Zech, 2013-04-17 **Massive Stars in Starbursts** Claus Leitherer, Space Telescope Science Institute (U.S.), 1991-05-16 This book reviews the importance of massive stars in several areas of astrophysics Massive stars are objects that are 10 100 times the mass of our Sun Above ten solar masses loss through stellar winds begins to have a major impact on the evolution of a star The upper limit of 100 solar masses is derived from observations Significant progress has now been achieved in massive star research New models along with high quality observations have improved our understanding of the formation structure atmosphere and evolution of these massive objects They are formed in violent bursts of star formation and are probably related to the phenomena observed in active galactic nuclei The workshop at the Space Telescope Science Institute examined the interplay between the astrophysics of massive stars and their location in extragalactic starburst regions There are eighteen chapters by leading researchers Each has been carefully edited to ensure that the book is a comprehensive introduction to the theory and observation of massive stars in starburst regions Stellar Astrophysics for the Local Group A. Aparicio, A. Herrero, F. Sánchez, 1998-06-13 A review of the new subject of extragalactic stellar astrophysics for both graduate students and researchers working in astrophysics **Violent Star Formation** Guillermo Tenorio-Tagle, Instituto de Astrofísica de Canarias, Royal Greenwich Observatory, 1994-09-22 A valuable overview and a timely update on all aspects of violent star formation in a host of objects for graduate students and researchers across a broad range of research interests Astrophysical Ages and Dating Methods Elisabeth Vangioni-Flam, 1990 Starbursts and Galaxy Evolution Xuan Thuan Trinh, Thierry Montmerle, J. Wilson, 2013-12-11 This book was conceived to commemorate the continuing success of the guest observer program for the International Ultraviolet Explorer IUE satellite observatory It is also hoped that this volume will serve as a useful tutorial for those pursuing research in related fields with future space observatories As the IUE has been the product of the three way collaboration between the U S National Aeronautics and Space Administration NASA European Space Agency ESA and the British Engineering and Research Council SERC so is this book the fruit of the collaboration of the American and European participants in the IUE As such it is a testimony to timely international cooperation and sharing of resources that open up new possibilities The IUE spacecraft was launched on the 26th of January in 1978 into a geosynchronous orbit over the Atlantic Ocean The scientific operations of the IUE are performed for 16 hours a day from Goddard Space Flight Center in Greenbelt Maryland U S A and for 8 hours a day

from ESA Villafranca Satellite Tracking Station near Madrid Spain      *Galactic and Extragalactic Star Formation* Ralph E. Pudritz, Michel Fich, 2012-12-06 Recent advances in the instrumentation used to observe star forming regions in both our own Milky Way and in external galaxies have transformed the subject from a phenomenological pursuit into an increasingly unified physical science High resolution centimetre millimetre infrared and optical studies of local star forming clouds have allowed us to probe the physics of star formation down to spatial scales approaching those of the solar system These developments make it possible to better constrain the basic physical processes underlying star formation itself At the same time these new instruments have placed extragalactic studies on a footing detailed enough to allow comparison with star forming regions within our own galaxy This revolution means that we will soon be able to link the physics of local star forming regions to the global star forming properties of galaxies The entire structure of this NATO Advanced Study Institute was designed to explore this new view of the subject This Institute on Galactic and Extragalactic Star Formation was held from June 21 July 4 1987 at the Conference Centre in the village of Whistler British Columbia Canada The informal atmosphere of this lovely mountain resort stimulated many valuable scientific exchanges The Institute was funded by a major grant from NATO Scientific Affairs Additional financial and moral assistance was provided by the Canadian Institute for Theoretical Astrophysics CITA and McMaster University      *Luminous stars and associations in galaxies* Camiel W. H. de Loore, 1986      *Proceedings of the Eighteenth General Assembly* Richard M. West, 2012-12-06 The XVIIIth General Assembly of the International Astronomical Union was held in Patras Greece from 17-26 August 1982 It was marked by the tragic death of the President of the IAU Professor M K V Bappu on August 19 1982 This sad event without precedent in the history of the Union posed serious problems to the organization of the General Assembly which could only be overcome by the full collaboration of all members the organizers and the Executive Committee A tribute to the memory of Prof Bappu was paid during a plenary meeting on 23 August 1982 The full texts of the speeches are published in Chapter I of this volume The excellent scientific programme in Patras was organized by the Presidents of the 40 IAU Commissions and coordinated by the IAU General Secretary 1979-1982 Professor P A Wayman The local arrangements were taken care of by Professor C Goudas and his collaborators from the Patras University Due to the unexpected withdrawal in 1979 of another invitation to host the 1982 IAU General Assembly the organizers in Greece had less than two years available for the extensive preparations and our hearty thanks are due to them for their persistent efforts which made this General Assembly an outstanding success

**Sky Vistas** Craig Crossen, Gerald Rhemann, 2012-12-06 galactic perspective Much of the pleasure of Sky Vistas is an astronomy guidebook for both astronomical observing comes from looking with active and armchair observers First it is a practical observing guide to the deep sky objects the mind as well as the eye Thus Sky Vistas describes how the naked eye appearance of the that are visible in low power wide field instruments Milky Way itself relates to the spiral structure of our like binoculars and richest field telescopes RFTs Galaxy in the vicinity of the Sun how the familiar Second it is a reader's

guide to how the familiar bright nebulae and open clusters are distributed bright nebulae and star clusters along the Milky Way trace the spiral arms in the Sun's vicinity along our Milky Way Galaxy's spiral arms in the neighborhood of the Sun and to how the brightest and how the eyepiece appearance of individual open clusters relates to their age and as a consequence galaxies are distributed with respect to our Milky Way to where they are with respect to the spiral arms of the Milky Way Galaxy and to the Local Galaxy Group of And galaxies are discussed in their actual physical which our Milky Way is a member Not many observing guides have been written groupings and their eyepiece appearances are expressly for binoculars and small richest field tele related to their true structures

*Reports on Astronomy* Richard M. West,2012-12-06 volume XIX A of IAU Transactions contains the reports by Presidents of Commissions covering the period July 1981 June 1984 The topics of IAU Commissions deal with all of contemporary astronomy and the present volume therefore constitutes an exhaustive and unique record of astronomical research during this interval It is particularly useful for astronomers and other scientists who want to gain an overview of a certain field not necessarily near their own research area Each Commission President was requested by early 1984 to begin preparations for the compilation of his/her Commission report All members of Commissions were asked to supply details about their individual research programmes The ensuing very substantial task of concatenating was undertaken in late 1984 by the Presidents often supported by a team of authors all recognized authorities in their fields In order to preserve some measure of uniformity which is in any case very difficult with so many authors editorial guidelines were sent to Presidents including the number of pages allotted to each Commission
