Altruism Arthur B. Shostak, 2017-07-12 Though it has been nearly seventy years since the Holocaust the human capacity for evil displayed by its perpetrators is still shocking and haunting But the story of the Nazi attempt to annihilate European Jewry is not all we should remember Stealth Altruism tells of secret non militant high risk efforts by Carers those victims who tried to reduce suffering and improve everyone s chances of survival Their empowering acts of altruism remind us of our inherent longing to do good even in situations of extraordinary brutality Arthur B Shostak explores forbidden acts of kindness such as sharing scarce clothing and food rations holding up weakened fellow prisoners during roll call secretly replacing an ailing friend in an exhausting work detail and much more He explores the motivation behind this dangerous behavior how it differed when in or out of sight who provided or undermined forbidden care the differing experiences of men and women how and why gentiles provided aid and most importantly how might the costly obscurity of stealth altruism soon be corrected To date memorialization has emphasized what was done to victims and sidelined what victims tried to do for one another Carers provide an inspiring model and their perilous efforts should be recognized and taught alongside the horrors of the Holocaust Humanity needs such inspiration **The United States Holocaust Memorial Museum Encyclopedia of Camps and Ghettos, 1933-1945: Volume I**

Plight and Fate of Women During and Following Genocide Samuel Totten, 2017-07-05 The plight and fate of female victims during the course of genocide is radically and profoundly different from their male counterparts Like males female victims suffer demonization ostracism discrimination and deprivation of their basic human rights They are often rounded up deported and killed But unlike most men women are subjected to rape gang rape and mass rape Such assaults and degradation can and often do result in horrible injuries to their reproductive systems and unwanted pregnancies This volume takes one stride towards assessing these grievances and argues against policies calculated to continue such indifference to great human suffering The horror and pain suffered by females does not end with the act of rape There is always the fear and reality of being infected with HIV AIDS Concomitantly there is the possibility of becoming pregnant Then there is the birth of the babies For some the very sight of the babies and children reminds mothers of the

horrific violations they suffered When mothers harbor deep seated hatred or distain for such children it results in more misery The hatred may be so great that children born of rape leave home early in order to fend for themselves on the street This seventh volume in the Genocide series will provoke debate discussion reflection and ultimately action The issues presented include ongoing mass rape of girls and women during periods of war and genocide ostracism of female victims terrible psychological and physical wounds the plight of offspring resulting from rapes and the critical need for medical and psychological services

Slave Labor in Nazi Concentration Camps Marc Buggeln, 2014-12-18 *Slave Labor in Nazi Concentration Camps* examines the slave labor carried out by concentration camp prisoners from 1942 and the effect this had on the German wartime economy This work goes far beyond the sociohistorical reconstructions that dominate Holocaust studies it combines cultural history with structural history drawing relationships between social structures and individual actions It also considers the statements of both perpetrators and victims and takes the biographical approach as the only possible way to confront the destruction of the individual in the camps after the fact The first chapter presents a comparative analysis of slave labor across the different concentration camps including Auschwitz Buchenwald and Dachau The subsequent chapters analyse the similarities and differences between various subcamps where prisoners were utilised for the wartime economy based on the example of the 86 subcamps of Neuengamme concentration camp which were scattered across northern Germany The most significant difference between conditions at the various subcamps was that in some hardly any prisoners died while in others almost half of them did This work carries out a systematic comparison of the subcamp system a kind of study which does not exist for any other camp system This is of great significance because by the end of the war most concentration camps had placed over 80 percent of their prisoners in subcamps This work therefore offers a comparative framework that is highly useful for further examinations of National Socialist concentration camps and may also be of benefit to comparative studies of other camp systems such as Stalin's gulags
