Jefferson, 2014-12-21 This engaging book spans three centuries to provide the first full account of the long and diverse history of genius in France Exploring a wide range of examples from literature philosophy and history as well as medicine psychology and journalism Ann Jefferson examines the ways in which the idea of genius has been ceaselessly reflected on and redefined through its uses in these different contexts She traces its varying fortunes through the madness and imposture with which genius is often associated and through the observations of those who determine its presence in others Jefferson considers the modern beginnings of genius in eighteenth century aesthetics and the works of philosophes such as Diderot She then investigates the nineteenth century notion of national and collective genius the self appointed role of Romantic poets as misunderstood geniuses the recurrent obsession with failed genius in the realist novels of writers like Balzac and Zola the contested category of female genius and the medical literature that viewed genius as a form of pathology She shows how twentieth century views of genius narrowed through its association with IQ and child prodigies and she discusses the different ways major theorists including Sartre Barthes Derrida and Kristeva have repudiated and subsequently revived the concept Rich in narrative detail *Genius in France* brings a fresh approach to French intellectual and cultural history and to the burgeoning field of genius studies **Dante and Heterodoxy** Maria Luisa Ardizzone, 2014-10-02 *Dante and Heterodoxy*

The Temptations of 13th Century Radical Thought edited and with an introduction by Maria Luisa Ardizzone collects several studies devoted to discussing Dante's work in the light of the intellectual debate that developed in thirteenth century Europe after the entrance of new Aristotelian learning and the diffusion of Greek Arabic thought in particular the Latin translations of works by Ibn Rushd Averroes What takes form in the various articles is the emerging of an interest in the philosophical and scientific contents of Dante's opus *Heterodoxy* in this volume is thus linked to but not always coincident with what medieval scholars such as Ferdinand Van Steenberghen or Alain De Libera term radical Aristotelianism or Integral Aristotelianism The word temptations as its meaning clearly shows delineates not an organic link with heterodox or radical ideas but rather an intermittent inclination to include or evaluate themes related to these ideas *Temptations* implies a search an interrogation that consists of the doubts and uncertainties of a poet strongly involved in the intellectual debate of his time and culture and for whom philosophy and theology are not fields of opposition but different modes of inquiry Myth and

Brain Disease and Doctors in Novels, Theater, and Film J. Bogousslavsky,S. Dieguez,2013 An amazing and fascinating look at
neurological conditions in fiction and film Classical and modern literature is full of patients with interesting neurological
cognitive or psychiatric diseases often including detailed and accurate descriptions which suggests the authors were inspired
by observations of real people In many cases these literary portrayals of diseases even predate their formal identification by
medical science Fictional literature encompasses nearly all kinds of disorders affecting the nervous system with certain
favorites such as memory loss and behavioral syndromes There are even unique observations that cannot be found in
scientific and clinical literature because of the lack of appropriate studies Not only does literature offer a creative and
humane look at disorders of the brain and mind but just as authors have been inspired by medicine and real disorders
clinicians have also gained knowledge from literary depictions of the disorders they encounter in their daily practice This
book provides an amazing and fascinating look at neurological conditions patients and doctors in literature and film in a way
