**John J. Weltman**

## **Shatterer Of Worlds:**

**Worlds to Shatter, Shattered Worlds** Paul Payack, 2003-07 *Worlds to Shatter Shattered Worlds* is a classically styled dramatic work often compared to the style and substance of Tom Stoppard's *Rosencrantz and Guildenstern are Dead*. In *Worlds to Shatter* you will encounter the all too strange world inhabited by such denizens as Sea faring Time worshippers and the Keeper of the Nothingness. Paul JJ Payack is a Silicon Valley marketing executive by day but by night he constructs the elaborate all too strange worlds such as that found in *Worlds to Shatter Shattered Worlds*. Over his career as a writer Payack has created hundreds of metafictional works in the various forms of novella, short stories, polyplays, essays, and collage narratives that have been published in some dozen collections and hundreds of reviews and anthologies around the world including *The Paris Review*, *New Letters*, *Creative Computing*, and *Boulevard*. At the same time Payack has served as a senior executive for some of the world's leading high technology companies. Currently Payack serves as Chairman/President of The WordMan at [yourDictionary.com](http://yourDictionary.com), the leading global language portal. According to Sylvia Berkman, "What continues to even more forcefully distinguish Paul Payack's later work is the nature of the creative intelligence from which it stems. This is an intelligence cool yet engaged, composed, witty, immensely concerned with the broad, pivotal elements of the human experience."

**Religious Worlds** William E. Paden, 2015-10-27 *From Gods to ritual observance to the language of myth and the distinction between the sacred and the profane*. *Religious Worlds* explores the structures common to all spiritual traditions.

**The Sword of Bheleu** Lawrence Watt-Evans, 2015-02-25 The sword that Garth had stolen from Dusarra marked him as the chosen of Bheleu, god of destruction, and gave him immense power. This power could only be used to destroy, and Garth wanted to build. He chose to refuse the god's gift. Bheleu did not intend to allow that. *A Companion to World War II* Thomas W. Zeiler, Daniel M. DuBois, 2012-12-21 *A Companion to World War II* brings together a series of fresh academic perspectives on World War II, exploring the many cultural, social, and political contexts of the war. Essay topics range from American anti-Semitism to the experiences of French African soldiers, providing nearly 60 new contributions to the genre, arranged across two comprehensive volumes. A collection of original historiographic essays that include cutting edge research. Analyzes the roles of neutral nations during the war. Examines the war from the bottom up through the experiences of different social classes. Covers the causes, key battles, and consequences of the war.

**The World in Books** Kenneth C. Davis, 2024-10-08 *From ancient times to the present day*. *The World in Books* offers a wide-ranging historical education through pleasure reading and a fantastic introduction to some of the most thought-provoking, profound, and interesting nonfiction works of all time. From Sun Tzu's *The Art of War* to bell hooks's *All About Love*, as well as such recent classics as Barbara Ehrenreich's *Nickel and Dimed* and Chimamanda Ngozi Adichie's *We Should All Be Feminists*, Davis's guide suggests a world of nonfiction books and explains just why they're so historically meaningful and culturally relevant today.

**World Politics and the Evolution of War** John J. Weltman, 1995 In this comprehensive study of international relations, scholar John

Weltman explores the many roles of war in world politics With topics ranging from the development of strategic thought to the effects on war of political and technological change from the uses of force and threats of force to the uses of arms control from the prominence of war in history to its likely fate in the post Cold War world Weltman s analysis offers a detailed thoroughgoing and rigorous overview of the subject Throughout Weltman questions a number of widely held assumptions To the conventional argument that the number of players in the international system determines the incidence and character of war he responds with evidence that suggesting that the social material and intellectual context within which conflicts occur is far more influential Weltman also questions the prevailing wisdom that democracies are inherently peaceful and autocracies inherently warlike arguing instead that the propensity to wage war and the effects of war are largely the products of prevailing expectations whether or not war offers a means for the cheap easy and decisive accomplishment of a government s objectives And he criticizes the dominant view that conflict even violent conflict is psychologically abnormal Drawing upon the traditional distinction between wars of attrition and wars of annihilation Weltman sees the trend toward the former despite the anomalous Persian Gulf conflict as likely to continue While this trend does not suggest the end of warfare much less the end of history it does imply the localization of conflict and the minimization of the danger of global conflagration The new world order Weltman concludes will be far from peaceful but the conflicts that do arise will be slow burning and difficult to spread Outside intervention in these conflicts will be costly

*Machines as the Measure of Men* Michael Adas, 2015-06-04 Over the past five centuries advances in Western understanding of and control over the material world have strongly influenced European responses to non Western peoples and cultures In *Machines as the Measure of Men* Michael Adas explores the ways in which European perceptions of their scientific and technological superiority shaped their interactions with people overseas Adopting a broad comparative perspective he analyzes European responses to the cultures of sub Saharan Africa India and China cultures that they judged to represent lower levels of material mastery and social organization Beginning with the early decades of overseas expansion in the sixteenth century Adas traces the impact of scientific and technological advances on European attitudes toward Asians and Africans and on their policies for dealing with colonized societies He concentrates on British and French thinking in the nineteenth century when he maintains scientific and technological measures of human worth played a critical role in shaping arguments for the notion of racial supremacy and the civilizing mission ideology which were used to justify Europe s domination of the globe Finally he examines the reasons why many Europeans grew dissatisfied with and even rejected this gauge of human worth after World War I and explains why it has remained important to Americans Showing how the scientific and industrial revolutions contributed to the development of European imperialist ideologies *Machines as the Measure of Men* highlights the cultural factors that have nurtured disdain for non Western accomplishments and value systems It also indicates how these attitudes in shaping policies that restricted the diffusion of scientific knowledge have perpetuated themselves and contributed significantly to chronic underdevelopment throughout the developing world Adas s far reaching and provocative book will be compelling reading for all who are concerned about the history of Western imperialism and its legacies First published to wide acclaim in 1989 *Machines as the Measure of Men* is now available in a new edition that features a preface by the author that discusses how subsequent developments in gender and race studies as

well as global technology and politics enter into conversation with his original arguments Reinventing World War II Barbara A. Biesecker, 2024-08-09 By the 1970s World War II had all but disappeared from US popular culture But beginning in the mid eighties it reemerged with a vengeance and for nearly fifteen years World War II was ubiquitous across US popular and political culture In this book Barbara A Biesecker explores the prestige and rhetorical power of the Good War revealing how it was retooled to restore a new kind of social equilibrium to the United States Biesecker analyzes prominent cases of World War II remembrance including the canceled exhibit of the Enola Gay at the National Air and Space Museum in 1995 and its replacement Steven Spielberg s Saving Private Ryan Tom Brokaw s The Greatest Generation and the United States Holocaust Memorial Museum Situating these popular memory texts within the culture and history wars of the day and the broader framework of US political and economic life Biesecker argues that with the notable exception of the Holocaust Memorial Museum these reinventions of the Good War worked rhetorically to restore a strong sense of national identity and belonging fitted to the neoliberal nationalist agenda By tracing the links between the popular retooling of World War II and the national state fantasy and by putting the lessons of Foucault Derrida Lacan and their successors to work for a rhetorical political analysis of the present Biesecker not only explains the emergence and strength of the MAGA movement but also calls attention to the power of public memory to shape and contest ethnonational identity today This book will interest rhetoricians and historians as well as students and scholars in the fields of US politics and communication studies
