The image shows a two-page spread from a historical manuscript. The left page, folio 10v, is filled with dense, handwritten text in a single column, likely in a Gothic or similar medieval script. The right page, folio 11r, contains a large, detailed drawing of a landscape. The drawing depicts a winding path or river leading towards a distant building or structure, possibly a castle or a church. The style of the drawing is characteristic of medieval manuscript illumination, with fine lines and a focus on perspective. Above the drawing, there is some handwritten text, which appears to be a continuation of the text from the left page or a separate entry. The overall condition of the manuscript suggests it is quite old, with some visible wear and discoloration of the parchment or paper.

about the various facets of the subject area This book is a time series rather than a cross sectional analysis of the Evolution of Town Planning in Pakistan It attempts to highlight the various processes and geopolitical landmarks during the nine thousand years long evolutionary processes of physical planning and development in the Indian subcontinent in general and those in Pakistan in particular It traverses a long temporal and evolutionary progression of town planning processes in Pakistan This book is a very modest effort to fill a huge gap and may even provide an incentive for the future planning historians and academicians to undertake more in depth cross sectional analysis of various processes comprehensively
