much as the battlefield Examining the war from an industrial perspective *Arming the Western Front* examines how the British between 1900 and 1920 set about mobilising economic and human resources to meet the challenge of industrial war Beginning with an assessment of the run up to war the book examines Edwardian business state relations in terms of armament supply It then outlines events during the first year of the war taking a critical view of competing constructs of the war and considering how these influenced decision makers in both the private and public domains This sets the framework for an examination of the response of business firms to the demand for shells more shells and their varying ability to innovate and manage changing methods of production and organisation The outcome a central theme of the book was a complex and evolving trade off between the quantity and quality of munitions supply an issue that became particularly acute during the Battle of the Somme in 1916 This deepened the economic and political tensions between the military the Ministry of Munitions and private engineering contractors as the pressure to increase output accelerated markedly in the search for victory on the western front The Great War created a dual army one in the field the other at home producing munitions and the final section of the book examines the tensions between the two as the country strove for final victory and faced the challenges of the transition to the peace time economy *A London Bibliography of the Social Sciences*, 1931 Vols 1 4 include material to June 1 1929 **What is Europe?** The Open University, 1995-01-01 This 10 hour free course explored the different understandings of Europe that underlie the debates and disputes over the development of Europe **The British National Bibliography** Arthur James Wells, 2006 **Rethinking Modern European Intellectual History** Darrin M. Schwartzwald, 2022-07-19 Between the years 1815 and 1945 Europe achieved unrivaled global dominance only to see it shattered by two world wars This frenetic rise and fall was attended by immense societal

change In 1815 Europe remained largely agricultural and dependent upon horsepower By 1945 the power of the atom had been unleashed Two industrial revolutions occurred in the interim the first founded upon coal iron and steam the second upon oil steel electricity and internal combustion The implications for humanity were profound This concise yet comprehensive study is divided into three sections In section one the map of Europe emerges in its modern visage as unrestrained nationalist fervor gives rise to an assemblage of new nation states In section two the continent attains global hegemony as massive industrialization fuels a mad scramble for colonial markets and raw materials In section three a cauldron of national ethnic and class hatreds spawn the rise of totalitarianism and the overthrow of European hegemony in two calamitous world wars By tracing the events and undercurrents of this vital period in European history this book offers trenchant insights for the lay reader and the student of history alike *German Thought and International Relations* R. Shilliam, 2009-03-26 A fundamental question for IR is whether the value system of liberalism can be universalized or if in fact the illiberal reality of international politics systematically rules out such a universalisation The book addresses this issue by focusing on the rise and fall of a specific liberal project supported by influential German intellectuals **History**, 1975 A *Comparative History of Commerce and Industry, Volume II* David E. McNabb, 2016-01-26 A Comparative History of Commerce and Industry Volume II offers a subjective review of how the cultural social and economic institutions of commerce and industry evolved in industrialized nations to produce the institution we now know as business enterprise *Empires of Vice* Diana S. discourse and practice and analyses textbook knowledge in the context of its production conditions as well as debates within society Focusing particularly on textbook production M ller s study critically questions the common assumption that textbooks are produced in a top down model and calls for this premise to be relativised It also shows how many different actors contend to define knowledge about Africa within the education sector Ultimately this book traces the spectrum of what is considered utterable in regard to knowledge about Africa and shows how certain knowledge corpora have become prominent and others marginalised
