Hayek Bruce Caldwell, Hansjoerg Klausinger, 2022-11-25 A 2022 Economist Best Book of the Year The definitive account of the distinguished economist's formative years Few twentieth century figures have been lionized and vilified in such equal measure as Friedrich Hayek economist social theorist leader of the Austrian school of economics and champion of classical liberalism Hayek's erudite arguments in support of individualism and the market economy have attracted a devout following including many at the levers of power in business and government Critics meanwhile cast Hayek as the intellectual forefather of neoliberalism and of all the evils they associate with that pernicious doctrine In *Hayek A Life* historians of economics Bruce Caldwell and Hansj rg Klausinger draw on never before seen archival and family material to produce an authoritative account of the influential economist's first five decades This includes portrayals of his early career in Vienna his relationships in London and Cambridge his family disputes and definitive accounts of the creation of *The Road to Serfdom* and of the founding meeting of the Mont P lerin Society A landmark work of history and biography *Hayek A Life* is a major contribution both to our cultural accounting of a towering figure and to intellectual history itself The End of Finance Massimo

Amato, Luca Fantacci, 2013-12-19 This new book by two distinguished Italian economists is a highly original contribution to our understanding of the origins and aftermath of the financial crisis The authors show that the recent financial crisis cannot be understood simply as a malfunctioning in the subprime mortgage market rather it is rooted in a much more fundamental transformation taking place over an extended time period in the very nature of finance The end or purpose of finance is to be found in the social institutions by which the making and acceptance of promises of payment are made possible that is the creation and cancellation of debt contracts within a specified time frame Amato and Fantacci argue that developments in the modern financial system by which debts are securitized has endangered this fundamental credit debt structure The illusion has been created that debts are universally liquid in the sense that they need not be redeemed but can be continually sold on in increasingly extensive global markets What appears to have reduced the riskiness of default for individual agents has in fact increased the fragility of the system as a whole The authors trace the origins of this profound transformation backwards in time not just to the neoliberal reforms of the 1980s and 90s but to the birth of capitalist finance in the mercantile networks of the sixteenth and seventeenth centuries This long historical perspective and deep analysis of the nature of finance enables the authors to tackle the challenges we face today in a fresh way not simply by tinkering with existing mechanisms but rather by asking the more profound question of how institutions might be devised in which finance could fulfil its essential functions

Mont Pèlerin 1947 Bruce Caldwell, 2022-03-01 Marking the 75th anniversary of the first meeting of the Mont Pèlerin Society in 1947 this volume presents for the first time the original transcripts from this landmark event The society was created by Friedrich Hayek as a forum for leading economists and intellectuals to discuss and debate classical liberal values in the face of a rapidly changing world and political trends toward socialism Bruce Caldwell a major scholar of Hayek provides an informative introduction and explanatory notes to the source documents drawn from the Hoover Institution Library Archives where they have been available to scholars Now accessible to all the transcripts reveal what was said on a wide range of topics including free markets monetary reform wage policy taxation agricultural policy the future of Germany Christianity and liberalism and more They provide insights into the thinking of men such as Hayek Milton Friedman Aaron Director Frank Knight Walter Eucken Karl Popper and other leading figures in the classical liberalism movement illuminating not only their ideas but also their distinctive personalities A photo section shows rarely seen images from the meeting

Conservative Liberalism, North and South: Grundtvig, Einaudi and Their Relevance Today Hannes H. Gissurarson, 2024-11-07 A comparison and Evaluation of the national liberalism of Danish poet N F S Grundtvig and the liberal federalism of Italian economist Luigi Einaudi Gissurarson argues for a Nordic Model of the rule of law free trade social cohesion and cooperation across borders with minimal surrender of sovereignty

Financial crises and the nature of capitalist money Jocelyn Pixley, 2013-09-12 This volume is a debate about a sociology and economics of money a form of positive trespassing It is unique in being written by scholars of both disciplines committed to this mutual venture and in starting from the original groundwork laid by Geoffrey Ingham The contributors look critically at money's institutions and the meanings and history of money creation and show the cross cutting purposes or incommensurable sides of money and its crises These arise from severe tensions and social conflicts about the production of money and its many purposes We demonstrate the centrality of money to capitalism and consider social disorders since the 2007 crisis which marks the timeliness and need for dialogue Both disciplines have far too much to offer to remain in the former damaging standoff While we are thankful to see a possible diminution of this split remnants are maintained by mainstream economic and sociological theorists who after all the crises of the past 30 years and many before still hold to an argument that money really does not matter We suggest to many different and interested audiences that since money is a promise understanding this social relation must be a joint though plural task between economics and sociology at the very least

An Institutional History of Italian Economics in the Interwar Period — Volume I Massimo M. Augello, Marco E.L. Guidi, Fabrizio Bientinesi, 2019-11-25 Italy is well known for its prominent economists as well as for the typical public profile they have constantly revealed But when facing an illiberal and totalitarian regime how closely did Italian economists collaborate with government in shaping its economic and political institutions or work independently This edited book completes a gap in the history of Italian economic thought by providing a complete work on the crucial link between economics and the Fascist

regime covering the history of political economy in Italy during the so called Ventennio 1922 1943 with an institutional perspective The approach is threefold analysis of the academic and extra academic scene where economic science was elaborated and taught the connection between economics society and politics and dissemination of scientific debate Special attention is given to the bias caused by the Fascist regime to economic debate and careers This Volume I deals with the economics profession under Fascism in particular in light of the political and institutional changes that the regime introduced the restructuring of higher education the restriction of freedom in teaching and of the press and with respect to promoting its own strategies of political and ideological propaganda Volume II available separately considers the public side of the economics profession the fascistisation of culture and institutions banishment and emigration of opponents and post WW2 purge of Fascist economists
