Lumiere Light:

The Lumiere Autochrome Bertrand Lavédrine, Jean-Paul Gandolfo, 2013-12-15 Louis Lumière is perhaps best known in the U S for his seminal role in the invention of cinema but his most important contribution to the history of photography was the autochrome Engagingly written and marvelously illustrated with over 300 images *The Lumière Autochrome History Technology and Preservation* tells the fascinating story of the first industrially produced form of color photography Initial chapters present the Lumière family enterprise set out the challenges posed by early color photography and recount the invention rise and eventual decline of the autochrome which for the first four decades of the twentieth century was the most widely used form of commercial color photography The book then treats the technology of the autochrome including the technical challenges of plate fabrication described in step by step detail and a thorough account of autochrome manufacture A long final chapter provides in depth recommendations concerning the preservation of these vulnerable objects including proper storage and display guidelines There are also engaging portfolios throughout the book showcasing autochrome photographs from around the world as part of an initiative founded by the French banker Albert Kahn as well as engrossing testimonials by children of men who worked in the Lumière factories in the early twentieth century The appendix includes transcriptions and facsimile reproductions from the Lumière notebooks as well as original patent documents *La Lumière Du Monde.
