Planning and Design for Sustainable Urban Mobility
Un-Habitat,2013-10-30 Urban transport systems worldwide are faced by a multitude of challenges Among the most visible of these are the traffic gridlocks experienced on city roads and highways all over the world The prescribed solution to transport problems in most cities has thus been to build more infrastructures for cars with a limited number of cities improving public transport systems in a sustainable manner However a number of challenges faced by urban transport systems such as greenhouse gas emissions noise and air pollution and road traffic accidents do not necessarily get solved by the construction of new infrastructure Planning and Design for Sustainable Urban Mobility argues that the development of sustainable urban transport systems requires a conceptual leap The purpose of transportation and mobility is to gain access to destinations activities services and goods Thus access is the ultimate objective of transportation As a result urban planning and design should focus on how to bring people and places together by creating cities that focus on accessibility rather than simply increasing the length of urban transport infrastructure or increasing the movement of people or goods Urban form and the functionality of the city are therefore a major focus of this report which highlights the importance of integrated land use and transport planning This new report of the United Nations Human Settlements Programme UN Habitat the world s leading authority on urban issues provides some thought provoking insights and policy recommendations on how to plan and design sustainable urban mobility systems The Global Report on Human Settlements is the most authoritative and up to date global assessment of human settlements conditions and trends Preceding issues of the report have addressed such topics as Cities in a Globalizing World The Challenge of Slums Financing Urban Shelter Enhancing Urban Safety and Security Planning Sustainable Cities and Cities and Climate Change

Selected Papers: Population and settlement geography; political

and historical geography, 1970 **The Geography of Modernization in Kenya** Edward W. Soja, *Cities in a Time of Terror* H. V. Savitch, 2008 This book is about urban terror its meaning its ramifications and its impact on city life Written by a well known expert in the field Cities in a Time of Terror draws on data from more than a thousand cities across the globe and traces the evolution of urban terrorism between 1968 and 2006 It explains what kinds of cities have become prime targets why terrorism has become increasingly lethal and how its inspiration has changed from secular to religious The author describes urban terrorism as an attempt to use the city s own strength against itself forcing it to implode and delineates three basic logics of terrorist choices for targeting cities The book also includes a discussion of local resilience the city s capacity to bounce back from attack and suggests how that can be sustained Examples from New York London Jerusalem Istanbul Moscow Paris and Madrid illustrate the book s central themes

West African Studies Settlement, Market and Food Security OECD,Sahel and West Africa Club,2013-05-21 With the population of West Africa set to double by 2050 this book explores how agricultural production systems and policy will have to change to support this growth

The SAGE Handbook of Human Geography, 2v Roger Lee,Noel Castree,Rob Kitchin,Vicky Lawson,Anssi Paasi,Chris Philo,Sarah Radcliffe,Susan M. Roberts,Charles Withers,2014-05-22 Superb How refreshing to see a Handbook that eschews convention and explores the richness and diversity of the geographical imagination in such stimulating and challenging ways Peter Dicken University of Manchester Stands out as an innovative and exciting contribution that exceeds the genre Sallie A Marston University of Arizona Captures wonderfully the richness and complexity of the worlds that human beings inhabit This is a stand out among handbooks Lily Kong National University of Singapore This wonderfully unconventional book demonstrates human geography s character and significance not by marching through traditional themes but by presenting a set of geographical essays on basic ideas practices and concerns Alexander B Murphy University of Oregon This SAGE Handbook stands out for its capacity to provoke the reader to think anew about human geography essays that offer some profoundly original insights into what it means to engage geographically with the world Eric Sheppard UCLA Published in association with the journal Progress in Human Geography edited and written by the principal scholars in the discipline this Handbook demonstrates the difference that thinking about the world geographically makes Each section considers how human geography shapes the world interrogates it and intervenes in it It includes a major retrospective and prospective introductory essay with three substantive sections on Imagining Human Geographies Practising Human Geographies Living Human Geographies The Handbook also has an innovative multimedia component of conversations about key issues in human geography as well as an overview of human geography from the Editors A key reference for any scholar interested in questions about what difference it makes to think spatially or geographically about the world this Handbook is a rich and textured statement about the geographical imagination

The Geography of Urban-Rural Interaction in Developing Countries Robert Potter,Tim Unwin,2017-10-30 Originally published in 1989 The Geography of Urban Rural Interaction in

Developing Countries addresses the nature and importance of the interaction between urban and rural areas within Third World national territories providing much needed comparative cross cultural and cross national material The book discusses the various theories of urban rural interaction and summarises the topic in the form of the movement of people goods money capital new technology energy information and ideas Case studies are drawn from different areas of the Third World including Africa Asia the Middle East and the Caribbean and illustrate in detail the nature of urban rural interaction

Human Geography in Action Michael Kuby, John Harner, Patricia Gober, 2013-01-14 Michael Kuby's 6th edition of Human Geography in Action is comprised of 14 stimulating concept based chapters. The text aims to develop geographic problem solving skills that prove valuable to readers. Each chapter begins with an introduction to a concept followed by a case study tying the concept into the real world and wraps up with an activity. These engaging activities featured throughout the text further its "Do Geography" approach. Human Geography in Action provides the opportunity to use GIS to investigate ethnic distributions and culture regions, track the AIDS epidemic over space and time, model interstate migration flows, simulate India's demographic future, add new baseball franchises, animate past urban growth, and assess future growth areas.

