The California Current Stan Ulanski,2016-02-13 The California Current part of the large swirling North Pacific gyre flows slowly southward along the west coast of North America stretching nearly 2 000 miles from southern British Columbia to the tip of Baja California in Mexico To a casual observer standing on the shore the vast current betrays no discernible signs yet life abounds just over the horizon Stan Ulanski takes us into the water on a journey through this magnificent unique marine ecosystem illuminating the scientific and biological marvels and the astonishing array of flora and fauna streaming along our Pacific coast The waters of the California Current yield a complex broth of planktonic organisms that form the base of an elaborate food web that many naturalists have compared to the species rich Serengeti ecosystem of Africa Every year turtles seals fish and seabirds travel great distances to feast in the current s distinct biological oases and feeding sites Apex predators such as the California gray whale humpback whale salmon shark and bluefin tuna undertake extensive north south migrations within the current to find enough to eat The California Current energizes us to celebrate and protect a marine ecosystem integral to the myriad fisheries coastal communities and cultures of the Pacific coast

*Chondrichthyes* Luis Fernando Rodrigues-Filho,João Bráullio De Luna Sales,2017-12-20 Chondrichthyes are a group of cartilaginous fish where we have sharks rays and chimeras

as members This group plays an important role in aquatic ecology as they act as predators throughout the food chain e g sharks However many populations of Chondrichthyes are threatened by several factors increased direct fishing high mortality rate as accompanying fauna marine pollution habitat destruction etc These declines are evident in many parts of the world and have come to the attention of scientists conservation organizations the media and the general public Fisheries legislation regulating international fisheries markets has been amended to provide greater protection for this group along with other species of fish However little is known about these species which reinforces the importance of studies in order to have a better understanding of the elasmobranch stocks as well as to identify the influences of the anthropic action of fishing In response to knowledge on the low sustainability of cartilaginous fish fisheries on a global scale FAO has developed an international plan of action for the management and conservation of these fish with the aim of developing and implementing national plans of action to ensure management and conservation of these stocks having as main recommendation the collection of information about the Chondrichthyes especially the sharks Even so this group is little known in terms of biodiversity ecology behavior and a host of other characteristics relevant to this taxon which is very worrying Chondrichthyes Multidisciplinary Approach attempts to portray to the readers up to date information on Chondrichthyes to promote an overview of the current taxon serving as an indispensable source of access to more accurate and detailed information on shark rays and chimeras
