**Blessed Events** Pamela E. Klassen, 2001-10-07 Blessed Events explores how women who give birth at home use religion to make sense of their births and in turn draw on their birthing experiences to bring meaning to their lives and families Pamela Klassen introduces a surprisingly diverse group of women in their own words while also setting their birth stories within wider social political and economic contexts In doing so she emerges with a study that disrupts conventional views of both childbirth and religion by blurring assumed divisions between conservative and feminist women and by taking childbirth seriously as a religious act Most American women who have a choice give birth in a hospital and request pain medication Yet enough women choose and advocate unmedicated home birth and do so for carefully articulated reasons social resistance among them to constitute a movement Klassen investigates why women whose religious affiliations range from Old Order Amish to Reform Judaism to goddess centered spirituality defy majority opinion the medical establishment and sometimes the law to have their babies at home In considering their interpretations including their critiques of the dominant medical model of childbirth and their views on labor pain she examines the kinds of agency afforded to or denied women as they derive religious meanings from childbirth Throughout she identifies tensions and affinities between feminist and traditionalist appraisals of the symbolic meaning of birth and the power of women What does

home birth a woman centered movement working to return birth to women s control mean in practice for women s gender and religious identities Is this supreme valuing of procreation and motherhood constraining or does it open up new realms of cultural and social power for women By asking these questions while remaining cognizant of religion s significance Blessed Events challenges both feminist and traditionalist accounts of childbearing while broadening our understanding of how religion is lived in contemporary America

**Biotechnology and Culture** Paul E. Brodwin, 2001-01-22. Essays on technology's effect on our relationship with our bodies. A timely and perceptive look at some of the most anxiety-producing issues of the day. Paul Rabinow, University of California, Berkeley. As birth, illness, and death increasingly come under technological control, struggles arise over who should control the body and define its limits and capacities. Biotechnologies turn the traditional facts of life into matters of expert judgment and partisan debate. They blur the boundary separating people from machines, male from female, and nature from culture. In these diverse ways, they destroy the gold standard of the body formerly taken for granted. Biotechnologies become a convenient, tangible focus for political contests over the nuclear family, legal and professional authority, and relations between the sexes. Medical interventions also transform intimate personal experience, giving birth, building new families, and surviving serious illness now immerse us in a web of machines, expert authority, and electronic images. We use and imagine the body in radically different ways, and from these emerge new collective discourses of morality and personal identity. This book brings together historians, anthropologists, cultural critics, and feminists to examine the broad cultural effects of technologies such as surrogacy, tissue culture, research, and medical imaging. The moral anxieties raised by biotechnologies and their circulation across class and national boundaries provide other interdisciplinary themes for discourse in these essays. The authors favor complex social dramas of the refusal, celebration, or ambivalent acceptance of new medical procedures. Eschewing polemics or pure theory, contributors show how biotechnology collides with everyday life and reshapes the political and personal meanings of the body. Contributors include Paul Brodwin, Lisa Cartwright, Thomas Csordas, Gillian Goslinga, Roy, Deborah Grayson, Donald Joralemon, Hannah Landecker, Thomas Laqueur,

Robert Nelson Susan Squier Janelle Taylor and Alice Wexler This impressive collection offers a number of rich examples of why the development of anthropological studies of science technology and their disruptive social effects is a leading edge of critical enquiry Arthur Kleinman Harvard University
