment a stop and talk question is also included in the survey to simulate the effects of real conversation Through a set of data gathered from a nationwide survey sufficient evidence was found to support the basic hypotheses 1 news media use encourages people to have political conversation 2 news media use and political conversation tend to enhance the quality of opinions measured by consistency opinionation and consideredness 3 news media use political conversation and enhanced opinions encourage political participation The significance of this study is that 1 unlike other media effects studies its dependent variables are not just of opinion positions or attitude changes but also opinion quality 2 it does not consider media alone but deals with the combined effects of interpersonal communication conversation and mass media news media use 3 it combines an experimental design with a nationwide survey and 4 it assumes that the effects of mass media do not stop at people s attitudes but are extended to their activities
