Ritual Voices of Revelation James J. Fox, 2024-11-26 This is a study of a collection of oral compositions of the Rotenese of eastern Indonesia Recited in semantic parallelism these compositions require a strict pairing of all words to produce correspondingly ordered verses These narrative verses create an elevated discourse a scriptural voice intended to reveal the origins of Rotenese cultural life The translations and exegeses of these origin narratives offer a work of world class poetic imagination that recounts a dynastic contest between the Sun and Moon and Lords of the Ocean Sea and its epic consequences As background to the presentation of these narratives this study provides a description of Rotenese life expressed in the complementary pairs that the Rotenese themselves use to categorise their world A concluding chapter examines the Rotenese acquisition of Christianity and the subsequent retelling of the Biblical Genesis in Rotenese parallel verse thus continuing the general examination of the use of parallelism as elevated ritual discourse Gathered from poets from two domains on the island most of these compositions date from fieldwork in 1965 66 and in 1973 The publication of these materials represents the summation of more than fifty years of research *New complete dictionary of the English and Dutch languages* Isaac Marcus Calisch, 1890

Coral Reefs of Eastern Asia under Anthropogenic Impacts Ichiro Takeuchi, Hideyuki Yamashiro, 2023-06-24 Coral reefs which are one of the most productive and biodiverse ecosystems on Earth serve various important roles such as providing shelter and spawning grounds to a wide range of marine animals However the global decline of hard corals in tropical and subtropical regions is a growing concern A recent review of the Intergovernmental Panel on Climate Change IPCC indicated that only 10% 30% of coral reefs would survive with an increase of 1.5 C in global warming temperature Of coral reefs around the world the coral reefs in eastern Asia face one of the most industrially

developed and high population areas in the world Thus coral reefs of eastern Asia have been affected by various anthropogenic factors such as eutrophication coastal development anthropogenic pollutants ocean acidification disease and overfishing Therefore urgent research is required to determine the levels at which different factors will affect coral health Besides we propose a perspective on coral reef especially those in eastern Asia conservation under climate change and various anthropogenic activities
