Reducing Oral Health Disparities:

What Can We Learn from Social, Environmental and Cultural Factors? Tamanna Tiwari,Sarah R. Baker,Judith

Albino,2017-12-05 Oral health disparities are profound worldwide and they affect the quality of life of individuals of all age groups Disparities in oral health are seen in racial and ethnic minorities at different socioeconomic levels and due to differences in environment and cultural factors Several determinants of oral health have been identified at the population community family and individual levels These determinants represent a complex interplay of the social biological cultural and economic factors that in turn affect the oral health behaviors environmental exposures health care utilization To date biological factors related to oral diseases have received much attention in oral health research whilst social and cultural determinants have just started to receive recognition for their role in oral disease development and progression This research highlights that interventions designed to reduce disparities should adopt a multi level approach in order to identify the modifiable mechanisms and target all determinants of oral health disparities In this Research Topic we will focus on the role of social environmental and cultural factors in the development and progression of oral diseases their role in oral health disparities and interventions focusing on these factors to improve oral health and reduce disparities Forthcoming Books Rose Arny,1998-04 **What Really Matters** John Pepper,2005 America's Greatest Brands Stephen P. The Smile Gap Catherine Carstairs,2022-06-15 As recently as fifty years ago

most people expected to lose their teeth as they aged Few children benefited from braces to straighten their teeth and cosmetic procedures to change the appearance of smiles were largely unknown Today many Canadians enjoy straight white teeth and far more of them are keeping their teeth for the entirety of their lives Yet these advances have not reached everyone The Smile Gap examines the enormous improvements that have taken place over the past century The use of fluorides emphasis on toothbrushing the rise of cosmetic dentistry and better access to dental care have had a profound effect on the oral health and beauty of Canadians Yet while the introduction of employer provided dental insurance in the 1970s has allowed for regular visits to the dentist for many people a significant number of Canadians still lack access to good

oral health care especially disabled Canadians those on social assistance the working poor the elderly and new immigrants At the same time an attractive smile has become increasingly important in the workplace and in relationships People with damaged and missing teeth are at a substantial disadvantage not just because of the pain and suffering caused by poor oral health but because we live in a society that prizes good teeth and warm smiles The first history of oral health in Canada The Smile Gap reveals that despite the gains made too many Canadians go without any dental care with damaging consequences for their oral health general physical health and self image To complete our health care system it is time to close the gap
