The Projective Use Of Mother-And- Child Drawings: A Manual Jacquelyn Gillespie, 2013-08-21 A unique and powerful new projective technique is now available to mental health professionals Based on the most primary of human relationships that between mother and child this technique is able to foster projections and identify perceptions of self and others that carry an unusually strong component of unconscious material Strikingly clear and accessible *The Projective Use of Mother and Child Drawings* is one of the few books on projective techniques to provide a consistent theoretical outlook and to address the very significant issues of transference and countertransference as they relate to this technique While firmly grounded in a psychodynamic view of personality development the volume also conveys a clinical outlook with applications suitable to a variety of theoretical paradigms The author comprehensively considers the theoretical and practical aspects of mother and child drawings and how to both use and assess them to gain insight into the most fundamental reaches of the self She consistently cautions against overly simplified interpretations of the drawings and stresses the importance of using conclusions drawn from them only as indications for further assessment confirmation or rejection The book is replete with examples of mother and child drawings from all age groups in both average populations and those with both mental and physical pathologies The volume opens with a careful discussion of the theoretical considerations behind mother and child drawings as well as the development and validation of projective drawing techniques in general The next section on research issues discourages diagnostic labeling in favor of making optimum use of the highly personal and idiosyncratic nature of these drawings This chapter features an interesting attempt to classify mother and child drawings in relation to size of the figures A particularly fascinating chapter on the impact of art on the therapist focuses on artwork done by professional artists who have addressed the mother and child theme The author explores and analyzes several thematic works of art from varying time periods and cultures It is her intent to help mental health professionals to explore their responses to pictorial art as individuals and thereby gain new understandings of related transference and countertransference issues with clients Chapter four provides clear instructions for administering mother and child drawings as a projective technique and guidelines for their interpretation This section provides samples and analyses of age typical drawings from the general population They vary greatly in style and artistic proficiency and are included to provide an idea of the usual developmental sequence of drawing characteristics from early childhood through the adult years Drawings of groups with demonstrated psychological pathologies or physical and developmental abnormalities comprise the final chapter This section approaches the interpretation of drawings by asking

questions about how they communicate basic self and object relations issues This commanding volume of interest to students and professionals alike will provide art therapists school psychologists and mental health practitioners of all stripes with a powerful new projective technique to add to their professional armamentarium **Adpositions** Claude Hagège, 2010-04-29 This pioneering study is based on an analysis of over 200 languages including African Amerindian Australian Austronesian Indo European and Eurasian Altaic Caucasian Chukotko Kamchatkan Dravidian Uralic Papuan and Sino Tibetan Adpositions are an almost universal part of speech English has prepositions some languages such as Japanese have postpositions others have both and yet others kinds that are not quite either As grammatical tools they mark the relationship between two parts of a sentence characteristically one element governs a noun or noun like word or phrase while the other functions as a predicate From the syntactic point of view the complement of an adposition depends on a head in this last sentence for example a head is the complement of on while on a head depends on depends and on is the marker of this dependency Adpositions lie at the core of the grammar of most languages their usefulness making them recurrent in everyday speech and writing Claude Hagège examines their morphological features syntactic functions and semantic and cognitive properties He does so for the subsets both of adpositions that express the relations of agent patient and beneficiary and of those which mark space time accompaniment or instrument Adpositions often govern case and are sometimes gradually grammaticalized into case The author considers the whole set of function markers including case that appear as adpositions and in doing so throws light on processes of morphological and syntactic change in different languages and language families His book will be welcomed by typologists and by syntacticians and morphologists of all theoretical stripes Young Children, Pedagogy and the Arts Felicity McArdle, Gail Boldt, 2013-09-02 Young Children Pedagogy and the Arts is an innovative text that describes practices and research that cross all five strands of the arts visual drama music dance and media and illuminates ways of understanding children and their arts practices that go beyond the common traditions The book Offers practical and rich illustrations of teachers and children's work based on international research that integrates theory with practice Brings a critical lens to arts education Includes summaries reflective questions and recommended further readings with every chapter Young Children Pedagogy and the Arts provides a more nuanced understanding of the arts through an exploration of specific instances in which committed teachers and researchers are discovering what contemporary multimodal tools offer to young children Chapters contain examples of doing the arts in the early years new ways of teaching and how to use emerging technologies to develop multiliteracies equity agency social and cultural capital and enhance the learning and engagement of marginalized children **The Arts**, 1921 *School Training of Gifted Children* Henry Herbert Goddard, 1928 A description of the public school classes for gifted children in Cleveland **The Musical Monitor**, 1918 Bright Kids Who Couldn't Care Less Ellen Braaten, 2023-03-31 Keywords unmotivated underachieving underachievers underperforming children parenting self help lazy teens adolescents parents guide psychology how to get my child to work harder anxiety depression
