Dove,Simon J. Pierce,2021-08-25 Whale sharks are the largest of all fishes fascinating for comparative studies of all manner of biological fields including functional anatomy growth metabolism movement ecology behavior and physiology These gentle ocean giants have captured the interest of scientists and the imagination of the public yet their future is uncertain The conservation status of whale sharks was upgraded to Endangered on the IUCN Red List and the species faces a range of intense threats from human

activities Can these iconic living animals who have survived for millions of years survive us Written by the world's leading experts in whale shark biology ecology and conservation Whale Sharks Biology Ecology and Conservation is the first definitive volume about the world's biggest fish Chapters include discussions of satellite linked tags used to track whale shark movements genetic sequencing to examine evolutionary adaptations even the use of underwater ultrasound units to investigate the species reproduction The editors hope that by collating what is known they can make it easier for future researchers conservationists and resource managers to fill some of the remaining knowledge gaps and provide the information they need to join the team As you work your way through this book we hope that you will develop a sense of awe and marvel at all of our good fortune to share the ocean and the planet with this utterly extraordinary species [Animal Life In Nature, Myth and Dreams](#) \_ Elizabeth Caspari,2003-09-01 In Animal Life in Nature Myth and Dreams Elizabeth Caspari connects the world of real living animals with the symbolic world of animal images in human thought both conscious and unconscious She gives the reader an opportunity to make this connection on his or her own personal journey of discovery This book is a study of animals their natural history mythology folklore and religious significance around the world as well as their role in our lives dreams and everyday language It examines the symbolic impact animals have on our collective culture particularly on our own personal and interior lives From Albatross to Zebra each animal is pictured in color and factual context is given about its behavior in the natural world Information is included about habitat distribution weight size longevity and classification By drawing on a process of amplification developed by C G Jung in which an image is related to a previous historical mythological religious or ethnological context Animal Life in Nature Myth and Dreams discusses the meaning of the animal in a dream amplifying the reader's understanding of that animal Intended for anyone interested in the actual behavior and nature of animals and the world we live in Animal Life presents a good deal of ethological and mythological material By contemplating the significance of our fellow creatures and how everything in our universe is connected Animal Life offers a more whole and more healing view of the world Fully illustrated in color **A to Zoo** Rebecca L.
