Shell Of British Buildings:

Shell Structures for Architecture Sigrid Adriaenssens, Philippe Block, Diederik Veenendaal, Chris Williams, 2014-03-21 Featuring a foreword by Pritzker Prize Winner Shigeru Ban Bringing together experts from research and practice Shell Structures for Architecture Form Finding and Optimization presents contemporary design methods for shell and gridshell structures covering form finding and structural optimization techniques It introduces architecture and engineering practitioners and students to structural shells and provides computational techniques to develop complex curved structural surfaces in the form of mathematics computer algorithms and design case studies Part I introduces the topic of shells tracing the ancient relationship between structural form and forces the basics of shell behaviour and the evolution of form finding and structural optimization techniques Part II familiarizes the reader with form finding techniques to explore expressive structural geometries covering the force density method thrust network analysis dynamic relaxation and particle spring systems Part III focuses on shell shape and topology optimization and provides a deeper understanding of gradient based methods and meta heuristic techniques Part IV contains precedent studies of realised shells and gridshells describing their innovative design and construction methods *What Colour is your Building?* David Clark, 2019-07-25 Defining and reducing the carbon footprint of a new or refurbished building can be a daunting task There are lots of tools to measure the environmental impact of buildings but they all measure energy and CO2 in different ways and they do not measure the whole carbon footprint *What Colour is your Building* provides practical and pragmatic guidance on how to calculate and then compare the whole carbon footprint of buildings using one simple method looking at operating embodied and transport energy It will equip designers building owners occupiers planners and policy makers with the tools and knowledge that they will need to make decisions early on about where the big impacts will be in terms of reducing the carbon footprint of the building including A new simple approach to understanding the whole carbon impact of buildings Benchmarking data for operating energy performance A clear transparent method of separating landlord energy performance from tenant energy performance Simple diagrams and numbers to put renewable energy into perspective **Insights and Innovations in Structural Engineering, Mechanics and Computation** Alphose Zingoni, 2016-11-25 *Insights and Innovations in Structural Engineering Mechanics and Computation* comprises 360 papers that were presented at the Sixth International Conference on Structural Engineering Mechanics and Computation SEMC 2016 Cape Town South Africa 5 7 September 2016 The papers reflect the broad scope of the SEMC conferences and cover a wide range of engineering structures buildings bridges towers roofs foundations offshore structures tunnels dams vessels vehicles and machinery and engineering materials steel aluminium concrete masonry timber glass polymers composites laminates smart materials Aylesbury in 50 Buildings Paul Rabbitts, 2022-11-15 A fascinating exploration of some of the architectural heritage of the Buckinghamshire town of Aylesbury *Metaphorical Practices in Architecture* Sarah Borree, Stephanie Knuth, Moritz Röger, 2023-06-23 Metaphors are

diversely and intricately embedded in architectural practice and discourse Precisely for this reason this volume argues and sets out to explore how they can be engaged to critically interrogate architecture's social cultural and political dimensions past and present and to productively challenge and intervene with established perspectives debates and practices Mapping out not just potentials but also addressing the challenges limitations and dangers inherent in using metaphors in architectural research and practice the volume prominently illustrates the ambiguity and contradictoriness inherent in both metaphors and the process of engaging and exploiting them Covering a broad range of historical and geographical cases and concerns the contributions illustrate effectively that metaphors can expand or narrow our engagement with architecture and consolidate or legitimise but also destabilise and challenge established social cultural disciplinary and political structures concepts and categories With its aim to explore metaphors as both subject and method to critically challenge and expand established practices perspectives and standards in architectural research and practice the volume will be of interest for scholars working across the architectural humanities including architectural history theory culture design and urbanism as well as for researchers concerned with architecture and the city from fields such as cultural visual and area studies as well as art history
