Luminescence and the Scintillation Counter Samuel Crowe Curran, 1953 **Luminescence Biotechnology** Knox Van Dyke, Christopher Van Dyke, Karen Woodfork, 2001-12-20 The dangers and drawbacks inherent in radioactivity based methods along with a demonstrated and dramatic increase in sensitivity have precipitated a major shift towards luminescence measurements and visualization techniques Their use has now spread even to traditional clinical environments and their applications have grown from clinical assays to **Handbook of Radioactivity Analysis** Michael F. L'Annunziata, 2012-12-02 Handbook of Radioactivity Analysis is written by experts in the measurement of radioactivity The book describes the broad scope of analytical methods available and instructs the reader on how to select the proper technique It is intended as a practical manual for research which requires the accurate measurement of radioactivity at all levels from the low levels encountered in the environment to the high levels measured in radioisotope research This book contains sample preparation procedures recommendations on steps to follow necessary calculations computer controlled analysis and high sample throughput techniques Each chapter includes practical techniques for application to nuclear safety nuclear safeguards environmental analysis weapons disarmament and assays required for research in biomedicine and agriculture The fundamentals of radioactivity properties radionuclide decay and methods of detection are included to provide the basis for a thorough understanding of the analytical procedures described in the book Therefore the Handbook can also be used as a teaching text Includes sample preparation techniques for matrices such as soil air plant water animal tissue and surface swipes Provides procedures and guidelines for the analysis of commonly encountered na *Luminescence Immunoassay and Molecular Applications* Knox Van Dyke, 1990-05-31 This unique one of a kind book provides updated information on the various aspects of luminescence immunoassay LIA Focusing on this newly emerging technology this work describes the important findings regarding the chemistry of light and the various forms of luminescent immunoassay It includes antigen labeling enzyme labeling cofactor labeling enzyme multiplied assay and multiple labeled immunoassay This interesting text also discusses calculations including computer programs available for high throughput analysis No other compendium provides such a broad overview as well as details on this fascinating subject Both novices and experts will find important and useful information packed in this must have resource on luminescence immunoassay **Yield of Radioluminescence of Organic Matters** Z. A. Chizhikova, 1963 **Isotope Production and Applications in the 21st Century** Nigel R. Stevenson, TRIUMF., 2000 The Third International Conference on Isotopes focused on the theme of Isotope Production and Applications in the 21st Century and included presentations by several eminent experts in this field The three central subjects Isotopes in Medicine Industry and the Environment were supplemented by presentations on the latest developments in isotope production and synthesis research into radiopharmaceuticals applications in agriculture analytical applications radiocarbon dating AMS and PET Various views on the future directions for producers and users of isotopes

were considered at this multi disciplinary meeting **Studies on Life at the Energetic Edge - from Laboratory Experiments to Field-Based Investigations, Volume II** Mark Alexander Lever, Bo Barker Jorgensen, Jan Amend, Victoria Orphan, Tori Hoehler, 2024-01-16 In collaboration with Microenergy 2022 The 4th International Workshop on Microbial Life under Extreme Energy Limitation we are proud to launch Volume II of Studies on Life at the Energetic Edge from Laboratory Experiments to Field Based Investigations This workshop focuses on the energy controls on microbial life and the exploration of the biological demand for energy Genetic adaptations and phenotypic traits that enable microorganisms to tolerate long periods of energy limitation have attracted broad scientific interest in recent years Laboratory based cultivation experiments have shown that the potential to survive weeks to months in the absence of energy inputs occurs across a phylogenetically wide range of microbes Studies on natural environments have shown that energy limitation is pervasive across most habitats on Earth from highly metabolically active surface habitats to subsurface environments that have been cut off from new energy inputs for thousands of years Yet much remains to be learned about the evolutionary adaptations and life history traits that enable microorganisms to live under low energy conditions Similarly the spectrum of energy sources and metabolisms that enable and support life on Earth and potentially elsewhere in the Universe is far from constrained
