Managing Water Conflict Ashok Swain,2004-06-01 Countries are meeting increasing water demand by building reservoirs and by diverting water from one area to another When the water belongs to an international river system these measures lead to riparian conflicts However water scarcity not only brings conflict to these regions but also plays its part in building cooperation In several international river basins in Asia Africa and the Middle East competing and disputing riparian countries are now moving towards a co operative sharing arrangement The signs of agreements on water sharing may be easy but the real problem is how to keep these arrangements on track Such agreements can positively contribute to peace and cooperation by addressing future needs making sustainable decisions and being progressive in their management

Water for Life James L. Wescoat, Jr, Gilbert F. White, 2003-10-16 Successful water management is crucial for the proper operation of natural environmental systems and for the support of human society These two aspects are interdependent but decisions about one are often made without regard to effects upon the other A persistent challenge is to consider them together This book fully analyzes the relationship between water management environmental conditions and public policy It combines a careful review of the character and evolution of water management and evaluates management from the standpoint of the quality of the natural environment Topics covered include domestic and industrial water supply and waste disposal groundwater use river channel and floodplain management and integrated river basins The processes of social decision making are examined against a backdrop of plant soil water ecosystem relationships and ecosystem change Examples are drawn from around the world from local watershed management to international river basin planning with emphasis on integrative approaches **India Bangladesh Domestic Politics** Punam Pandey, 2016-11-26 This book deals with how the governments of India and Bangladesh manage the Ganges River On the basis of the Ganges issue it explains India's involvement in the domestic politics of Bangladesh and how this involvement in turn shapes Ganges river politics The book further analyses the constant friction between Indian preferences for bilateral negotiation in comparison to Bangladesh's demand for multilateral cooperation on the Ganges This also highlights the role of civil society tracing how organisations have engaged in and explored potential compromises acceptable to both countries As the term of the treaty comes to an end in 2026 the present work underlines its limitations as the impacts of climate change will involve far more than distress on water In closing it discusses a range of other challenges including the erosion of the Indian central government's monopoly in foreign policy especially in relation to its neighbours Through extensive fieldwork in India and Bangladesh together with interviews with politicians diplomats and all those closely associated with the Ganges deliberations the book reveals subtle aspects of the negotiations What emerges as a distinctive feature of Indo Bangladesh interactions on the Ganges is the fact that successful outcomes depend on the extent to which the ruling political powers in both countries accommodate one other's domestic political dynamics This insight enriches scholarship on the Ganges River addressing an aspect largely overlooked in the literature Offering an up to the minute analysis the book examines the implementation of the Ganges Treaty through 2015 making it of interest to researchers focusing on South Asia and international relations scholars on and practitioners of

Bajpai, Siddharth Mallavarapu, 2005 The Companion Volume To International Relations In India Bringing Theory Back Home Deals With The Interplay Between Identities And Foreign Policy Borders And Notions Of Territoriality And Critical Geopolitics The Book Also Makes Room For New Interpretations Of Conventional Areas Of International Relations Such As Power And Violence Thereby Creating The Conditions For A Sustained And Serious Theoretical Conversation Of The Discipline In India Of Particular Relevance Are Contributions In The Field Of International Political Economy An Area Of Traditional Neglect In The South Asian Setting **Water** Brahma Chellaney, 2013-07-25 This is a pioneering study about the relationship between fresh water peace and security in Asia from the Middle East to Siberia but with a special focus on South and Southeast Asia Asia is home to many of the world's great rivers and lakes but its huge population and booming economies make it the most water scarce continent on a per capita basis Over extensive irrigation pollution and global warming add to the demographic and economic pressures on Asia's fresh water supplies The location of the sources for much of South and Southeast Asia's fresh water is in the Chinese controlled Tibetan Plateau and China's increasing exploitation of these water sources have created growing geopolitical tensions that could boil over into conflict India is reliant on fresh water from Tibet which gives the Chinese uncomfortable leverage over India and further exacerbates their unsettled border disputes Vietnam Bangladesh Pakistan and other countries of the region also find themselves in similarly vulnerable positions where water is scarce and the sources are increasingly being exploited and polluted upstream by the continent's most powerful country Brahma Chellaney proposes strategies to avoid conflict and more equitably share and preserve Asia's water resources **The Politics of Dialogue** Ranabir Samaddar, 2017-07-05 Offering a detailed analysis of post colonial South Asia The Politics of Dialogue discusses the creation and impact of borders and the pervasive tension between the new nations Neither all out war nor complete peace this fragile condition makes political leaders and strategists feel claustrophobic a war produces an end result but peace allows the rulers to carry out their policies for governing along their preferred path of development The book shows how cartographic communal and political lines are not only dividing countries but that they are being replicated within countries creating new visible and invisible internal frontiers It argues that in a situation where geopolitics constrains democracy the political class becomes incapable of coping with the tension between the inside outside eg democracy appears as an internal problem and geopolitics appears as a problem related to the outside The Ganga Pranab Kumar Parua, 2010-01-12 From time immemorial the Bengal Delta had been an important maritime destination for traders from all parts of the world The actual location of the port of call varied from time to time in line with the natural hydrographic changes From the early decades of the second millennium AD traders from the European continent also joined the traders from the Arab countries who had been the Forerunners in maritime trading with India Daring traders and fortune seekers from Denmark Holland Belgium and England arrived at different ports of call along
