Shaping Your Child's Sexual Identity George Alan Rekers, 1982 *Fit to Teach* Jackie M. Blount, 2006-07-03

Examines the construction of gender in public school employment *Self Definition* Teodros Kiros, 2019-10-10

Self Definition argues that sex gender and race are constructions by the ineffable self as it seeks to define its possibilities free of domination The self's embodiments are themselves performances of self definition Teodros Kiros supports his argument by a careful reading of the literature from both the Global South and Global North that spans figures works and eras from antiquity to our late modern present These readings demonstrate that race gender and sex are performed in the Global South radically differently from in the Global North These three notions as markers of identity are fluid open and expansive and Kiros brilliantly shows this through inquiry into thought rooted in Egypt Ethiopia India and China By the time that the Global North forges possibilities of the self in the modern period race gender and sex become fixed Biology and anatomy become understood as destinies and the possibilities of the self are deeply constrained This book approaches case studies of key figures and movements chronologically and thematically and in doing so Kiros highlights the tensions between the openness of the Global South and the rigidity of the Global North through which human possibilities as exercises of self definition become clear under conditions of freedom Our views of self definition will forever be transformed after reading this important text

Family Bonds Ellen K. Feder, 2007-08-06 Feminist and critical race theorists alike have long acknowledged the intersection of gender and race difference it is by now a truism that the ways we become boys and girls men and women cannot be disentangled from the ways we become white or Black men and women Asian or Latino boys and girls And yet even as many have sought to attend to this intersection of difference most critical treatments focus finally either on the production of gender or the production of race Family Bonds proposes a new way to think about the categories of gender and race together It first explicates and then puts to work Foucault's archaeological and genealogical methods to advance the main argument of the book Gender is best understood primarily as a function of disciplinary power operating within the family while race is primarily a function of a regulatory power acting upon the family Each of the book's central chapters is an individual story or history the founding of Levittown the definitive suburb

after the Second World War 1950s and 60s the development of the diagnosis of Gender Identity Disorder 1970s and 1980s and the federal coordination of scientific research on violence 1980s and 1990s Together they make up a larger story about the construction of race and gender in the U S in the second half of the twentieth century and demonstrate the centrality of the family in these constructions Rather than a formal study of Foucault's own work *Family Bonds* is an effort to produce genealogies of the sort that Foucault himself hoped his work would prompt

Biblical Counsel, 1993 *Sissies and Tomboys* Matthew Rottnek, 1999-05 In 1973 homosexuality was officially depathologized with a revision in the Diagnostic and Statistical Manual of Psychiatry In 1980 a new diagnosis appeared Gender Identity Disorder of Childhood GID The shift separated gender from sexuality while it simultaneously reinforced traditional concepts of male and female and made it possible for cross gendered behavior and or identification to be deemed psychiatric illness What is the difference then between a child being called a sissy on the playground and being labeled with a disorder in a psychiatric hospital Combining theory and personal narrative this volume interrogates the meaning of the normal that pervades the literature on GID and investigates the theoretical underpinnings of the diagnosis *Sissies and Tomboys* considers how the stigma of illness influences a child's development and what homosexual childhood freed from the constraints of conventionally acceptable gender expression might look like

Authoring Autism M. Remi Yergeau, 2018-01-05 In *Authoring Autism* M. Remi Yergeau defines neurodivergence as an identity neuroqueerness rather than an impairment Using a queer theory framework Yergeau notes the stereotypes that deny autistic people their humanity and the chance to define themselves while also challenging cognitive studies scholarship and its reification of the neurological passivity of autistics They also critique early intensive behavioral interventions which have much in common with gay conversion therapy and questions the ableist privileging of intentionality and diplomacy in rhetorical traditions Using storying as their method they present an alternative view of autistic rhetoricity by foregrounding the cunning rhetorical abilities of autistics and by framing autism as a narrative condition wherein autistics are the best equipped people to define their experience Contending that autism represents a queer way of being that simultaneously embraces and rejects the rhetorical Yergeau shows how autistic people queer the lines of rhetoric humanity and agency In so doing they demonstrate how an autistic rhetoric requires the reconceptualization of rhetoric's very essence *Gender Identity Disorder and Psychosexual Problems in Children and Adolescents* Kenneth J.
