and Representation Maria Balshaw,Liam Kennedy,1999-12-20 Theories of urban space have become the focus of a great deal of work by scholars in cultural geography urban studies and critical theory This volume contributes to that debate by analysing the relationship between theories of urban space and literary and visual representations of the city an emergent area of confluence in literary film and cultural studies The contributors address themes such as visual culture and spectacle class and capital community and public space and nation diaspora and belonging Cities covered include New York Chicago Jerusalem Paris London Birmingham and Freetown Sierra Leone Artists and writers discussed include Piet Mondrian Nella Larsen Rudolph Fisher Amos Oz David Grossman Sarah Schulman Jonathan Larsen Charles Dickens Wilkie Collins Paul Auster and Wayne Wang *Public Religion and the Urban Environment* Richard Bohannon,2012-04-26 Nature and the city

have most often functioned as opposites within Western culture a dichotomy that has been reinforced and sometimes challenged by religious images Bohannon argues here that cities and natural environments however are both connected and continually affected by one another He shows how such connections become overt during natural disasters which disrupt the narratives people use to make sense of the world including especially religious narratives and make them more visible This

book offers both a theoretical exploration of the intersection of the city nature and religion as well as a sociological analysis of the 1997 flood in Grand Forks ND USA This case study shows how religious factors have influenced how the relationship between nature and the city is perceived and in particular have helped to justify the urban control of nature The narratives found in Grand Forks also reveal a broader understanding of the nature of Western cities highlighting the potent and ethically rich intersections between religion cities and nature

Sustainable Development Handbook, Second Edition Stephen A. Roosa,2020-12-22 Gaining momentum globally sustainable development is beginning to significantly redefine the policies of corporations and governmental entities Updated throughout the second edition of this popular resource includes updates on LEED measurement and verification and a new chapter on cities and carbon reduction Clarifying critical issues this volume examines proven approaches as well as problems with failed initiatives

In addition to core concepts and trends it explores specific renewable energy and environmental solutions. It examines global initiatives, local politics, and ways to effectively measure and track progress. **The Synagogues of Kentucky** Lee Shai Weissbach, 2014-07-11 Lee Shai Weissbach's innovative study sheds light on the functioning of smaller Jewish communities in a state representative of many in the Midwest and South. The synagogue buildings of Kentucky tell much about the experience of Kentucky Jewry. Synagogues, especially in smaller towns, have often served as the only setting available for a wide variety of communal activities. Weissbach outlines the history of every congregation established in Kentucky and every house of worship that has served Kentucky Jewry over the last 150 years, considering such issues as the financing of construction, the selection of architects, the way synagogue buildings reveal congregational attitudes, and the way local synagogue design reflects national trends. Eighty-two photographs show every one of Kentucky's synagogues, including buildings that are no longer standing or have been converted to other uses. This pictorial record documents the variety, distinctiveness, and significance of these buildings as a part of the Commonwealth's architectural, cultural, and religious landscape. **Local Sustainable Urban Development in a Globalized World** Dr. Lauren C. Heberle, Dr. Susan M. Opp, 2012-11-28 Sustainable development is a key issue of concern to urban planners across the globe. How it is defined, implemented, and measured at the local level remains highly contested and subject to a wide range of external cultural, political, and economic pressures. Bringing together leading experts from North America, Europe, the Middle East, and SE Asia, this book provides a timely overview of the various methods for understanding and implementing sustainable practices at local levels. In doing so, they present the wide range of local action alternatives available to planners that may be pursued in spite of the constraints generated by globalization processes and highlight the array of public policy options that could reduce the external pressures shaping the possible local alternatives. The book argues that while local planners and local authorities are willing to act, many are unaware of the range of options available to them. In bringing together these case studies, not only diverse in geographic terms but also reflecting very different levels of income, general population, education, cultural norms, legal systems, and government structures, it points out innovations and examples of best practice. **Subject Catalog** Library of Congress, 1979 **The Professional Practice of Landscape Architecture** Walter Rogers, 2010-09-09 The all-inclusive reference to starting and operating a landscape architecture firm. *The Professional Practice of Landscape Architecture*, Second Edition, is completely revised to keep up with the latest developments driving the day-to-day operation of a successful private practice landscape architecture office.
