Global Revolutionary Aesthetics and Politics after Paris '68 Martin Munro, William J. Cloonan, Barry J. Faulk, Christian P. Weber, 2021-02-22 The year 2018 marked the fiftieth anniversary of May 68 a startling by now almost mythic event which combined seriousness courage humor and theatrics The contributions of this volume based on papers presented at the conference Does la lutte continue The Global Afterlife of May 68 at Florida State University in March 2019 explore the ramifications of that springtime protest in the contemporary world What has widely become known as the movement of 68 consisted in fact of many synchronous movements in different nations that promoted a great variety of political social and cultural agendas While it is impossible to write a global history of 68 this volume presents a kaleidoscope of different perceptions reflections and receptions of protest in France Italy and other nations that share in common a global utopian imaginary as expressed for example in the slogan All power to the imagination The contributions of this collection show that while all social struggles are political many lasting changes in individual mentalities and social structures originated from utopian ideas that were realized first in artistic productions and their aesthetic reception In this respect the various protests of May 68 continue

The Spirit of '68 Gerd-Rainer Horn, 2008-10-02 In virtually all corners of the Western world 1968 witnessed a highly unusual sequence of popular rebellions In Italy France Spain Vietnam the United States West Germany Czechoslovakia Mexico and elsewhere millions of individuals took matters into their own hands to counter imperialism capitalism autocracy bureaucracy and all forms of hierarchical thinking Recent reinterpretations have sought to play down any real challenge to the socio political status quo in these events but Gerd Rainer Horn's book offers a spirited counterblast 1968 he argues opened up the possibility that economic and political elites on both sides of the Iron Curtain could be toppled from their position of unnatural superiority to make way for a new society where everyday people could for the first time become masters of their own destiny Furthermore Horn contends the moment of crisis and opportunity culminating in 1968 must be seen as part of a larger period of experimentation and revolt The ten years between 1956 and 1966 characterised above all by the flourishing of iconoclastic cultural rebellions can be regarded as a preparatory period which set the stage for the non conformist cum political revolts of the subsequent red decade 1966

1976 Horn's geographic centres of attention are Western Europe including the first full examination of Mediterranean revolts and North America. He placed particular emphasis on cultural nonconformity, the student movement, working class rebellions, the changing contours of the Left and the meaning of participatory democracy. His book will make fascinating reading for anyone interested in this turbulent period and the fundamental changes that were wrought upon societies either side of the Atlantic.

May 68 in French Fiction and Film Margaret Attack, 1999 This is the first study of May 68 in fiction and in film. It looks at the ways the events themselves were represented in narrative, evaluates the impact these crucial times had on French cultural and intellectual history and offers readings of texts which were shaped by it. The chosen texts concentrate upon important features of May and its aftermath: the student rebellion, the workers' strikes, the question of the intellectuals, sexuality, feminism, the political thriller, history and textuality. Attention is paid to the context of the social and cultural history of the Fifth Republic, to Gaullism and to the cultural politics of gauchisme. The book aims to show the importance of the interplay of real and imaginary in the texts of May and the emphasis placed upon the problematic of writing and interpretation. It argues that re-reading the texts of May forces a reconsideration of the existing accounts of postwar cultural history. The texts of May reflect on social order, on rationality, logic and modes of representation and are thus highly relevant to contemporary debates on modernity.

Une université pour apprendre à apprendre Stavroula Bellos, 2020-03-18 Dans ce livre, l'auto-analyse se fait. Citée et l'auteure déroule son histoire de vie. Les événements s'entremêlent dans l'aventure de la découverte des savoirs. Sa réflexion critique déconstruit les préjugés et les conventions institutionnelles en les confrontant au réel du vécu et du quotidien. Il y a la volonté omniprésente de partager la pratique et la dynamique sociale du phénomène de l'apprentissage. Apprendre, apprendre. Au-delà du déroulement temporel et de la promenade topographique, l'Université de Paris 8 Vincennes-Saint-Denis, l'auteure raconte le cheminement de sa réflexion et les conditions dans lesquelles elle a été nourrie et s'est développée.

Distance Education David Sewart, Desmond Keegan, Borje Holmberg, 2020-07-24 Distance education for long the Cinderella of the educational spectrum had emerged in the 1970s and early 1980s as a valued component of many national educational systems in both developed and developing countries. The foundation of the Open Universities, developments in communications technology and in audio-video and computer-based learning, a new sophistication in the design of print-based materials and better support systems for the student learning at a distance had all contributed to the availability and quality of distance education programmes. Originally published in 1988, this book chronicles this great change in distance education. It presents the best writings on the subject published during the previous ten years. The articles selected for this volume provided a new scholarly basis for the theory and practice of distance education. The editors have brought together contributions from many countries and present authoritative introductions to each of the nine sections. This book provided those in both developed and developing countries with a guideline to one of the most rapidly expanding areas of education at the time.

Contemporary France D. L. Hanley, A. P. Kerr, Miss A. P. Kerr, N. H. Waites, 2005-08-17 Many

recent studies of French politics have tended to concentrate on the French political system in isolation Contemporary France aims to set the working of the French political system into its historical social and economic context The first section gives a succinct description of the main developments since 1944 in all major contexts economy society domestic politics and foreign relations The authors then analyse the economic social and cultural structures of present day France and discuss the institutional framework of decision making and the major political forces involved in it There are also chapters on French external and defence policy and on the education system all of which are set in the context of the political system as a whole Aimed primarily at students of European history and politics or of French society and culture the book assumes little knowledge in the social sciences and will be readily accessible to beginners in this field **Alain Badiou** Jason Barker, 2002

Alain Badiou is rapidly emerging as one of the most radical and influential philosophers of our time Badiou opposes the contemporary reduction of philosophy to nothing but a matter of language and premature announcements of the end of philosophy and thus sets himself against both analytic and continental modes of philosophy Setting the traditional platonic concerns of philosophy truth and being against the modern sophists of postmodernism Badiou has articulated a powerful systematic philosophy with profound ethical and political consequences Les Écritures mêlées Daniel Zimmermann, Claude
