Shark Attack:

Shark Attacks of New York Patricia Heyer, Robert Heyer, 2021-08-02 New York's crowded beaches can come to halt with the shout of a single word shark. The shores of Long Island and Staten Island and the waters surrounding Manhattan have had more than thirty shark attacks recorded since the days of New Amsterdam. Legend has it that Antony Van Corlear, Peter Stuyvesant's trusted deputy, was killed by a shark crossing Spuyten Duyvil Creek while blowing his famed trumpet. In the summer of 1916, after a series of bloody encounters along the Jersey Shore, sharks terrorized beachgoers of Sheepshead Bay, frightening the entire region. Two incidents on Fire Island in 2018, within mere hours and miles of each other, involved a twelve-year-old and a thirteen-year-old, striking fear in the hearts of parents. Authors Patricia and Robert Heyer chart the history of New York's shark attacks.

Shark Attacks of the Jersey Shore: A History Patricia & Robert Heyer, 2020 Every summer, thousands flock to the Jersey Shore for its beaches and boardwalks, but lurking in the depths beyond is a historic threat to tranquility. Dozens of shark attacks and interactions have occurred throughout Jersey Shore history that reveal bravery, heartbreak, and the hubris of man. A boy paid a gruesome price for teasing a trapped shark in the first recorded attack in 1842. The three bloody attacks of 1960 left one man's limb amputated. The horrific summer of 1916 included seven attacks in a two-week span and crafted the caricature of the killer shark that remains in popular culture today. Authors Patricia and Robert Heyer dive into the history of when two apex predators, man and shark, cross paths on the shores of New Jersey.

Shark Attacks Alex MacCormick, 2025-06-25 More horrifying than Jaws because it's true. Since 1990, there have been 283 shark attacks worldwide, 40 of which were fatal. In the past 15 years, reports of shark attacks have substantially increased. Over half the attacks occur in water no deeper than five feet. Believe it or not, shark attacks are still a very real threat to humans. These unspeakably bloody encounters happen in shallow water in safe areas to people just like you, people who thought it could never happen to them.

HONG KONG 1995 A forty-five-year-old woman swimming in shallow water with fifty other people has one leg and one arm ripped off by the shark; she dies before reaching the hospital.

CALIFORNIA 1993 A man snorkeling with friends is swallowed headfirst halfway down his body; luckily, the shark spits him back out with only bite wounds.

AUSTRALIA 1993 A professional diver and mother of five is literally torn in half in front of her horrified family by a fifteen-foot great white shark.

HAWAII 1991 Two vacationing friends out for a swim suddenly see a shark the size of a car swim by. After one of the women begins thrashing in panic, the shark attacks and kills her; her body is later recovered with several limbs missing.

Shark Attacks Blake Chapman, 2017-11 Humans spend more time in or on the water than ever before. We love the beach. But for many people getting in the water provokes a moment's hesitation. Shark attacks are big news events and although the risk of shark attack on humans is incredibly low, the fact remains that human lives are lost to sharks every year. *Shark Attacks* explores the tension between risk to humans and the need to conserve sharks and protect the important ecological roles they play in our marine environments. Marine biologist Blake Chapman presents scientific information about shark biology, movement patterns, and feeding behaviour. She discusses the role of fear in the way we think about sharks and the influence of the media on public perceptions. Moving first-hand accounts describe the deep and polarising psychological impacts of shark attacks from a range of perspectives. This book is an education in thinking through these emotive events and will help readers to navigate the controversial issues around mitigating shark attacks while conserving the sharks themselves. On July 1, 1916, witnesses watched in horror as twenty-eight-year-old Charles Vansant was attacked and killed by a shark in shallow water off Beach Haven, New Jersey, the first recorded shark attack in American history. Scientists claimed a shark could not be responsible, but more deadly attacks soon followed along the Jersey Shore and up the freshwater Matawan Creek, setting off a nationwide panic that led the White House to declare a War on Sharks. In this illustrated book, which features 16 pages of black and white photographs, readers will learn about the likely culprit or culprits in the attacks: the great white shark and the bull shark, and how the bloody summer of 1916 would change how people viewed sharks forever.

The author's examination of wound characteristics, recurring locations, and the curious phenomenon of attacks on inanimate objects afford astonishing insights into why sharks attack. These insights form the foundation for his safety recommendations.