A Political Geography of Latin America Jonathan R. Barton, 1997 With case studies of South and Central America, Cuba, Haiti, and the Dominican Republic, A Political Geography of Latin America explains how it is possible to overcome the stereotypes and generalizations about banana republics, dictatorships, and the Latin character. Jonathan Barton exposes the differences between places, regions, and countries, individuals, and societies, offering an invaluable insight into the themes of political and economic development and an accessible guide to understanding power and space relations. Barton stresses the need for inclusionary political geography across hemispheres, nation states, regions, races, and ethnic groups, gender, and sexuality, and for recognition that it is citizens who wield the power and shape nation states.

Cities and Nature Lisa Benton-Short, John Rennie Short, 2013-05-29 Cities and Nature connects environmental processes with social and political actions. The book reconnects science and social science to demonstrate how the city is part of the environment and how it is subject to environmental constraints and opportunities. This second edition has been extensively revised and updated with in-depth examination of theory and critical themes. Greater discussion is given to urbanization trends and megacities, the post-industrial city, and global economic changes; developing cities and slums; urban political ecology; the role of the city in climate change and sustainability. The book explores the historical relationship between cities and nature, contemporary challenges to this relationship, and attempts taken to create more sustainable cities. The historical context situates urban development and its impact on the environment and in turn the environmental impact on people in cities. This provides a foundation from which to understand contemporary issues such as urban political ecology, hazards and disasters, water quality and supply, air pollution, and climate change. The book then considers sustainability and how it has been informed by different theoretical approaches. Issues of environmental justice and the role of gender and race are explored. The final chapter examines the ways

in which cities are practicing sustainability from light greening efforts such as planting trees to more comprehensive sustainability plans that integrate the multiple dimensions of sustainability The text contains case studies from around the globe with many drawn from cities in the developing world as well as reviews of recent research updated and expanded further reading to highlight relevant films websites and journal articles This book is an asset to students and researchers in geography environmental studies urban studies and planning and sustainability **Public Space** Matthew Carmona,Claudio de Magalhães,Leo Hammond,2008-06-03 This book draws on three empirical projects to examine the questions of public space management on an international stage They are set within a context of theoretical debates about public space its history and new management approaches ***The Makers of Modern Geography (RLE Social & Cultural Geography)*** Robert Dickinson,2014-01-10 This book examines the works of the outstanding makers of modern geography and demonstrates the consistency of idea and purpose in their work Geography as an explicitly defined field of knowledge is more than two thousand years old but as a university subject geography is only 150 years old and in this period it has developed hugely This study traces the development of modern geography as an organized body of knowledge in the light of the works of its foremost German and French contributors **The Urban Planning Imagination** Nicholas A. Phelps,2021-04-13 Urban planning is not just about applying a suite of systematic principles or plotting out pragmatic designs to satisfy the briefs of private developers or public bodies Planning is also an activity of imagination with a stock of wisdom and an array of useful methods for making decisions and getting things done This critical introduction uncovers and celebrates this imagination and its creative potential Nicholas A Phelps explores the key themes and driving questions in the circulation of planning ideas and methods over time and across spaces identifying the contrasts and commonalities between urban planning systems and cultures He argues that the tools for inclusive urban planning are today more than ever not solely restricted to the hands of planning bodies but are distributed across citizens a variety of organizations what Phelps calls clubs and states As a result the book sets the ground for the new arrangements between these groups and actors which will be central to the future of urban planning By unsettling standard accounts this book compels us towards more critical and creative thinking to ensure that the imagination wisdom and methods of urban planning are mobilized towards achieving the aspiration of shaping better places **Urban World/Global City** David Clark,2004-06-01 This book identifies and accounts for the characteristics of the contemporary city and of urban society It analyzes the distribution and growth of settlements and explores the social and behavioral characteristics of urban living The latest theoretical and empirical developments and insights are synthesized and presented in an accessible and engaging way This second edition has been extensively updated and referenced Each chapter includes sets of learning objectives annotated readings and topics for discussion Well illustrated throughout it will be essential reading for students of geography sociology and development studies and all who seek an understanding of how the urban world has evolved and how it will change in the twenty first century **Encyclopedia of World Geography** ,2002

Each volume focuses on a specific geographic region covering its physical geography economics government and peoples
